

Another point .More needs to be done to remind people that a land called Prussia once existed and was wiped off the map.Why not start selling badges with the map of Prussia or something and a slogan like "We are all Prussians" .Anyone want to help me start this.

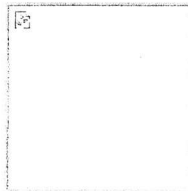

I also disagree that Marxism has been a failure. Like Christianity it has been a great success for the Jews who launched it .Although if they end up being gobbled up in an all chinese world it will have been an own goal! The Trojan horse was a great failure as a gift ,but...

Abortionism is an interesting ideology.We kill ,its our right to choose.What about the President of Irans right to choose?

In my worldview life begins when someone appears that they could be a useful member of western civilisation.That was the worldview of the Spartans although they didn't have the science we have.The life of the Spengler "organism" ,the Culture/Civilisation/Race must be taken into account. Here is a superrational being for the religious to worship if they like and which for once dosen't irritate scientists .One that has an existence and which is a higher power.The "gods" of a people are the face of this being of which the individuals past and present are the cells. Conservationists would better start worrying about saving it because it is alot more precious than the whales.I also want to save the Whales and Lions etc but to do that we have to take back the power from those who have it today.I think it a shame that the Bushmen are being wiped out by other africans .The bushmen minded their own business and lived simply .The suffering of the people of the third world is caused by the do-gooders like Geldolf.There is an excellent book on Katanga by Douglas Reed.Where are all the anti-colonialists now that the commie Chinese are colonising Africa?

The human body dosen't kill off healthy cells as they grow and neither should healthy children be aborted.The human body dosen't deliberately nourish worthless cells either .You don't see many african Down Syndromes do you?Why do you think that is?They are killed at birth I suggest.The Africans often kill even healthy children if they think they are possessed by "fairies".

I only heard the other day about the arrest of a group of Moroccans ,a few years ago,who were in Rome with plans to the water system and enough cyanide to kill everyone in the city.These arab cretins ,who hate the Jews, help them out with their antics,which only give the ZOG pretexts to attack its real enemies.We know that the British intelligence Service help the Chechens. To what degree all this muslim terrorism is orchestrated is open to question.You have countries like Albania which are complete disaster zones.They need help to recover from centuries of Turkish occupation.Albanians are involved in alot of criminal activity.I bought a book to give to an Albanian woman on the Albanian mafia and I learnt a few things from it myself. Most of the cars in that country are stolen from elsewhere in Europe.The NWO builds on the work of all enemies of the west before it.It is a coalition against all healthy human life.
