

# Letter to Irish Academics

911PHY

Some of you will have long suspected that there was something seriously wrong with our society, perhaps you were disgusted by modern art or something else, perhaps the growing immigration or the obnoxious presence of so many homosexuals? For me the turning point was finding out that men like David Irving were telling the truth. For you perhaps it will be something else such as discovering how central banking works. David Irving is now in jail in Austria and we don't as much as see a letter to the editor from any of you.

Well we know whats up and are fighting back .You will be a happier person when you join us.

I am disgusted that I ever had anything to do with Irish universities . How ye have dishonoured yerselves!

Ireland is the only country that I know of in Western Europe that has not produced any academic dissidents. Even small little Ulster can boast of Professor Lynn.

Yes some people have expressed sympathy in private ,but they have done nothing in public to defend our traditions .

Even that vile creature from the Irish times asked me for names. They are looking for someone to crucify. Of course I never divulge the names of my helpers. I am one of those old fashioned gentleman types and my word means something.

Is there anyone who will step up publicly to defend the people and our heritage or am I the last man left in Ireland?

The entire university set up is itself vulnerable to rational thought. Game theory and so forth strips your act naked.

The entire education system will need to be looked at.

These best men , the idealists want nothing to do with you and your losing game. This civilisation belongs to us , you belong to us , you little men.

It wasn't built by cowards.

Those who are parasites , who are among the most inverted of the inverted society , can hardly be expected to honour the platonic title that they have usurped.

It is rather we the dissidents who are the real academics, we who do the real culture guardianship, while ye grow fat in symbiosis with the pirates who have taken over the ship .

I am aware that the History faculties are actively teaching lies about Revisionists and getting their students to write theses against us.

Help us punish these vermin like Dermot Keogh who bring shame to all of you.

That guy knows exactly what he is doing when he betrays Ireland and the West. In Russia the skinheads would shoot him dead .

Like in the Soviet Union some subjects were useful to the regime and were less affected by the ideology. We see this in the West today. Some faculties have sounder staff. The only solution for the Arts faculty is to hang the better part of them. I do think cowards need to be told that they cannot sit this one out and leave people like me do all the work. When the revolution that is building in Europe arrives , and the war will be started by the millions of subhumans your system has imported to oppress and degrade the population, when that revolution arrives those judged to have been inverts, to have profited as a parasitic elite will face harsh measures.

I also direct this to my friends .

The science people should come out against the ideological pollution on campus when its

## 911PHY

waves lap up against the laws of Physics.

Oh of course you would love that Yankie blood money too.

My advise to academics is this . Do what you can . You have utterly disgraced yourselves as a group. You don't feel it enough because we lack enough grassroots activists to constantly expose you , for the moment that is.

Fight back, those of you who are genuine. You would be surprised what you can do. Some countries like Russia and Iran are relatively healthy and you should consider helping them out. Even such a simple thing as posting textbooks to Iran or financing the return of Russian scientists to Russia is better than nothing.

You yourself can see the decline in our civilisation. Fight back. Join us !

There are many conservatives and christians in Irish universities. The position of the churchs is a great hindrance . The Catholic church was captured in a coup in the 60s and is an appendix of Judaism in effect at the moment. The Protestant churchs are even worse ,they start from oriental cultural premises such as iconoclasm and are even further from Western culture to being with. Christianity has jettisoned Jesus for Trotsky.

The prevalent fallacies and superstitions of the age have been absorbed because they hold more faith and can be used to induce more profitable guilt than the traditional beliefs.

Christianity is a shadow of what it was at its peak in the time of Pope Julius the second. It is being sucked back into Judaism and returning to the evil primitive cult that murdered the Mathematician Hypatia by skinning her with Oyster shells.

In the pagan system of values ,which is indigeous to Europe, dishonour is forever and every second is last judgement. Whatever about a soul ,you do have a reputation and you are damning that forever.

Men once would do anything for honour and glory . Now these are going cheaper than ever but their are few men to take them.

To build science in the West in its present occupied state is to help the occupiers and to dig the graves of your children and grandchildren. Do you think so little of them? You cowardly dogs! You work against your own people, against your own flesh and blood and for what? What have you really got?

I am sure that although you have more material possesions than I that I receive a better welcome from the female students when I arrive at some college party.

I get a lot more respect than you do.

I get more hatred too but that is a form of respect , whereas your life and death are not really noticed.

Plenty have told me that they agree with me and would join me if I could give them some kind of decent lifestyle. One of the reasons I can't do that is because of you vile cowards. The Jews and the deviants would all fade away if a few more of you would overcome your chronic fear .I fear your cowardice more than their malice .

Evil hypocrites who dare to call themselves academics while flying in the face of every principle of Plato and every ethic of Aristotle.

Many of you are not vile people but you support a vile system. I went to one birthday party at the English faculty of one Irish university and nearly all the postgraduates were lesbians.

The Science people should cease to support the university when the arts faculty is

attacking everything that created science in the first place.

There are plenty of Websites . You should be informing yourselves and learning .

[www.heretical.com](http://www.heretical.com) is a good one for example.

[www.exterminationist.com](http://www.exterminationist.com) is my own.

[www.geocities.com/reocork](http://www.geocities.com/reocork) another.

It does not bother me in the slightest that many of the people I knew refuse to talk to me out of fear of being subject to reprisals by the Jews, queers or other degenerates plaguing our society. I can do without the company of slavish dogs.

Everyone senses there is something wrong, most can't explain what .There is a growing moral nihilism. Parents live in fear for the few children they manage to have after being excessively taxed to pay for the implantation of foreign colonists.

Is it any wonder that society is going mad ,that kids can't walk the streets in safety ,when those who claim to be the pillars of the society openly teach lies ?

We need people who have cushy jobs in universities to help anonymously.

Personally I have complete contempt for these academics who live off the work of the great minds of the West while stabbing that civilisation in the back in its hour of need. Those who have jobs and sympathise can write articles anonymously and donate money to active dissidents. Using paypal, money can be donated to [Reocork@yahoo.co.uk](mailto:Reocork@yahoo.co.uk) ,bank account details on demand.

I am working on many projects but progress is crippled due to a total lack of resources.

Even setting up a simple bookshop in Ireland is difficult and my friends in Britain are hassled by the police. Cowards in Ireland have little excuse. I am ashamed of the cowardice shown in the face of the PC revolution of the last few years.

There is no amount of translation and digitisation work that needs doing . We have very powerful films that need only to be distributed en masse to have a big effect ,although given the bovine nature of the creatures on Irish campuses on wonders even then.

We need funds to set up servers in places like Russia to mirror dissident websites.

Here is one example of many of the type of thing that needs talking about.

"It is quite plausible that explosives were pre-planted in all three (WTC) buildings," BYU physics professor Steven E. Jones says.

Jones, who conducts research in fusion and solar energy at BYU, is calling for an independent, international scientific investigation "guided not by politicized notions and constraints but rather by observations and calculations.

"It is quite plausible that explosives were pre-planted in all three buildings and set off after the two plane crashes — which were actually a diversion tactic," he writes. "Muslims are (probably) not to blame for bringing down the WTC buildings after all," Jones writes.

As for speculation about who might have planted the explosives, Jones said, "I don't usually go there. There's no point in doing that until we do the scientific investigation."

## 911PHY

Previous investigations, including those of FEMA, the 9/11 Commission and NIST (the National Institutes of Standards and Technology), ignore the physics and chemistry of what happened on Sept. 11, 2001, to the Twin Towers and the 47-story building known as WTC 7, he says. The official explanation — that fires caused structural damage that caused the buildings to collapse — can't be backed up by either testing or history, he says.

Jones acknowledges that there have been “junk science” conspiracy theories about what happened on 9/11, but “the explosive demolition hypothesis better satisfies tests of repeatability and parsimony and therefore is not ‘junk science.’ ”

In a 9,000-word article that Jones says will be published in the book “The Hidden History of 9/11,” by Elsevier, Jones offers these arguments:

- The three buildings collapsed nearly symmetrically, falling down into their footprints, a phenomenon associated with “controlled demolition” — and even then it's very difficult, he says. “Why would terrorists undertake straight-down collapses of WTC-7 and the Towers when ‘toppling over’ falls would require much less work and would do much more damage in downtown Manhattan?” Jones asks. “And where would they obtain the necessary skills and access to the buildings for a symmetrical implosion anyway? The ‘symmetry data’ emphasized here, along with other data, provide strong evidence for an ‘inside’ job.”

- No steel-frame building, before or after the WTC buildings, has ever collapsed due to fire. But explosives can effectively sever steel columns, he says.

- WTC 7, which was not hit by hijacked planes, collapsed in 6.6 seconds, just .6 of a second longer than it would take an object dropped from the roof to hit the ground. “Where is the delay that must be expected due to conservation of momentum, one of the foundational laws of physics?” he asks. “That is, as upper-falling floors strike lower floors — and intact steel support columns — the fall must be significantly impeded by the impacted mass. . . . How do the upper floors fall so quickly, then, and still conserve momentum in the collapsing buildings?” The paradox, he says, “is easily resolved by the explosive demolition hypothesis, whereby explosives quickly removed lower-floor material, including steel support columns, and allow near free-fall-speed collapses.” These observations were not analyzed by FEMA, NIST nor the 9/11 Commission, he says.

- With non-explosive-caused collapse there would typically be a piling up of shattering concrete. But most of the material in the towers was converted to flour-like powder while the buildings were falling, he says. “How can we understand this strange behavior, without explosives? Remarkable, amazing — and demanding scrutiny since the U.S. government-funded reports failed to analyze this phenomenon.”

- Horizontal puffs of smoke, known as squibs, were observed proceeding up the side the building, a phenomenon common when pre-positioned explosives are used to demolish buildings, he says.

- Steel supports were “partly evaporated,” but it would require temperatures near 5,000 degrees Fahrenheit to evaporate steel — and neither office materials nor diesel fuel can generate temperatures that hot. Fires caused by jet fuel from the hijacked planes lasted at most a few minutes, and office material fires would burn out within about 20 minutes in any given location, he says.

- Molten metal found in the debris of the World Trade Center may have been the result of a high-temperature reaction of a commonly used explosive such as thermite, he says. Buildings not felled by explosives “have insufficient directed energy to result in melting of

## 911PHY

large quantities of metal," Jones says.

- Multiple loud explosions in rapid sequence were reported by numerous observers in and near the towers, and these explosions occurred far below the region where the planes struck, he says.

Jones says he became interested in the physics of the WTC collapse after attending a talk last spring given by a woman who had had a near-death experience. The woman mentioned in passing that "if you think the World Trade Center buildings came down just due to fire, you have a lot of surprises ahead of you," Jones remembers, at which point "everyone around me started applauding."

Following several months of study, he presented his findings at a talk at BYU in September.

Jones says he would like the government to release 6,899 photographs and 6,977 segments of video footage for "independent scrutiny." He would also like to analyze a small sample of the molten metal found at Ground Zero.
