

12 June 05. Dear Phil: Thanks for your great letter of June 8<sup>th</sup>! I would enjoy reading The Idaho Observer's take on "They Live", for the aliens' behavior, if not their appearance, is definitely jew-like, compared to that of all other races. I recall reading a horror story entitled "The Yellow Wallpaper" decades ago, which may have been written by the author you mentioned. I don't read fiction, as a matter of taste, for I am more interested in politics, economics & demography. I know who done it, but I want to find out what they are doing & how. It's notable that so many writers, particularly females, had such unhappy lives. Our fellow Whites must recapture Whites' imaginations from the jew distorters & cultural highjackers, for CJ Jung properly evaluated The Aryan Imagination as the source of our creativity. As Mark Twain advised: "Dream better dreams." I have a large gap in my reading, from the authors & titles you mentioned. No, I've never read Gurdjieff nor Ouspensky, nor have I heard of them.

I seem to recall Dr. Oliver's evaluation of reincarnation, which he said "could not be disproven." Other concepts are disproven by their inconsistencies, such as "free will" with an omniscient deity. Jung referred to racial memory, as does The Bhagavad Gita, which warns that racemixing causes "the loss of memory", hence, "the loss of understanding" & "from this, all evil." Could "racial memory" indicate reincarnation? It seems possible, as I hint in my short story, "Return to Spring Island". I think it appears on the FAEM.com. website, as well as "The Awakening". Let me know if you can find them, & if you enjoyed reading them.

Tropical forests or jungles do smell differently from pine, fir & hardwood forests. Sometimes there is an overwhelming scent of vanilla plants, combined with decaying vegetation, & the air is rich in oxygen. With so much to see in terms of plants, animals, birds & insects, one's sense of smell is often neglected. I recall a vivid impression of a train trip from Cali to Bogotá, during which we climbed up the central plateau by means of switchbacks. I was privileged to ride on the rear platform, with the conductor, as we reversed. All one could see was a tunnel of jungle foliage, through which the sunlight cast a warm glow, illuminating brilliant macaws, orchids & other flowers. The only signs of man were the two shiny strips of steel railroad track & the smells of bananas & coffee which grew beside the tracks. It was like travelling through paradise, or at least, my idea of paradise. On the final switchback, our steam locomotive pulled the train onto the plateau, which was grass lands & pasture for herds of cattle. The cowboys would wave their hats & race the train, which quickly overtook them & passed them, provided the fireman was good at his job. It was also like a trip into the 19<sup>th</sup> century, including the paddlewheel, wood-burning steamboats. Indeed, I have been privileged to travel in time as well as space.

The pattern is becoming clear in Iraq, for it appears that our ZOG is fomenting a "holy" war in The Middle East between Sunni & Shi-ite Moslems. A Moslem implosion would greatly please our ZOG & Israel, as we would suspect. Let's see if the ZOG's intended targets & victims are as dumb as Zionists hope they are! I am impressed by the apparent madness of the Bush regime, as expressed in their arrogant statements about imposing Judeo-American "democracy" including our "culture" & social behavior. It is also true that those whom the gods will destroy, they first make mad. Bush seems as fanatical in his globalist 'jihad' as Osama is in his, & I'm just as certain as you are that China is "the laughing third party" in this crazy conflict. The U.S. madmen sound as if they are willing to take on the entire world, to enforce conformity to their insane schemes. Since the world includes China, it is obvious that they fully intend to bite off more than they can chew, but to what purpose? Are they striving to goad their jewish god into producing Armageddon in our time? Stay tuned!

Jewsradio reports the extreme salary differential between U.S. military personnel & the "civilian security contractors" alias mercenaries. These mercs consume ¼ of the U.S. funds for Iraq, although they are outnumbered 5 to 1 by the poor grunts who take many more risks for very little money in comparison, according to the NPR report. No wonder the ZOG wants to cut their funding! Most of us who read "1984" could not believe that Orwell's 'fictional' description of Big Brother's dictatorship would come to pass, such as the surveillance cameras & the mass media propaganda that was blunt & brutal. Yet, I witness local acquaintances who love the ZOG & who told me with assurance that their god, Bush, would "never" renew the draft. But, suddenly, they now say that the draft is likely, as if they had been saying that all along! Orwell was right, & that's pretty scary, kids. Renewal of the draft will be the proverbial "moment of truth" for the ZOG, to which I say DOWZ! & ORION!

P.S.: Reports have surfaced about rivalries between ZOG troops & contract mercs in Iraq, as well as conflicts of interest, in which one  does not know for WHOM the mercs are really working. The same applies to regular ZOG grunts.
