

21 MAY 05. Dear Günter! It was a pleasant surprise to receive your letter of May 16<sup>th</sup> & the great enclosures, especially Claude's outstanding efforts which I have photocopied for maximum circulation. His overviews on the Holohoax are excellent. I'll ask Honsik if he knows anyone interested in subscribing to "Der Südafrika-Deutsche". Claude's description of "Orania", S.A., where Whites are feuding among themselves, along with their churches, under Black government sounds like a prelude to Harold Covington's Great White Hopeland here in northwestern U.S.A. Dumb people in the U.S.A. do not seem to understand how close the northwestern U.S.A. is to southwestern Canada, alias "China-duh", with its huge & growing Chinese population. It is no wonder that Whites who do not value National Socialism would form dysfunctional communities. This is why White Nationalism must have an ideological basis, not mere physical proximity.

Naturally, I have been using the tactics you suggested, for many years, for I always speak in terms of my listeners' interests, regardless of their race. Whites are most difficult to talk to, because they do not know their own best interests, but behave as ZOG-zombies. Blacks always get my anti-Zionist message, but most Whites do not. Even if I prove to them that the Holohoax is just that, a hoax, & that Israel has attacked the U.S. from The Lavon Affair, The USS Liberty & 9-11, they still 'love' Israel & jews!

I received the latest issue of The Barnes Review with its praise of Putin, The Zud & Yockey. Putin is on record as supporting the Holohoax. As we know, The Zud exists only for The Zud. Wishful-thinkers think Putin is something he is not, that The Zud is something he is not & that Yockey's crazy ideas about "race" are correct. Race is NOT political ideology, but biology. White man's science has advanced our knowledge about the differences of race in terms of light years, with DNA research, which is not fictional, but forensically accurate. Yes, Whites do disagree about what policies to follow, but just because a Black agrees with me does not make him "White". Many Blacks prefer White women, for example, but a set of White or European preferences does not make one a White nor a European. Yockey's mixed up, primitive & erroneous ideas about "race" disqualify him from using that term at all. Yockey also erred in failing to recognize that the USA-USSR were two branches of the same business. As I told Manfred Roeder, another wishful-thinker, being an "Ostler" or "Westler" meant that you were merely choosing the left or right hand of the ZOG's bankster regime. There was no serious conflict nor rivalry between either hand. That's what I had to discover the hard way. Why is it that former rulers of Khazar-ruled Russia always seem to retire in California? Kerensky & Gorbachev come to mind. Dr. Oliver agreed that the "Cold War" was an Orwellian hoax inflicted on the ruled by their Zionist/Communist rulers. I asked him what was the fundamental difference between the CIA & the KGB. Dr. Oliver made a wry smile & said, "The CIA drink coffee during their breaks & the KGB drink tea. Otherwise they work for the same people." Obviously, Yockey did not know that. I say that an Anti-Zionist Alliance could be made some day between a White Europe & Eurasian peoples of the former Soviet Empire, but that's what it would have to be: an alliance, NOT a nation. A nation is a subgroup of A RACE. There can be no "nation" which is multi-racial in the true, biological sense, contrary to all wishful-thinkers. Eurasians are not White & mules are not horses. Sorry!

It was indeed a disaster that World War II Germany did not dump the Zionists in favor of an Anti-Zionist & Anti-Communist Alliance with the oppressed peoples of the Soviet Empire. They would have known what to do with their Jewish oppressors, if the Germans had let them. Germany was hobbled by its former allies, the Zionists & Italy. It was German loyalty to these interests, rather than German interests, which cost Germany the war, not just Hitler's unrequited love for Britain. The peoples of the USSR greeted the Germans at first as liberators, not as invaders. Had that relationship been reinforced by the Germans, the Reds might well have been defeated. Non-Aryan allies are better than non-Aryan enemies, & Germany surely needed allies to defeat Stalin's huge forces. Was German policy based on arrogance? And was the arrogance based on sabotage on the part of those wishing for Germany's defeat? Japan was really not an ally of Germany, as it proved by its pacifism in relation to the USSR, which allowed the Reds to shift their forces from east to west, thus overwhelming the outnumbered Germans. The traitor, Sorge, in Germany's Japanese embassy, betrayed Japan's intentions to Stalin early enough for Germany to know that it would face huge enemy forces. Surely, such knowledge would relate to German policies in the recently-liberated areas of Red Russia, but did traitors purposely ignore this information in favor of sabotaging German relations with peoples of the USSR? Maybe Germany planned to beat the Soviet forces to Moscow, but Halder held up the German advance for a crucial & probably fatal TWO WEEKS at Smolensk. Was this treason or incompetence? Hitler was furious about Halder's action, in any case, but it was too late.

AN Anti-Zionist Alliance must be forged by all people who wish to combat globalism under Jew banksters. Unless we co-operate on this issue, we may miss our chance for ORION! But remember: an ally is not the same as a member of one's nation, just as a friend is not usually a member of one's family. We must keep our definitions straight if we are to keep our policies & our actions effective, in terms of our own true interests. On the other hand, if we wish to 'convert' Afro-Eurasians into 'Europeans' in the style of the Eurasian mongrel, Coudenhove-Kalergi, then we will be doing the work of our enemies, & not of ORION! The choice is simple, but it is not easy, and why would we think that a cosmic struggle for racial survival should be easy? Defeat is easy, & with it, extinction, but why not choose to struggle heroically, so we may become a race of heroes? There is joy in struggle, & where there is joy, there is strength. Therefore, let us all be joyful! Strength through Joy: Remember.

We are living in revolutionary times, which mean that we are experiencing great political, economic & demographic changes within years, rather than decades or centuries. These changes are accelerating noticeably, but the masses of asses still do not recognize them as such, if we judge by their lack of response. Perhaps these changes must occur on a minute-to-minute basis for the sheeple & zombies of ZOG to wake up to the fact that it's too late for them to do anything about them. We shall see. Criminal empires tend to self-destruct because criminals are, by nature, greedy & irresponsible. A house built of dynamite shall not stand, & our rulers are playing with matches, as we sit & watch, like passive, indifferent, soulless spectators, who seem unable to show concern nor surprise when things go off. Revolutionary change demands revolutionary behavior, just as radical problems demand radical solutions. ORION! E.T.
