

Dear Eric,

The reason I still harp on this subject of subracial differences is the extremely annoying habit of the arabs ,turks Jews etc to target the med types as their entry point when trying to fool whites. The Girls above are Albanians but I would guess 99% of people would take the darker one for something extra european. I have heard arabs in discos etc trying to pass themselves off as portugeuse

Two poor french guys with some kind of arab creature and in the middle a berber woman. Apparently in some mountain areas in algeria they are quite white. But as one of the smarter ones of them I met said it is a matter of culture. I said she looked European .Yes she does but she is still an enemy.

One could compare the brainwashed youth to the janissaries. Raised to fight against their own and knowing nothing about their real roots. A lot of the arabs also try to say they are berber ,knowing it is looked down on less.

and italians .So southern europeans face the same threat as northern ones but also some the additional humiliation of being confounded with the muck of the third world . The definition of whiteness being the border fought over in this case.

France is the most like america of any european country. We have every kind of white here . It is also a minature europe,with bretons ,alsacians and corsicans wanting out .

Blonde girl is three quarters french and one quarter Harki. When walking in the arab area with a soldier the soldier was set upon by the arabs who thought he was a skin head .

Many people predict race war for France. The gypsies are killing arabs in the south and the arabs have been rioting. The french themselves are full of bolshie prop from the schools which are full of trotskyist teachers. When the race war comes it won't be started by the french. Holland is closer to ignition point. Most of the people who are active nationalists are older although there are a fair few skin heads around the country. I was out postering for the no campaign against the european constitution with a chap with a bad heart who has to take tablets. He refuses to be beaten. I heard there was a brazilian type beach trawling in portugal by 500 blacks recently. I listen to the BBC world service and have no TV. The portugeuse are supposed to be the least racist according to the BBC. I have found them more race conscious than the french. They do let any brazilian into their country and the south americans are really a mess. What percentage of whites we would salvage from south america I don't know and have never been there.

Those who carry a functional amount  
of non western genes or memes  
cannot be part of western civ.  
This is the reply when  
you get Jews telling one  
how white they are.  
And also to reds, renegades etc.

Paris  
May 1st

Jewish spy « Sidney Reilly » and the actor who played him in the BBC television series of the 1980s. Rather a large difference in appearance ! That series was one of the better things on TV then. What I have managed to find of Robert Bruce Lockhart's writings are well worth reading. He was a prisoner of the Reds. *(and alot) more*

I knew a race mixing Irish girl who tried very hard to befriend a gypsy woman. The gypsy took her money but would have none of her friendship and was not interested in interaction and having coffee. This girl went on to abort a black baby. When she found out I was a Nazi we had a great conversation in which she told me she thought the white race was doomed. The Gypsies are supposedly from India originally and are rock hard culturally and not interested in anything about them. Chamberlain speculated that they were some kind of Aryan reflux from India on the basis of Hungarian gypsy music. The ones I know though are race mixing with the Arabs, it's hard to judge the rate relative to the normal French population but I would guess at a much lower rate.

It is clear that there is some African influx into southern Europe and some Asian into eastern. In the bar I go to there is a polish chap and I assumed he was a Jew, but no.

I think the definition will always be fuzzy. But clearly people with an obvious amount of non European genes such as would show up in a test are not. Lots of research needs to be done and the solution if and when it comes won't be based on academic discussion or theorising.

As for sickle cell, we cannot forget genetic drift. Genes can be amplified in a population.

It's an irony that the purest part of the race, the Nordic part is the most suicidal and suffers from the most projectionism. Even in Ireland we find a blood disorder thanks

to Irish soldiers of the imperial army bringing back Indian wives. The entire white race has suffered thanks to mongrelisation, although clearly some parts more than others. We will just have to salvage what we can.

I can only think of Iceland as a country that really satisfies your definition and I hear the women there are doing well

( We can talk of relative whiteness or something. Rh<sup>-</sup> blood in Basques indicative of isolation etc. )

from selling their eggs (to who I don't know). I don't think the singer Bjork is typical. She clearly has a little asian. I think future emigration policy should take into account the healths of the various white populations. White being defined by me as having the vast majority of its genetic material as white. Western Europe should be the source and not the sink. Still we cannot neglect the boundary effect. Places like Greece are in the west and are

under attack and the people there have a stronger sense of identity. Also some of the Russians I have seen were clearly Eurasian (Brezhnev comes to mind) but the majority are not although the national character has had a little Asiatic rub off on it. Similarly the Finns are white with a little admixture of Asiatic. In one of the school books I saw here caucasian is put down as white and so all north africa is called white africa. I don't know if this is a wide spread practice here.

There seems to many nomenclatures. I use caucasian to describe the bigger group including indians and arabs and white for the aryan group only. I saw a film in which an Italian film crew weren't killed by blacks because they were considered non white. Well the Italians are white enough to be targeted by ZOG and millions of immigrants are flooding in there too. If the Jews hate you you could well be white!

Its ones of the lefties favorite tools to tell us how we are all race mixed already. One Italian/moroccan woman who grew up in Italy attacked me when I was leafleting and her favourite theme was how the roman empire race mixed. Well they did a bit but nothing like today. As long as people are mentally functional as europeans .

I also met a German girl whose greatgrandfather was a mongolian who raped her greatgrandmother . She had dark hair and looked more slavic than german but still

brought revisionist books to Germany to show all her family. She had not crossed the line where ever it is. The line between a tiny trace and mongrelisation. I judge on a case by case basis.

Also there are ethnic differences between Europeans, many having arisen normally and due to geographic separation but some certainly due to a tinge of nonwhite. The

Jew managed to sneak in through the cracks in the definition of whiteness because we were so used to differences between Europeans and variation.

The best thing we can do is to keep our existing nations.

I met a red cheeked blond Jew in a bar. I knew he was before it was confirmed when he left because he immediately commented on the Celtic cross I wear. No doubt the

majority of his ancestors were Aryans but perhaps the Y chromosome of the Jews had come down to him. There are certainly many mysteries that may never be solved or even have their questions properly posed. For example mixes on the father's side are worse than on the mother's side especially in male offspring. We have a lot of such half Arabs here some appearing to be white, even some with light hair, the bad character is usually a warning sign, a give away.

That Jew immediately started going on about God and asking did I believe etc showing to me their role in spreading Christianity and undermining our culture. Culture is

important also. We need both. I don't imply cultural conversion but the necessity of cultural health in what we have. Race isn't enough by itself as we saw with the Janissaries. It's an IFF switch: If of white race and if of western culture. Oliver always qualified it like that "we white men of the west".

The Jews are always telling me  
to go back to my own country!

Whatever genes they have a part of the white race is polarised towards the outside like iron filings aligning with a magnetic field.

PS its also possible I'm going soft because of all the "national democratic" ideology I'm exposed to. We worked quite hard for that no vote.

I remember telling a half english half indian that he looked like a romanian as a joke. He went bizerk. He said he had never been so insulted in his life and denounced me by screaming in public the next time I passed by. The lunatic asylums collect such results of race mixing and given time the race will clean itself ,to some extent, if we can keep out the major flood. Culture creates race and viceversa. Cultural barriers keep such out. The French have learned to be hypocrites with the non whites and learn who they can talk with.

I met an american who was here to join the legion. He stayed in the pigaille and told me he resisted the charms of a chinese whore who offered herself to him for nothing. Whether he went on to join the legion I don't know but I met one of its officers and he showed me the inside of his Kepi in which he had a picture of an SS man.

(The pigaille is a  
red light area of  
Paris)

Masonic pyramid in the middle of Paris.  
Mitterand's work.

They even have masonic  
propaganda in the  
dictionaries  
and on TV.

I saw a film in the library  
in which they raised lots of  
issues such as P2 etc.  
all to mislead and confuse.

Found this girl selling fair trade stuff . Thought she was french but just from her first name I guessed she also has some extra european origins. Even one grandparent and its dangerous to talk to them. They could turn you into the thought police!

Yours Sincerely,  
B. Wallace

If we talk in terms of culture  
we can talk in absolute  
terms. People need to be  
more conscious of non western  
memes also.
