

23 "Jewlie" 05. Hail Chad! Many thanks for your letter of "Jewlie" 19th. I am not a White supremacist, for they have a history of NEEDING niggers. I am not a White Separatist, for Whites who cannot organize are not helping us to survive. I am a White Nationalist who believes in your program of establishing our own identity as White Nationalists & our own White state, under our own self-government. That is what ORION! means. White Flight is not White Nationalism, as we see in the northwestern states. It just means that Whites have had it with too many muds, so they go where there are not so many, so they can bring in more, where they now live. Racial confusion is no solution! America was founded by religious nuts, so we must avoid mixing various cults with racial improvement & racial survival. There is no salvation in the jew-book, but we are doing God's work if we put our racial interests first. Races were created by God & religions were created by Man, so we should RESPECT race & SUSPECT ALL RELIGIONS! Hitler was able to create White Unity DESPITE Whites' religions which had killed so many Germans in the past. Some seek to use Our Race to serve their religions & their little egos. This abuse must not be permitted. "Is it good for Whites?" should be our first & foremost question, for ourselves & everyone else.

Being in the ZOG-gulag is similar to being a monk in a hermitage, away from the outside world. I note your use of words like "resistance", "revolution" "Liberation Front", "war" & RAHCWA. As the ZOG is now gearing up for imposition of more Zionist (jew-supremacist) tyranny based on "terrorism" as its pretext, people who use such words on the outside are likely to be on the inside, as ZOG equates words with deeds. In Britain or Britzogland, their ZOG is enacting a law which will criminalize quotes from the Koran which can be construed as an "incitement" to "Terrorism". This law could include quotations from the New Testament, in which Jesus says: "Sell your garment & buy a sword", or "I come not to bring peace, but a sword!" The U.S. ZOG is already able to abduct & detain & torture those it deems "terrorists", "terrorist-supporters" & "material witnesses", without any trial at all. Another thing to watch out for are fools & ZOG-tools who advocate violent acts &/or who commit violent acts. I have seen such tactics destroy pro-White groups repeatedly, & subject their leaders to prison &/or poverty. This is why I warn all of you to take the word of an experienced activist, as well as to study the experiences of leaders like Rockwell, Miles, Metzger, Butler et al. If we cannot learn from others' experiences, we are likely to fall into the traps which caught them. Words are no substitute for deeds, for those who talk often do nothing & those who do had best say nothing. ZOG knows! A lot of people use violent words, as if they are trying to convince THEMSELVES that they are brave. George Burdi alias Reverend Hawthorne comes to mind. He had to eat his words, which depicted him as a person he was not, in reality.

As you say, there is no substitute for meeting someone in person, but ZOG loves a meeting, as we know, which they can infiltrate with their finks & agents provocateurs. Hitler wrote that he detested organizations & that he would only join or form an organization if he could not achieve his goals by himself. Well, it was not possible for one man to save a people. The people had to save themselves, so Hitler joined a tiny club called "The German Workers' Party", which later became the National Socialist German Workers' Party or NSDAP. Many people forget that modern communications of White Genius have allowed us to 'meet' without travelling across a continent or an ocean to gather under a big tent. Microphones extend our voices, so we don't have to shout. The Internet can convey our written words & our voices & images. Digital video & audio can record our appearances & our statements. Conference calls can let us exchange ideas in real time, even if we cannot appear on major TV channels. As it becomes more difficult to move our bodies around the continent & overseas because of high energy costs & ZOG travel restrictions, we shall be forced to use MODERN means of communication. As I have said before, I am in no position to support strangers, nor anyone else, financially, nor will I become a member of an organization whose members I do not know, personally. But that is no deterrent to communicating ideas, which I receive & offer freely, for the benefit of Our Race. Powerful groups have been created & operate according to IDEAS, rather than orders which emanate from a living leader, a hierarchy with High Mucky-Mucks & Grand Panjandruns & an organization with membership lists. That's why such groups exist & why they are powerful. If we know what to do & how to do it, we don't need people around to tell us when, where, what & how. If we know First Aid, we do not need an instructor hovering over us as we treat an injured person. But if we are defective & dysfunctional &/or disloyal to the cause, even an instructor or leader is unlikely to improve our performance. Effective groups work on a 'need-to-know' basis, not a 'need-to-blubber' basis. In modern, deadly warfare, troops have learned to spread out, rather than bunch up, so as to survive & fight. So must our own political soldiers. If we have the same goals & understand the same methods, we do not need to phone long distance for orders

which will be intercepted by the enemy, who is always listening. These are tried & true tactics, not theories. I therefore suggest that you exercise caution. Violence is coming, but it is not for us to advocate it.

I do not know any of the people you have mentioned, but my thoughts are on at least 3 netsites: www.FAEM.com, VNN & mlindste@mo-net.com, as I gather from my correspondents. I do not have a computer, myself.

I recently read Thomas Chittum's book, "Civil War Two", & as an International Relations student, I can recommend it highly, since it is a likely scenario of our future in North America. As I tell everyone, truth exists, whether we like it or not, & wishful-thinking cannot hide the truth, not even from ourselves in the end. Why is time not on our side? Because we have been wasting it, willfully & stupidly, as long as enough White sheeple & crooks could get their rewards, as they thought, from the jew-supremacist status quo. Most still think so. The thing to remember, however, is that it is never 'too late'. As my old friend, Col. Rudel, used to say: "You only lose if you, yourself, give up." In politics, or people-power, timing is always important. A good political thinker can spot the proper time for a declaration & a deed, & he can also see when it is best to do nothing, but prepare for The Day, in silence. Bismarck said that the job of a politician is to grab History's skirt as she rushes by, & to hang on as long as possible.

In regard to Whites infiltrating the ZOG, I imagine that they are already there, but not very much longer, as the ZOG gets rapidly darker. The ones to watch for are those who suddenly discover that the ZOG no longer functions in their favor, & who may change their minds, so they work against the ZOG, rather than for it. That's why the ZOG wants such Whites to have lots of hostages: property, debts, children & possibly jewish wives! Such men usually have personal career ambitions, as well as hostages funded by their ZOG-work, so they spend their time serving the ZOG, with no thoughts for the White Race. I've known plenty of them. Well, it is said that even a worm will turn & a cornered rat will fight back. Stay tuned!

Let's address some things each one of us can do, right now, for ourselves & our loved ones: (1) Get out of debt. (2) Avoid the boob-tube. (3) Seek information instead of mere entertainment & pastimes. Learn woodcraft rather than videogames. (4) Prepare for a chronic gasoline shortage by reducing your driving & your need to drive. I live in a small town where I can do everything without a car. I don't even need the bus service, if things get worse. (5) Gain as much useful skills & knowledge for work & survival, on behalf of you & yours. (6) Take care in choosing your 'friends' & associates: can you depend on them when times get tough, really tough? If not, think again. Co-consumers are not usually comrades, no matter how long you've associated with them. (7) Stay healthy in mind & body, like a real warrior. We are in this for the long haul, so pace yourself accordingly. (8) In all things we do, ask, "Is this good for Whites?" If the answer is "No", don't do it!

I'm sure you can think of many more ideas of things we can do right now, on behalf of Our Race & ourselves as individuals, so even those on the inside really have no excuse for doing nothing. That's why we have brains.

Thanks for sharing your wisdom & how you acquired it. We can all learn from others, by watching them, & listening to them, whether or not we agree with them. We are all self-educated, but we learn or can learn from others' ideas & experiences. That's what schools were for, until they became centers of anti-White indoctrination & dumbing-down. As you wrote, we all can learn by observation, if we just keep our eyes connected with our brains. You wisely noted that we learn the most by being still & keeping our mouths shut so we can listen. As you also noted, we can learn from others who got somewhere before we did. That includes others who have succeeded, as well as those who have failed. There are no bigger fools than those who think they can escape the consequences of engaging in others' follies, such as alcohol & drugs. The only way in which we may become exempt from such follies is to avoid them, so we do not suffer the consequences. I have sure profited from others' experiences, because I figured that I was not much different from them, so I avoided doing things which brought them grief, & so avoided incurring grief myself. Someone said that I "must be very wise." I replied, "No. In my case, I just learned over many years, & I was lucky to survive my learning experiences. I was born as clueless as anyone could be." "Well," she said, "If you're not wise, you can really fake it." I thanked her for the compliment. Ha!

It's time to visit the post office. Keep up the good work & don't let the bastards grind you down. ORION!

P.S.: When our women support an idea, the movement based thereon becomes serious, as did National Socialism. There were always lots of young couples in the audience, in addition to men.
