

## Courier du Continent No. 518

24 heures 1.12.09 : " Silvio Berlusconi went yesterday to Belarus for some 15 hours. It is the first visit of a Western head of government to that country, long considered the "last dictatorship of Europe" . During a brief meeting, the Italian government's head brought his support to President Alexander Loukachenko, and signed an economic partnership treaty with him." (Berlusconi disobeyed the globalist lobby in general and the White House in particular, who use words like "democracy" to convince people that they have a say and to arrogate themselves the right to interfere anywhere in the world. Only ,that lobby is weakening and falling apart. Berlusconi could have some trouble....)

NZZ 14.1.10 ITALY – Shortage of places in prisons due to rampant criminality. "According to government plans , the total capacity of Italian prisons must increase from 43 000 to 80 000. The increase does not follow the number of inmates which stands now at 65 000. (...) As a remedy, the government has decided to reduce the time petty criminals are locked up. Those below one year sentence will serve that sentence under house arrest. On top of this the Minister of Justice Alfano will try his best to have the sentences of foreigners served in their own countries. ( Will it be one day simpler to put honest people in prison to protect them from freed criminals?

LE NOUVELLISTE 18.1.10 : Ukraine voted. The pro-Russian candidate is ahead on the first round. " Yanukovich 31,5, Timoshenko 27,2% . ( the Orange revolution supported by Washington is buried. Another sign of the decline of the former superpower.)

SWITZERLAND. – Sign of a political seism? The success of the initiative against new minarets reveals a grave discontent which is aiming at buildings instead of alien immigration. The UDC launches an initiative to allow families to deduct from their taxes, the cost of caring for children, including those who are caring for their own. (until then only families using crèches could deduct . An unjustifiable inequality.)

RECHT + FREIHEIT – Dr Hans Birsfelden (Austrian) addressed himself to the Swiss people: " If now you accept that a decision of the Swiss people will not be executed or that it becomes attenuated or even annihilated by ulterior initiative of a controversial character, then it is finish with Switzerland! " – and Dr. Rigolf Henning concerning those minarets;" The popular vote was a very grave knock for the present political system which, as it showed , was totally surprised. (...) The interdiction of minarets represents only the tip of the iceberg, which is a deep fear of alien submersion in our country. Switzerland shares that fear with its neighbours. The fault is not the aliens – which are only one effect– but those who allowed those foreigners to come and settle in the country." (here is the crux of the matter.)

20 Minutes 2.2.10 – : " My greatest dream, as long as I am a political figure, is to make Israel a member of the European Union", so said Berlusconi to Israeli Prime Minister Netanyahu." (Let us remember that Berlusconi was recently the victim of an assault from a madman–or one with a mission– who threw a model of Milano's Dome in his face. Was it a warning ? And did Berlusconi get the message?...)

TERRE ET PEUPLE – Pierre Vial: " There is in France three categories of people. The first one is made of foreign people, of Non-European origin (Europeans are not for us foreigners) (...) Those persons must be designated for what they are : Invaders. The second category is constituted of persons of European origin but who have no respect for those origins, are willingly betraying them, taking the party, systematically and permanently of the invaders. These are collaborators, traitors and renegades. The third category is constituted of persons of European origin, attached to their roots and who want to keep those at any price, even if they have to fight for them, even physically if necessary. Their political or religious outlook is of no importance. What counts is the blood flowing in their veins, the conviction that they are in their soul and mind, this bio-cultural inheritance which they want to give their children and the children of those children." (Remarkably stated!)

NZZ 27.1.10 : " The Italian minister of the Interior Maroni has announced on Tuesday, in the textile town of Prato, an intensified fight against illegal Chinese workers." Protestation of Florence's Chinese consul

who is talking of SS measures. " From his side Mayor Ceni complains about the intolerable working conditions in Chinese enterprises; he sees in them a modern form of slavery." (at least a bit of backbone!)

LE NATIONAL RADICAL No 14 uses 14 columns to show "how the banks create money out of nothing". The few lines at our disposal are not sufficient to give a resume of that text, but let us remember that the banks, with the system of "fractional reserve" lend more money than they have and charge a real interest on partially fictive amounts. ( a modernisation of the straw lizard of Moliere) . The problem shows up when, following a panic, all the depositors are pulling their funds out. The bank can borrow the missing funds. But if the panic is general, the banks go belly up one after the other, which happened many times before. The "National Radical" concludes with reason: " As long as our society depends on bank credit for its monetary needs, the bankers will carry on deciding who gets money or not, and will be , or will remain the masters of the world. (...) Today, they are still lying to us, what we call democracy and freedom are in reality only an insidious and invisible form of economic dictatorship."

RIVAROL 8.1.10 – Jerome Bourbon is hitting the target: " Every time the media pretend to organise a great debate , whatever the subject, it is always a dialogue between people who think the same thing and who alone have the right to think. Whether we talk about immigration, race, abortion, one parent family, priest marriage, ordination of women, etc. only one point of view is authorised. The other has no standing rights , except maybe if it is demonised. " 15.1. 10 , J.B. denounced forced mongrelisation. " Jean Marie Le Pen has denounced in clear terms the phenomenon of submersion of our country and the deliberate policies of substitution of population: " ...This massive irruption has colonised social housing and the health budget to the detriment of French citizen of modest incomes, it has barbarised the school system." 29.1.10 Jean Marie Le Pen in Toulon: " Massive immigration is the gravest historical phenomenon which France ever had to face, graver than the great invasions, wars, epidemics and famines."

NZZ 29.1.10 The Italian government intensifies the fight against the Mafia. (...) Thanks to its dominant role in the European traffic of cocaine , the Calabrian Mafia has become the greatest European criminal syndicate in Europe. " On top of this , Prime Minister Berlusconi announced more severe measures against illegal immigration and moonlighting labour. ( Quite a programme!)

MILITANT 615 – Bruno Viala quotes an Israeli extremist: " And if they consider me as racist because I do not want to mix with non-Jews, so, I will accept it" . And to conclude, " French nationalist, I hope, will meditate on the activism of our people which does not want to mix with non-Europeans". ("Quite right!)

IL POPOLO D'ITALIA 1/2010 Gigi Bellazi: " In Nuremberg, the judges were chosen by the victorious powers, documentation produced by the victors proves it. Contrary proofs were not accepted. In reality the lie of the holocaust is the Nessus ' mantle imposed on Europe to prevent it from being reborn from the ashes of defeat. (...) At the time when Berlusconi is showing rapprochement with Putin, breaking the US monopoly on energy (we always been forced to pay oil in dollars) , we can understand the true reason of the media's ire on the imaginary peril of anti-semitism."

NZZ 11.2.10 : Victor Yanukovich has won the presidential election in Ukraine with an increased majority of 3,5 % total 49% against 45,5% for Timochenko, who is contesting the results.

LE MATIN 7.2.10: The Walliser Oskar Freysinger, UDC deputy, has received two letters from Brigitte Bardot "where she declares her admiration for the "destroyer" of minarets" . " The subject of minarets wakes up the old lady(...). She writes: " In spite of the decadence of our sad époque, I wish you a year full of new developments, as you know how to provoke them. A year 2010 in your image! Love. Brigitte Bardot."

AUSCHWITZ –FATHER XMAS 2009 IS A PIECE OF TRASH AND A THIEF (tongue in cheek)

Thefts of great importance already happened at the camp: "the gaz chambers", for example, were for sure already stolen, that quite a while ago, and the authorities of the camp decided to substitute them with some anomalous concoctions: Therefore in Auschwitz-I , when they are told that they were forced to rebuild a room which was used as "gas chambers" ; wise people showed their astonishment due to the fact that these substitutions, in no way, could be suitable for mass extermination.

To their pointed questions, Mrs. Oleska, then responsible for the Auschwitz Museum, replied coldly in 1995 : " I know... We haven't got time... We will see later..." . Personally, hearing such a reply, I am asking myself seriously if the museum authorities are not responsible for the theft of the missing "gas chamber" of Auschwitz-I?

#### SWITZERLAND AND THE MINARETS

On 29.11.09, the voters accepted an initiative forbidding the building of minarets (there are already 4 of them). That by 57,5% of votes and in spite of all polls. The vote surprised the Swiss and even foreign political elite.

RUSSIA – bocage a club-internet.fr: " The Russian president Dimitri Medvedev will not participate in the ceremonies marking the 65<sup>th</sup> Ann. of the liberation by the Red Army of the Auschwitz-Birkenau Nazi camp. (All is not well between Warsaw and Moscow.)

IRAN – LE NOUVELLISTE. 13.1.10 – Nuclear scientist assassinated in front of his house in Teheran . NZZ 13.1.10 : " the regime accuses Israel and the US for the murder." (it must be remembered that the entire intelligentsia of Iraq , some 400, was assassinated) LE FIGARO 5.2.10 Beijing refused to sanction Teheran. LE NOUVELLISTE 8.2.10 – The Iranian government orders the production of 20% enriched uranium. Western countries are worried. NZZ 13.2.10 While Khamenei thanks the population for having participated in the celebration of the Revolution, the opposition is disappointed. " It is however evident that the Iranian opposition does dispose neither of a organised direction nor of a charismatic leader."

AFFAIR WILLIAMSON. – duralex a gmail.com: " An AFP dispatch announces that the court case of Bishop Williamson will take place on 16 April in Germany." This for statements made on Swedish TV on 21.1.09. "The Ratisbon Court offered to settle the matter in a simplified way by way of a fine of Euro 12 000.– which would have closed the case. Mgr Williamson, contesting the accusation , has refused to pay: ( this proposition to bury the case probably incited Williamson to throw himself in the wolf's mouth, even going in side ways.)

AFFAIR GARZON. – NZZ 17.2.10 – The most famous Spanish judge is threatened of destitution. He is reproached of abuse of power.". Notably for having opened a case against Franco in 2008." Three ultra-conservative organisations laid a charge against Garzon. The Supreme Court admitted it and reproached Garzon for having acted beyond his mandate, by not taking into consideration Amnesty laws.

#### WHAT IS A MULTIPOLAR WORLD BRINGING US?

The Swiss vote against minarets resounded around the world, but especially in Europe. A disorientated press is lost in conjectures , ignoring or pretending to ignore the evidence: the vote was aiming at minarets by default, unable to ask for the repatriation of African and Asians to there continents of origin. The European "identity" milieus did not make that mistake; they greeted a Swiss vote which the "democracies" of the EU would never have allowed.

A similar thought pattern explains the importance of geo-politicians who, like Aymeric Chauprade, take into account all the historical factors, notably the "identities", meaning race. Their predictions allows for a premonition of coming events and thus, can give precious information to governments. While the geo-politician is occupied with the probable, those responsible for a people must consider the improbable, even the worst.

Those elements are suddenly making a lot of sense. The globalist lobby is declining; if it is still dominating the "democratic" regimes, its days are numbered. A crisis, financial first, then general, hit the US already stuck in the Middle East quagmire; and unemployment is reaching alarming levels. Socialist parties, social democrats and those of the same hue are losing electoral support. Supranational industrialist are still building stocks but sales are dropping. Banks are beginning to tumble, unless the US refloats them . This will weaken the power of government and prevent it from repairing the infrastructure of the country in a sorry state.

This multi-polar world, imminent, comports, beside new possibilities, the worst dangers, Let us remember 1914 and the Sarajevo assassination. Today the planet is seeded with similar detonators. Let us consider an Israeli bomb on Tehran. Russia bound by the Caspian littoral countries pact, will rescue Iran. The US

could enter the furnace of a third world war. And China will just wait the hour for a final intervention which will assure her hegemony.
