

4 FEB 05. Hail D.R.! It was great to receive your letter & enclosure of 1 FEB. Time seems to fly with the events reported in the jewsmedia. Maybe FEDZOGUSA is reading my stuff, for I recently predicted a possible 'pre-emptive' attack on Iran & Syria on behalf of Israel, with none of the media build-up prior to the Iraq attack by ZOG. Now the Black Bushy-backer, Rice, is making bellicose statements, as if war with Iran is inevitable. Stay tuned!

Yes, all the jewsmedia prattle, ad nauseam, of "freedom" & "democracy" are mind-numbing, but they fail to conceal all the blood being spilled for quite different objectives. Can the Goyim catch on? So far, it seems they would rather die than think.

Don't we live in a cozy, Orwellian, "1984"-style world? Our Surveillance Society is much more ubiquitous than the TV cameras of "1984". Even here in downtown-ghost town Yakima, we are under the gaze of TV cameras at intersections, near public buildings, in stores & residences nearly all the time, so we might as well assume we are on camera all the time. Somehow, I do not feel like a movie star, but an extra in some dreary, endless soap opera: "The Dumb & the Listless."

You know how the movie monsters of the 1920s & 1930s became so familiar that they are now on par with cuddly teddy bears for kids. I wonder if "1984" will undergo the same sea-change from horrid fiction into warm-fuzzy nostalgia. Maybe Big Brother will become a supervisory Santa Claus figure. Ho, ho, ho! Had your hate today? We need it to keep Goldstein away! I hear that areas saturated with surveillance cameras have spoiled the gang-banger scene in such places as Chicago, according to NPR jewsradio. The cameras at intersections may have reduced the number of routine red light runners in downtown DC, so some good can come, even from Big Brother! Meanwhile, the Orwellian abuse of language continues, the better to confuse us with.

The state of contemporary judeo-capitalism leaves much to be desired by the workers. Yes, employers want steady workers, at the very time the employers are fly-by-night & apt to disappear at short notice, as my last employer did, en route to India. Since then I have prospered greatly in real wealth, for my food & housing are subsidized by the tax-payers, & my Social Security pittance allows me to buy typewriter ribbons & postage. I've never had it so good! I enjoy my free time in this period of unplanned retirement. Sometimes I pinch myself to see if I'm dreaming. My health is also great, so there goes my expectation of working until I dropped. I don't regret that, either. Remember, time is on your side, unless the ZOG drowns us in its jew I.O.U.s. If the Bush regime can do to Social Security what it did to Medicare, there will be no advantage in youth or age. Such a deal! Maybe we'll all have to enlist in the ZOG's military forces. Restoration of the draft appears more likely as the conflict with Iran looms on the horizon.

The War Nerd's analysis of military developments assumes that none of the "great powers" will self-destruct from internal weakness &/or conflicts. The U.S.A., however, appears to be disintegrating in ways similar to my description in "The Chosen One". A recent jewspaper article reported on the targetting of U.S. DEA & FBI agents by Mexican narco-terrorists comprised of former Mexican Army veterans, who will capture & otherwise combat the zoglings on both sides of the border. The article referred to these forces as "Zetas" or "Zs", similar to the U.S. "Delta" force. This is not the first time that special ops & narco-terrorism have been combined. Most of the time it's been 'our side' that did it, but we may lose our monopoly of such enterprises. We really don't know who is coming across our borders, nor what their intentions may be, nor what they're packing. War Nerd mentioned offhand that open borders would allow the entry of nukes on pickup trucks. Such delivery systems are far more practical than missile-borne nukes, so we need not worry much about "Star Wars" scenarios. Don't watch the sky, watch the street! One thing in Yakima's favor is that we'd be a waste of a nuke. When Haiti was O.D.ing on its nasty niggers, someone suggested nuking the island, but that idea was dumped when the GAO concluded that it would only do \$37.50 worth of damage. Ha! Indeed, this looks as if it will be The Chinese Century, thanks in large part to the ZOG's anti-White policies. Just consider the likely results in a U.S.-China conflict if U.S. microchips, computers & war machines are made of Chinese components. The clever Chinese could program 'our' weapons to self-destruct upon deployment.

Of course, the basic question is how high-tech weapons can deal with massive immigration-invasions & massive demographic changes within the territory of the U.S.A., whose people have no desire nor ability to defend their living space. All the weaponry in the world cannot save people who cannot or will not use it. The solution lies not in the quality & quantity of our war materiel, but in the quality of our minds. The enemy is already within, & we are already conquered, whether we know it or not. Our job now is to fight for our freedom, as well as our existence. DOWNZ! & ORION! E.T.
