

28 AUG 05. Hail D.R.! I am enjoying the broadened vistas afforded by your letter of AUG 18<sup>th</sup> & the Crowley enclosure, as well as your trenchant comments on Christ-insanity, which are very appropriate. As I see history, Christians went from totalitarian conformity to tolerant dissolution. It is hard to imagine what sort of 'solution' the author of the article on Aleister Crowley would recommend for all that now ails us, a turn of the clock back to pre-World War II? I read a current paperback book on Crowley which was published in the 1950s, so I'm as surprised as you are to find him deemed an 'unperson' by The Encyclopedia Britannica in 1960. The author of the Crowley article has not read Peter Tompkins' revealing book, "The Magic of Obelisks," it appears, since he fumbles around with the matter of Crowley's being a 33° Freemason. Tompkins published a photo of the actual 33° certificate in Crowley's name, which was issued in Britain, not Mexico, as suggested in the article. The 33° is honorary. It cannot be earned, as are the lower degrees, so what the author prates is claptrap. If the author is a Freemason, himself, he has made a clumsy effort to distance Crowley from the Masons by hinting that Crowley's degree might have been illegitimate or even fake. Crowley's 33° was just as genuine as that of FDR. Tompkins applauds the Satanist-Freemasonic nexus, complete with a hermaphrodite Baphomet with the USA-USSR 5-pointed star on its forehead. The author goes out of his way to link Hitler with Crowley, as a fellow Satanist, but he makes a much better case for "Stalin", whom he barely mentioned. In the 1950s biography which I read as a college student in the 1950s, the biographer styled Crowley as a fairly typical Victorian eccentric, who had over-dosed on Christ-insanity, & who thus reacted in opposition, as would any strong-willed, spoiled rich kid. This illustrates Newton's law of action = an equal & opposite reaction, & it raises the subject of what I call "the symbiosis of opposites." There can be no electric current, as we know, without a positive & negative. Just yank one battery cable off its contact, & the circuit is broken. In religion, gods are dependent on devils & vice versa. What would Yahweh or Jesus do without Satan & vice versa? They'd be out of business. That's why I tell Christians to pray for Satan, 'cause he needs it most! When I say that, you should see them scamper. The last time I checked the mirror, I didn't have horns, but I always take care to wipe my feet on the bathmat when I leave the shower. Still, I haven't received my 33° certificate from the Masons, nor my \$50,000 check from Publishers' Clearinghouse, nor does Elvis live in my apartment building, but I digress. Friedrich Nietzsche wrote "Beyond Good & Evil", which hinted at this bond between "opposites", just as my left hand is the opposite of my right hand, without them being enemies. As you mentioned, Christianity liked to call anyone who differed from their dogma a "Satanist", without regard to their differences. All they had to do was differ from the official doctrines & they were lumped in with Devil-worshippers. I'm surprised that St. Francis was not so condemned with his pantheism & peculiar habits of talking to birds, benches et al. By creating this bipolar world of "opposites", Christianity & its godless version, Communism, sought to impose blinders on human thought, by reducing the universe to two categories: a god & his opponent; good versus evil; Communists versus Capitalists: all 'opposites' of Jewish origin, between which the dumb Goyim were free to bounce, like tethered ping pong balls. The gulag really does begin in the mind.

The "Jack" Parsons story, with his Crowley/O.T.O. connection, purports to 'explain' the explosion which carried him away "on the breath of the Father", as Parsons predicted, while introducing the extraterrestrial version of the UFO issue. A lot of this material is addressed by Bill Grimstad in his audiotaped program originally entitled "Sirius Rising", which I've heard in its entirety of 3 90-minute tape cassettes. His revised version entitled "Conspiricon" I have not heard, & I lost contact with Bill, when he no longer answered my letters in the last century. More such information was published in a book entitled "The Apocalypse Generation", if I recall that title correctly. This material revealed the connection of Judeo-Satanic-Masonic mumbo-jumbo with the atomic bomb test, the Mt. Palomar telescope & the California Institute of Technology, where Parsons was an instructor. As I recall, Crowley died in California in the 1950s, but I'm not sure where. I'd guess he was in Southern California, where Caltech, The Jet Propulsion Laboratory & Palomar are located, so he could be with his perverted pals, & have his heroin.

Christians feared National Socialism, mainly because of its powerful symbolism, they said. They also objected to its doctrines of racial separation & eugenic improvement, which had long been practiced in the USA, long before Hitler. The author of the Crowley article tries to demonize & denigrate Hitler, all at once, as did previous Allied liars-for-hire. One really cannot have it both ways: either Hitler was a monumental proponent of "evil" or he was a drab little man who made "boring" speeches. Dr. Oliver wrote that Hitler's alleged role in the

2) "Holocaust" would have made him an instrument of Yahweh, as were the Romans who punished the jews of Israel for 'sinning'. A major rabbi in Israel claimed that the "Holocaust" was necessary for the "atonement of sins" which jews had committed in previous lives, without bothering to thank Hitler for performing this "mitzvah" or divine obligation! Is such ingratitude also a sin? Stay tuned!

As you say, Bush is also doing his "mitzvah" for Israel, so the jews may very well use him as a scapegoat so as to conceal their role in the Iraq Disaster, but they may have him order up one more war, this time against Iran, using its nukes as the excuse. The real reason for a U.S. attack on Iran is (1) For Israel & (2) To halt Iran from setting up an independent oil market--in Euros. Latin American oil producers are also showing independence, so Bush sure has lots of fish to fry. Will he nuke 'em all & let Yahweh sort 'em out? Stay tuned! Russia, China & the former Soviet republics of Central Asia are demanding that the USA depart from its bases in that area. So far, the USA has not done so, according to the jewsmedia. As I suspect, the ZOG knows what bad shape the USA is in, so it may 'shoot the works' in a last act of nuclear desperation, prior to its demise on the world stage. Bush would likely want us to go out with a bang, since he longs for the end of the world & the 'return' of Jesus ben Yahweh, along with other armageddonist arseholes, who expect to be "raptured". In any case, it's adios, USA; hello, China!

From my reading of Chittum's "Civil War Two", he covers present & future pretty thoroughly. So far, all his predictions have come true, so I don't know what he'd write as a sequel, aside from a musical version.

As you noted, Judeo-Capitalism & Judeo-Christianity both see war as Gentile 'birth-control' for profit, when the mobs become too disorderly & dangerous to distract with bread & circuses. Neither cult admits that we live on a finite planet which is subject to depletion & pollution of its natural resources by greed & over-population, so they view war, with its additional depletion & pollution of the environment as a 'profitable solution'. As the economist, Werner Sombart, wrote: "Wars are the jews' harvests."

Jewsradio reports a very high & increasing rate of TB infections & deaths in Black Africa, because of the AIDS epidemic. I also suspect that the current crop of Black immigrants from dying Africa have paid big bucks in stolen foreign aid money to buy their admission tickets into the Jew Ass Cy Veh, as they do in Canada alias China-duh. It looks like all our rackets are coming home to roost, & we will be stuck with the bill. The 'miracle' is that we've gotten away with them so long. The Germans called the USA a "raub-bau Kultur". This means that we expand the size of our house by robbing from the existing structure, thereby causing the entire house to collapse, since none of it has adequate support. That's an accurate description of our way of life, & we can hear the entire structure creaking.

Yes, isn't it 'funny' that the anthrax atrocity was never solved by our ZOG. As you say, it looked like a Mossad experiment on the Goy guinea pigs. FEDZOGUSA says that we may expect another 9-11 "terrorist attack", in one form or another, so bioweapons are a possibility, although explosions are more spectacular, with lots of smoke & flames. The public has become so accustomed to spectacular explosions in the kosher media content that they expect lots of fireworks when anything happens. A deadly plague would seem dull by comparison, although the Ebola virus is quick, dramatic & gruesome, so there's a possibility. I understand its victims bleed profusely from every pore, so it's quite spectacular, without fireworks. Ebola is like jet-propelled AIDS, & is highly contagious, as I understand.

The ongoing fuel crisis may be a test, since petro-banksters have been known to limit oil supplies by capping wells, keeping oil tankers offshore, hoarding oil in railroad tankcars, reducing refinery output, pumping oil into tankfarms or back into the ground, &c. The oil companies have practiced such scams long before Enron did similar things to electricity: selling less for more it's called. But let's assume that their price-gouging is based on real scarcity, due to declining supplies & increased demand. If that is the case, North America may devolve into some "Road Warrior" scenarios in which bandit gangs hijack fuel trucks & tap into pipelines, as they do in Africa, often with fiery results. Fuel may be rationed, like the water of "Soylent Green", so gasoline riots are possible, & may expand into general looting in U.S. cities. If a ballgame can result in a riot, so can long lines at gas stations. Yes, there's lots of issues to fuel Civil War Two, & the tinder is piling up, fast, thanks be to ZOG. In the meantime, Americans are not even beginning to plan for lifestyles which do not depend on infinite supplies of cheap energy. Commuting distances should be reduced, not extended, & surface hauling of goods should be on rails, not on roads, at least for inter-city transport. Again, many thanks for your thought-provoking items! DOWZ! & ORION! E.T.
