

2 JUNE 05. Hail David! Many thanks for your letter of May 28<sup>th</sup>. Thanks, also, for your brief biography, so I can get to know you. I, too, encountered people who believed in "British Israel", "Israel Identity" & "Christian Identity", which I found to be false. Apparently, the creed was originally a British propaganda ploy against the Germans, for one 'true-jew' showed me a "British Israel" book printed by Her Majesty's Printing Office, around the time of The Boer War. There was a "British Israel" clubhouse in Toronto, Canada, & the local jews made them remove the large brass plaque at the entrance to their building. Like the Freemasons, I noted the "Idiot Identity" crowd admitted Eurasians (non-Whites), just as non-Whites used to hang around Aryan Nations (Injun John Ross Taylor, a notorious ZOG-fink & the jew Braunhut), for example. Butler was the twin of a Sioux neighbor of mine in California, one Bill Irontail, so I wondered about Butler's biology. Eurasians (mestizos) are not Aryans. My God is in my blood & in my appreciation of Nature. Other gods did not belong to me, nor I to them, based on my feelings & my reason. When one knows himself, he finds his god, or his god finds him. It is simple, but often not easy to achieve. You raise a valid point in your discussion of the term, "nation", which is ZOG's doing. A nation is a people, not a place. Obviously, a nation needs a place in which to live. All nations have been nomadic at one time or another. My nation has long been one of seafarers from northern lands, so our attachment is largely to the sea from which we make our livings. As an individual, I can live, as I have, on any continent or island, for that matter, but our nation must have land of its own, so we can create a racial community, physically, as well as ideologically. The jew, Boas, imposed the concept of "nation" as country or place. Nationality is biological, not geographical. My letter to Brian refers. Yes, the U.S.A. is not a nation, but an empire, & its borders have become meaningless lines on maps, as biology inundates geography. As Tom Chittum wrote in his book, "Civil War Two", we must prepare ourselves, physically & psychologically, for the collapse of the U.S. empire, which behaves like decadent Rome & will thus go the way of decadent Rome. As you say, fools will immolate themselves, as they have already done, without accomplishing anything relevant to White Survival, & Judas Goat leaders will fool & fleece their flocks to the very end, as I saw in White-ruled Rhodesia, now Zimbabwe, before our handover to Black Marxist Misrule. I have also seen groups which were infiltrated by enemy agents, as well as groups FOUNDED by enemy agents, to which I have belonged. What this experience has taught me is that we must seek people of character, rather than bodies to increase the number of members. We must also view our activities & policies critically & with vigilance, at all times, so as to detect subversion & sabotage. Whenever I did so, I left, & I was proved correct by subsequent events. The 'movement' must begin with ourselves, for, as you point out, people of poor quality cannot create a movement of good quality, even if their leader is a Superman. Any change for the better must come within ourselves. To paraphrase JFK: We should not ask what the racial cause can give us, but instead, we should ask what we can give our racial cause. As you observe, "the movement" has attracted mainly enemies, crooks & dysfunctionals. This is because 'better' Whites have not seen a need for such a movement, & there is no guarantee that they will. I also agree that the 'paytriots' for profit live OFF

their touted cause by selling subscriptions & symbols, & I also agree that those who buy such things like to think they are 'activists', but they are really just consumers. What we are describing are really fantasy-lovers. I'm glad that you, too, distinguish political prisoners from petty offenders & just plain crooks, who happen to be White. Prison may teach them the need for White Solidarity, or it can lead them into degeneracy & further dysfunctional behavior. As I see it, there is only a 5-step program for the achievement of any goal. It starts with (1) The Idea; (2) The Information about The Idea; (3) The Organization based on The Idea; (4) The Action on behalf of The Idea, & (5) The Realization of The Idea. On this basis, we can readily understand why we have had such a lack of progress, for The Idea must be valid, that is, attractive to potential supporters, & it must be conveyed by a spokesman or leader who is also appealing to potential followers. In short, a successful movement must have a proper leader with proper ideas, like a good singer with a great song. Hitler & National Socialism was such a successful combination, as you mentioned, but we must also consider our present society in terms of its values & racial make up. Could Hitler succeed in today's America, even if he were to tailor his message to our present problems? It can be argued that a man who would be so different from the great majority of a people would not be able to address them in terms relevant to their degenerate, materialistic, selfish needs. Even the mythical Jesus, who was an alleged god, could not perform the real miracle, which would be to confer understanding upon his sheeple. All he could do was magic tricks, worthy of his alleged opponent, Satan. Sheeple are easily awed, but they achieve understanding only rarely, if ever, for without understanding, there can be no peace within ourselves. Only knowledge & reason can provide us with understanding.

Unless Whites become a nation in kind, as well as a nation in mind, we will lose the very land on which we presently stand, in North America & Europe. As Hitler said: "The state is the vessel which protects the race, & the race protects the individual." Obviously, our White Nation needs a place in which to live & a state to protect it. It is therefore folly for our people to seek to protect the ZOG empire which was anti-White from its very beginning, for by doing so, we help our racial enemies, as we destroy ourselves.

Dr. Goebbels said that an idea is best expressed in a slogan. That is why a true White Nationalist must focus his mind entirely on the concept of ORION! Without this guiding constellation, we shall continue to waste time & effort on befuddled priorities. I therefore hope I have indicated, at least to some extent, why we are in our present mess, & our best way out of it, if we choose to take it. Our struggle is our victory. All the best & ORION!

P.S.: Things we can do right now: Shun TV

& stay debt-free. Learn useful skills &

knowledge. Form White communities in our localities, for it is family, community & ideology that are a nation's building blocks. The only stumbling blocks barring our way are ourselves, so we must become steppingstones, facilitators of ORION!
