

17 MAY 05. Dear Harold: Many thanks for the treasure trove of great books. I shall enjoy reading them, once I dig out from under my pile of correspondence. Also, many thanks for the great depiction of A.H.! I got your "100 men" newsletter. As you say, it is hard to overcome White inertia. Well, when we consider history, none of my ancestors, to my knowledge ever did ANYTHING for Our Race. They just struggled & worked on behalf of material gain. The fact that they had White children (among others) just meant that White women were prevalent in the places where they lived. With such founding values as these, the U.S.A. was settled & populated. As we know, the principles of our Freemasonic Constitution were merely 'prole-feed' intended to dupe the dummies, from the very beginning. The use of The Pill & the abortionists prove that Whites had children, mainly because they could not prevent them. We really had no love for Our Race in the past. Any White racial solidarity occurred by default, when non-Whites were trying to kill us off. History proves that we are just as happy killing Whites as we are to kill non-Whites. Our ancestors took White society & civilization for granted. They may have believed that they could "do their thing" in any non-White society such as Beethoven in a kaffir kraal. My experience in non-White societies taught me that we cannot enjoy a White experience without a White society. As Adolf Hitler said: "The state is the vessel which protects the race & the race is the vessel which protects the individual." Whites in America don't understand this truth. Moreover, they think that Afro-Asian values are preferable to the Aryan values they never knew, & apparently do not want to know. Whites seem content to disappear along with their racial values. When there is no love for Our Race, its extinction is deemed to be no loss. It thus appears that White survival would be by default, rather than by design, since we readily participate in our enemies' designs for our extinction. We see how their numbers increase as ours decrease, & 99.99% of us don't care. As we saw in Rhodesia, White geezers expect to die before The Mud Deluge, so they behave as heedless hedonists who admit that the future is for the young to suffer, not them! Boy, were those White geezers surprised to find themselves very much alive, under Black Marxist misrule! There is justice, after all. As I wrote decades ago, I do not love Whites as they are, but as I know they can become. Before the deed must come the wish to survive as Whites. We have been among the very few who have attempted to instill that wish, like parents who want their children to live & to thrive, rather than the opposite. Yet, we see parents whose offspring reject their good advice & who prefer to destroy themselves with drugs & dysfunctional behavior. Youthful rebellion need not be destructive, as it so often is, but how can we explain this behavior in adult Whites? (Or at least those who are chronologically adults.) The Internet does have revolutionary potential, with its ability to transmit information so rapidly & so widely, but the question remains: Will Whites heed the information on behalf of their own survival? Stay tuned! All the best. 88! & ORION!
