

6 Jewlie 05. Dear Phil: Many thanks for your mailing of 1 Jewlie! The basis of "They Live" was a treat because it does describe jew behavior, just like the movie. Yes, we need to wake up & see. Henry Ford said that we would be astonished if we knew the origin of ideas we receive in our environment, so many of which are kosher! Thanks for the economic discussion as reported in the Harper's Magazine Forum. I felt that they were using lots of synonyms to obscure the point, which is, that SOMEONE must pay! The question is WHO & HOW they will pay for their standard of living. So far, U.S. denizens are living on borrowed time & borrowed money, so we depend on our creditors, who may change their minds at any moment. The issue of "entitlements" was raised, comprised of such things as welfare, Social Security & Medicare. Having paid required amounts from my wages into Social Security & Medicare over the years, I have kept my part of the bargain, while the ZOG appears to be waffling on their part, likely with the criminal intention of reneging on the deal. If a cost of living index is omitted, that would effectively destroy the programs, for example, for one could purchase nothing in 1950 figures, unless those figures were indexed to reflect 1950 values. To add to the crisis, medical costs for new medical procedures are soaring, while the number of people in need of such procedures is also soaring. This is an issue quite apart from monetary inflation. The forum blabbered about "saving", in the abstract, since it is futile to 'save' in an inflationary cycle, as occurred in Weimar Germany. Inflation wiped out everyone's savings, if they were kept in marks, rather than in gold or foreign currencies. If U.S. sheeple are to reduce their spending, they must also reduce their borrowing, & there must be a guarantee against inflation, so their savings retain their original value. As for the welfare "entitlement", Black breeders threaten violence if they are not going to receive tax-payers' funding for breeding without working, just as I heard today on NPR jewsradio! Maybe that's where "blackmail" originates. Ha!

Thanks for The Idaho Observer. I notice several articles by jews & Chinese. One Chinese writer condemns the Mexican invasion & reconquest of U.S. territory. In the interests of 'fairness' & kosher content, I'd recommend the inclusion of articles by Mexicans condemning the Chinese invasion of former U.S. territory. Then we could have Black writers complaining about Asian & mestizo inroads on "their" welfare "entitlements" & affirmative-discrimination hiring quotas. It is fast-appearing that our situation is becoming hopeless, but not serious. As one cartoon character used to say: "What a revolting development this is!" Kunstler described the people who developed our automobile-dependent suburban society as "relatively stupid people" who thrived on a cheap-energy economy, or as I have said: "Abundance produces fatheads!" These critters equate "the end times" with the end of cheap gasoline, but the end of their ill-conceived way of life will not mean the end of humanity, in one form or another, & there will be no big sky-jew rescue for you, Whitey! We survived before the automobile & we can survive after it. All the best. DCWZ! & ORION!

*Ed*
