

20 MAR 05. Dear Phil: Happy Spring Sunstead! Many thanks for your letter of MAR 18<sup>th</sup> & the great enclosures. More China news on NPR jewsradio today: China's oil-consumption is said to be second to that of the U.S.A., & China wants MORE! As we know, oil & water don't mix, but oil & politics are inseparable, so we may expect to see a growing rivalry between China & the U.S.A. in key oil supply areas, which the U.S.A. is most likely to lose. China is using its otherwise worthless zogbucks to buy up companies, properties, products & people via influence. China can easily outbid the U.S.A. when it comes to inflated zogbucks, because China also has manufactured goods to back them up, & we do not. It is clear that the jews are supporting China, so their pullout from the U.S.A. looks more likely, as well as their support for the euro. Stay tuned! It's easy to predict the jews' behavior, which has not varied since they bragged of their infiltration & despoliation of biblical Egypt. Jews always strive to hurt their host peoples via parasitism, well beyond mere profit, for they hate their hosts & eternally wish to destroy them. Enslavement is not enough for them, for they must always rot & ruin those who have aided them most. This is history, & we are fools not to have learned it. Every host thinks that 'this time it will be different, for the jews have changed; at least they say so.' Oh yeah. Jews remain jews & suckers never learn.

In regard to the latest 'news' on Hitler's private life with Eva Braun, we can start taking this latest account with the usual amount of salt. A certain Mr. Eberle opined that Stalin would have killed Hitler or that Hitler would have killed Stalin, were either captured by the other. Already we have the first jew-lie, since Hitler declared in his table talks that he admired Stalin as a leader, & that he would place Stalin under house arrest -- in a palace. Thanks for the download from Montana. It sounds as if Mr. Ochenski, its author, has seen the movie, "Civil War II", if I recall the title correctly. On today's jewsradio, former guru of the U.S. State Dept, George Kennan, who died recently, was interviewed. He mentioned how the U.S.A. was under the domination of a "special interest group" whose goals were NOT in the interests of the U.S.A. Gee, I wonder who those people would be. Bush & Co. are doing the bidding of "that group" right now, but he is simply carrying on a kosher policy which has ruled The District of Corruption for 300 years, beginning in colonial times, so what else is new? The U.S. will be undone in due course, but will it be a sudden coming unglued, or a Roman-style unravelling of its social, political & economic fabric? No doubt, we shall see, & it will be exciting, for we will not be spectators only, but participants. Such a deal! The custom for the Montana Legislature to pass non-binding resolutions approving or disapproving of federal laws is a new one on me. It sounds like an 'official' public opinion poll. What effect that will have on the ZOG is moot, but what the public DOES will be decisive.

Many thanks, as always, for your great selection of important news items. Is there any chance for 'summer skiing' out your way? One can use sand dunes, grassy slopes, or used crankcase oil & used cooking fats, as portrayed in Mad Magazine's "Wild World of Sports". If the drought conditions persist, there may also be a demand for "Sportscar Minefield Racing". As good capitalists say, "When you get a lemon, you make lemonade, & when you <sup>get</sup> drought, you'd better get out!" All the best. DOWZ! & ORION!

Eric
