

Russia .- NZZ 16.12.04 " The European parliament as criticized the accumulation of power by President Putin" (What has this got to do with the EU?) . On 21.12.04 Putin's visit to Schroeder. The German Greens accuse Schroeder of being pro-Russian. ( With the axis Paris-Berlin-Moscow, countering US ambitions, Schroeder is only taking into account geo-political necessities, as Pierre Vial has noted). 22.12.04: Putin support the German candidacy to a permanent seat on the Security council of the UN (the axis functions well) On 31.12.04. Large increase in the Russian military budget. Are included 7 Intercontinental ballistic missiles, 9 military satellites and 5 rocket launchers. ( A reply to the politics of encirclement by the US. Could Putin assume the role of counterweight to Bush-Sharon)

In the Figaro of 27.7.04, Alexandre del Valle supplies an excellent analysis under the title "The reasons to refuse Ankara's candidature ". Here is the most important point:" The entry of Turkey in the Union will open the Pandora box of enlargement. Why refuse later the 200 millions turkic speakers from the Caucasus and Central Asia, or the states of the Maghreb? The EU will inherit all the geopolitical problems (water, borders, minorities, etc.) which Turkey has with its neighbours . Without forgetting drug and weapons trafficking, clandestine immigration, of which this country is the hub. "( let us say that Alexandre del Valle, real name Marc d'Anna is the author of the monumental study "Islamism and the United States- an alliance against Europe" Editions L'Age d'Homme, Lausanne ISBN-2-8251-1060-4

Just published in German, a special edition of the revue "Athenaeum" (Moscow 2005), e-mail ateny yandex.ru. It is a ground-breaking initiative: throw a bridge over the linguistic borders which are artificially separating the European people. "Deutschland and Russland" is the title of that issue. Chief redactor Pawel Tulajew (P.O.Box 11, 109462, Moscow , Russia). Pawel Tulajew : " Far-sighted Russian thinkers are seriously busy today to elaborate new geo-political models which will give to the Germans and the Russians , decisive roles in the organisation of the new euro-asiatic sphere of influence, but also in the instauration of new political and military structures on the continent." - Anatoli M.Ivanov shows the cyclic character of history . and he believes in the mission of the German people, together with others and thanks to the forces of sanity which will have understood the message of Nietzsche.- Vladimir Avdjev, on the basis of his study of races, come to the conclusion that "the history of the world is not only a struggle between the main races, but even more a struggle between the core of the race and its genetic periphery ". And by this he reiterates the "Uppsala propositions" (whose re-edition would be useful.) - Gerhoch Reisegger, under the title "Globalisation equals death" , analyses with insight this modern panacea, which consists in handing over the solution of problems to future generations and which will end up in the utter destruction of the peoples. As to the United States, globalisation make them an empire of death.

Zeitgeist December 04 (Postfach 3535, CH 5001 Aarau) A. Eglsede:" Let us not forget that the power of the world capitalist dictatorship does not control everything and that it is not eternal. In fact the contrary is true. The capitalist system self-destructs , it finds itself in a state of advanced self-destruction. Western societies are twisting and crumbling. Traditions and culture are massively corrupted , the multi-culture does not functions, ethnic ghettos are all over. Poverty increases, total automation renders the worker useless, and the economy goes toward its doom with the strategy of the greater profit for the smallest investment."

"Militant" No552 (BP 154, FR-75010 Paris), Andre Gandillon:" Actually , Russia is fighting alone, in difficult conditions, both against newly conquering Islam and globalism."
