

4 JUNE 05. Dear Phil: Now that I have time, I can reply to your great letter of 1 June. A correspondent sent me a download from the "Kaminsky" website about the steady bombings in Iraq, many of which appear to be the work of the U.S. occupation "terrorists". Various ploys are mentioned, purportedly by Iraqis, in which U.S. ZOG-mercs halt Iraqis & plant bombs in their vehicles, as they ostensibly 'search' them. Suddenly, one becomes "a suicide-bomber" without knowing it. The purpose is to create Lebanon-style conditions of internecine warfare, as the jews did, following their invasion & trashing of Lebanon under Sharon's directions. When we ask "cui bono?" Neither Iraqis nor insurgents benefit from such bombings, least of all the bombings of Sunni or Shi-ite mosques. The Zionists want to see Sunnis battling Shi-ites, & some Moslems have seen through the jew-strategy in such bombings in Pakistan, for they blame them on the U.S. & Israel, rather than on their Moslem sects.

Yes, I've read "Green Mansions", which should be read back to back with "Green Hell". The former is a romantic version of the jungle & the latter is a hokey horror story about the jungle's "menace". Both versions & visions of "The Jungle" are poetic, rather than factual, as I have experienced. The Amazon Jungle & the River, which I saw for the first time at Leticia, Colombia, were as beautiful & impressive as I ever imagined them to be, a scene right out of National Geographic, with mosquitoes. Unfortunately, I did not encounter any beautiful Amazon women. I leave that discovery to Hollywood. I also read "Steppenwolf" & two other books by Herman Hesse: "Magister Luthi" & "Siddharta", if I recall correctly, & I think he also wrote "Journey to the East". Like Alan Watts, Hesse appears to interpret certain Eastern concepts from a Western standpoint. I see it as good mental exercise.

Congratulations on your study of edible plants & other survival skills! With the advent of Civil War II, such essential knowledge will reflect reality, as most of our abstract, commercial, consumerist activities vanish. I am aware of this possibility as I sit in my electricity-dependent apartment, where I type out my message to fellow Whites, with one ear attuned to sounds of racial strife, which will be my signal to prepare to abandon ship, although where I would go would be a mystery. Where I WOULD NOT GO is easier to answer, for Mexifornia & Southwestern states are not places for Whites to be, at least, not for long! I enjoy the places in Yakima where the Anglos have planted trees. It's notable that our increasing barrios of Mexican habitation soon become treeless, & front yards serve as parking lots, as well as sidewalks. Who says that culture is not derived from biology?

A recent report on jewsradio NPR revealed turf battles in South Los Angeles between Black & mestizo high school students. A mestizo reporter alleged that "this has nothing to do with race" (ha ha!), but with overcrowding, so Whitey had better fund more schools for more mestizos, ad infinitum. Now, that's a kosher message!

As in "They Live", it is interesting to debate a jew, without telling him what he is. I got into a discussion with a young kike on the subject of nationality, during which I 'happened' to mention that a jew is deemed a member of a nationality, that is, jewish, regardless of his country of birth, according to U.S. visa requirements. I said that this is true of non-jews, for "nation" is a people, not a place. The jew said that I was being "very selective" in my view, & would I argue that el presidente Bush is not an American? I said that there is an American continent, two in fact, but a continent is not a nationality, otherwise jews born in North or South America would be "Americans" instead of jews. For some reason the jew had to depart in haste. Maybe he knew that I "could see". Yes, "They Live". We sleep, consume & obey. At least most of us do. THE jew nightmare is that WE can spot them. Such fearful rulers they are! That's why I got much more response to certain propaganda efforts in the jewish community than I ever got from the Goy cattle. In Canada, I distributed thousands of fliers on one occasion. The only response was one letter of inquiry from one jew. After I distributed thousands of another flier, there was only one response: a letter of inquiry from the same jew! After learning this, I made sure to send, anonymously, ONE flier to a branch of the ADL. Boy, you should have seen the flapping, wailing & gnashing of teeth in the jewsmedia! I guess I know my Goy cattle better than the kikes do, since they FEARED that the message had gone to the Goyim. Actually, the jewsmedia had done a much better job than I could have done, even if I'd given a flier to every Gentile slug in Canada! Now, that's how we can use the jews' money against them, as long as we do not let them know what's up. In regard to a kosher flier I distributed, it got wide publicity after a jew-loving Goy showed the ADL a copy. Only then did the hebes denounce the flier, but it got much more publicity than it would have, even if 10,000 Goyim had received them. It's good to know our own strengths & our weaknesses, so we can save lots of time, money & effort. The Internet has come, just in time, for us to see if there are any 'live' Gentiles in existence. All the best. DONZ! & ORION!

*Ed*
