

19 AUG 05. Dear Phil: It was great to receive your letter of AUG 17th & the outstanding enclosures. You have a discerning eye for important articles. Many thanks! The report on the mental state of el presidente Bush & its kosher sources hint that our Zionist rulers may decide to dump Bush, as soon as he outlives his usefulness. It's an old stunt of using a dumb frontman to carry out unpopular policies & then dumping him, so he can take the blame, rather than those who gave him the orders. I think Orwell wrote that "Party members are sometimes wrong, but The Party is always right." No, I wouldn't sell Bush any life insurance. He may have an 'accident', like the two Brits who denounced the WMD lie & who died prematurely. Just a 'coincidence', eh? Then Cheney would rule openly, as ZOG's next frontman in line. I do not envy these critters one bit.

In regard to a 'grassroots movement', this "Gold Star" mother, Sheehan, who lost her son in Iraq, could become a focal point for such a populist movement, if only the Goyim can keep their fuzzy minds focussed & get off their behinds. Another 9-11 atrocity would probably serve to distract them, just as the ZOG would like. The depleted uranium issue seems too subtle & slow to goad the dumb Goyim to action. As a population's intelligence drops, so does their ability to think ahead, nor do they even see ahead in order to spot danger approaching. When the danger hits them, it's usually too late. With such subhumans, panic is usually more dangerous than that which stampeded them in the first place. If the vets who are affected by the DU poison can prove they are sick from that substance, they could try to sue the ZOG, like those vets who suffered from Agent Orange, but the ZOG's tactic is to deny everything until its victims die. I understand that thousands of Bush #1's Gulf War vets are still attempting to sue the ZOG for "Gulf War Syndrome", with no success to my knowledge. Soldier sheeple should really read "The Little War of Private Post" in regard to U.S. indifference to the plight of vets, as occurred even in the Spanish-American War. The U.S. military has long used its troops as guinea pigs, usually with vaccinations, exposure to radiation, &c. See if you can find the video, "The Atomic Cafe", which shows thousands of U.S. sailors swabbing the radioactive decks of ships exposed to the Bikini bomb test. See more thousands of U.S. soldiers advancing toward the mushroom clouds in the Nevada Desert. No wonder we suffer from more cancer & birth defects, but since we are 'just' Goyim, & therefore "animals", we shouldn't be surprised when we are cruelly sacrificed for our jewish masters, just like the animals subjected to the cruelty of kosher slaughter & commercial convenience. After all, "They Live!" We sleep, obey & consume.

We also enjoyed a bit of rain, even though it made the heat of the day into a steambath. So far, we've been lucky to escape the fire danger, locally. Some say that weather runs in cycles, but I hope that we do not have another drought like this one next year. That would be a "real Holocaust", as the sheenies say. Cy veh! All the best. DOWZ! & ORION!
