

Dear Eric,

eric).txt

The moderator on stormfront dosen't like my approach . He thinks wn should try to look like normal people.

I think we should be as realistic and without pretension as possible and I don't think cowards and degenerates can be lulled and tricked into becoming men events created by their cowardice and weakness will make them men or corpses .Feedback.

I am working out predator prey models to explain history .The Jew is the predator .This can be used to model the dark ages and renaissance perhaps. I don't have many resources but I think the progress and regression pattern in the history of the west can be explained with differential equations.

My scientific career has been cut short by the need to fight this war.I was disgusted by the atmosphere at the university. Those interested in the subject like me were always hindered by the revolting middle class creeps who were only there for social and financial advancement.

Game theory must be applied to every institution to eliminate parasitism when and if possible.

We can take platos ideas in his republic and give them now a mathematical foundation. Amazing things are possible but nobody has an intellect anymore.

I have made cds and dvds to hand out to people I meet in Ireland at christmas. Thats the best I can do . Meanwhile I am working my way through the hobbyists here to find someone who will fund me to set up a bookshop.

It seems that the internet came to late to make a big difference and the slide towards out and out race war continues. It will be started by the wogs themselves.The young here are so wiggerised that I end up with women ten years older than me.

I saw a programme on french tv about a nigger called calloway who hijacked a fedex jet and used a hammer to try to kill the three white flight crew.

My computer sadly wasn't powerful enough to save the programme and I don't have the software to digitilise such things but perhaps in the future .

Hobbyists ,movement is full of them and they are a curse.Hard to find serious people here are there are more quasi serious people .In Ireland the quasi serious people are in the form of catholic traditionalists and completely useless ,here in the form of old soldiers and fascists. One of my friends father was in ss charlemagne division but he himself isn't really serious. Yes he has a nice collection of guns and german helmets but will he fund me to set up a bookshop?

His father was in charge of the nazi bookshop in the town for the milice.

Brought one to see a friend. She told us how she had pushed an arab out of the way when he was blocking a door after she had asked him to move several times and the arabs came for her with baseball bats. Luckily the police arrived in the nick of time.

I agree that there is a certain continuity across from semitic to latin cultural practices.The kissing on the cheek etc .The vindictive tendency one finds in certain latins especially the southern Italians and the extrmely vindictive nature of the semites.

The white nationalist movement is gradually being poisoned by national democratic ideas. Thats a flawed defensive ideology.

One can say what needs to be said and not make the foolish detours they do.There is a lack of articulate speakers.

Trying to out jew the jew will never fly.

Some of these partys actually help zionists with their cowardly preoccupation with "islamic" problems ,itself a system propaganda term.They are effectively playing a game with the zog,you leave us some breathing space and we will back some of your agenda. I am suspicious of the FN here.

When the alcohol comes out secrets come out. My friend revealed that one of our friends used to be in the counter-espionage police and was on the left in politics before he joined the FN.Is he an infiltrator?

Another used to be a gaulist before.I don't trust such chameleons.

I got something for my computer which enables me to watch television on it. My computer isn't powerful enough to make use of the recording facility but I can seize images .The television is absolute rubbish but now I can watch the propaganda an improve my accent.Its really further to the left than in Ireland. I even saw an abortion televised .

I am thinking of moving to northern Italy ,which seems the most lively part of europe for people like me.

If I could set up a bookshop on the German border perhaps.

I will have to find a source of funds to proceed with any of my projects.

I am doing translations for several groups and sites .

VNN has excellent material on the oklahoma city bombing and the role of strasemeyer, the german spy in it. The truth is coming out.

Its imposible to even get a cultural nationalist thing going here in france. the music is mainly in english and the french language is going the way of the irish language.People aren't worried because I guess they know that racial armageddon will overtake them first. Madeline Stowe another of your americain whites mixed ancestry . I heard she is part hispanic .You you have a point there . When I was looking for signatures I met a canadian who said he wouldnt sign because he was a quarter indian but when the niggers start killing he will look white enough.

I saw that ralph nader was half lebanese .

The south african thing enclosed nearly got me in a fight with a wigger. I also recently had problems with a jewess in a disco.Her slut of a friend went a told all the jews in the club my views and tried to start a fight .

The media is pushing sarkozy for president here very hard.

Now that I can watch the propaganda I have seen some interesting things. I saw a writer who writes books on the suburbs (the nigger and arb filled ones) . He was in favour of them burning the cars of whites if that drew attention to their allegedly bad condition.He said yes they burned that gynasium but it was a shit gynmasium. The french tv uses swear words non stop. No taboo as in anglo countries.

It tunred out that he was half jew half gypsy.The father being jewish. I take the y chromosome as more important for character.

He looked an ostensible white.Such as could act as an infiltrator and often does here. The media is non stop apologies for the rioters .I heard one interesting programme on the radio that talked about anti-white racism.

People are more polar here but the good ones are dying out and on the defensive.

France is full of half semitic people. I even ran into a few when doing intense activism in Ireland but only one that wasn't obvious. Here there are ones that only show up when you talk to them.

I am going to meet a greek woman this evening .She was disgusted by the stories I told her of the french women I had met and all their abortions etc.
