

29 SEP 05. Hail D.R.! Many thanks for your letter of 23 SEP & the outstanding clip from The Jew York Times. The article on violent crime in South Africa is revealing in that Black-ruled country. If left to themselves, the niggers would turn the entire continent into another Haiti, with nothing left to steal. The photo on the flipside looks like an African nigger firing grassland in the Amazon region, just as they do in Black Africa. That article on land-abuse in Brazil saved me a trip to that country. In preparation for my Latin American Expedition, I studied Portuguese as well as Spanish, for Brazil covers around 52% of South America, & its official language is Portuguese. At Berkeley I took several courses in Portuguese & Portuguese literature. The rapacious, land-grabbing chicanery reported in the news article seemed right out of a novel, "Terras do sem Fim", or "Lands Without End," in which land barons on the make battle one another for turf, wild west style, as they apparently do now. I got a laugh when I read that a 1912 deed had been forged with ballpoint pen, just like the "authentic" ballpoint pen entries in the equally bogus "Diary of Anne Frank". Ballpoints did not exist prior to 1952. I'm still waiting to hear about an 'original' manuscript by Leonardo da Vinci, written with a typewriter. "Os Sertões" (The Backlands), was translated into English as "Rebellion in the Backlands", & it makes good reading, complete with photos. It describes a cowboy revolt in NE Brazil's semi-desert region, where the Afro-Eurasian population of mainly Negro admixture lived off cattle & whatever else they could eat. That area was prone to superstition & bloodshed, one gruesome incident being the baptism of a large rock formation with the blood of innocents, specifically babies & young children. A rumor spread that if such a baptism were done, the rock would split open & "St. Sebastian" with an army of angels would march forth, to make the parched land flow with milk & honey. The former Portuguese King Sebastian was sainted because he was such an unmitigated disaster for Portugal. He was raised by priests who inspired him to lead a 'holy crusade' into North Africa, in which he & the flower of the Portuguese army were wiped out by the Moors. Since Sebastian was a celibate, he left no heir to the throne. The next in line for the job was none other than Philip II of Spain, who was fighting a war against the English, Dutch & French! By his acquisition of The Portuguese Empire, Brazil was invaded by the Dutch, French & English. Philip mounted an invasion fleet, The Armada of the Vassals, which was much larger than the ill-fated Armada sent against the British. The Dutch were too cheap to reinforce their Brazilian garrisons, so they were kicked out by the combined Spanish & Portuguese forces. They did manage to swipe Dutch Guiana in northern Brazil, as did the retreating Protestant forces of England & France, which also managed to establish British & French Guiana, alongside. The foolish King Sebastian was long gone, but many impostors appeared to claim the Portuguese throne, without gaining any credence. After it was accepted that the king was dead, he was made into a saint, & became a potent religious figure in Portuguese-speaking lands, for he had ruled Portugal just before its internal decadence led to the rapid decline of The Portuguese Empire. The crazy King Sebastian reminds me of the crazy George Bush II, who expends the waning power of the USA on an equally futile & disastrous crusade in The Middle East, on behalf of Israel.

Various cults sprang up which used St. Sebastian as their totemic figure, although none were so bloody as that of NE Brazil in the 19th century. A few decades later, a charismatic figure called "The Counselor" led another backlands rebellion, which had to be suppressed with troops, as were the former Sebastianist killers. The author, whose name I forget after 46 years, wrote that this latest backland rebellion was not a military problem, nor an ideological problem, but an endemic social problem. He did not mention the obvious cause: too many niggers breeding on too little land, but he came close!

As I type this letter, jewsradio reports massive Black invasions of Spanish territory in Morocco, which Spanish authorities are reluctant to defend. During Africa's colonial period, we were told that all the natives wanted was for Whitey to get off their backs & out of their territory. Now they have shown their incompetence under their own rule, so they come to invade our territory, as mud imperialists & conquerors. Only stupid Whites would allow themselves to be invaded & conquered by beggars whom we now encourage to be bandits on our turf! The non-White invasion of Europe will act like a cold shower: either Whites will wake up, or the chill will give them heart failure. Stay tuned!

I recently received from a correspondent an Australian financial newsletter, The Privateer, which relies on sources in addition to U.S. jewsmedia, thus providing a more accurate picture of the U.S. economy than our own ZOG-stats. The picture is not at all pretty!

2) Our "King George II" is at least as crazy as our former King George III. Bush appears to dwell in a realm of rambling rhetoric, punctuated by embarrassing pauses. Realities are quite different, since the USA's economic decline cannot be talked away, nor halted by any amount of addled advocacy of "staying the course" in our Iraq fiasco. Nor can "terrorists" distract us from our growing problems which are culminations of decades of fatheaded folly in terms of demographics, economics & politics. The Privateer mentions our "Raubbau" culture based on borrowing, rather than saving, which results in our consumption of our own capital means of production, as well as our failure to maintain & improve our vital infrastructure, whose failure will have a domino effect, by overloading already overloaded & neglected infrastructure: roads, railroads, bridges, pipelines, electric power & distribution networks, refineries, &c. Aging, deteriorating productive capital must be pressed to the limit, as Bush II has urged the remaining oil refineries, with foreseeable, disastrous consequences. Our own capital investments in such places as China also exacerbate our productive decline, along with our exportation of manufacturing jobs. Then our willingness to hire illegal aliens to do such jobs as remain in the USA puts our future standard of living into Turd World territory. The Privateer states that our consumerist society will end up by consuming itself, as a country of totally bankrupt debtors. The U.S. welfare/warfare state cannot last, especially on borrowed money! China is mentioned in the newsletter, as would be expected. The Chinese may try to spend their worthless zogbucks while they still have some value. About the only thing the U.S. debtor state has is land, so maybe our ZOG will sell a NW state or two to China. Watch for something like that! The newsletter also points out that failure to invest in our productive infrastructure results in the importation of goods which we used to manufacture in the USA. The U.S. debacle is not a question of "if", but of "when". Locals who have a clue of what is about to happen tell me that they "don't want to talk about it." I don't belabor the issue, but they impress me as passengers on The Titanic who don't want to talk about icebergs, damage, rising water levels in the cabins, lifeboats, &c. Maybe they believe that problems will go away if they are not mentioned. Apathy reigns. So far, as the Brits say, "I'm all right, Jack." I marvel at that fact, every day. It appears that China & Japan are the only ones who prop up our \$ buying power by accepting our jew I.O.U.s for manufactured goods, but not much longer. The Privateer mentions that the Chinese could boost their workers' pay, thereby creating their own domestic market, instead of exporting to The Deadbeat States of America. That's what Henry Ford did to create a market for his automobiles, by paying his workers \$5 a day, instead of the going wage of \$1 a day. China could do that, in a very big way!

As you observe, Black parasitism will play itself out, most likely to an aggressive mestizo audience, as Whitey vanishes from the scene. I recall, decades ago, when school busing was abolished in L.A., whose school system had run out of Whites, & whose Mexicans did not want to go to Black schools, even though ZOG declares them to be "Whites". In practice, mestizos are deemed "White", only for crime statistics. When they are crime victims, they become "non-Whites", according to ZOG. Like the Blacks, the so-called American Indians have become fat, flabby & utterly dependent upon Whitey's handouts & racist perks, such as "affirmative action" & casino permits on "sovereign" Indian lands. As Chittum foresees, if the ZOG dumps the Blacks, it will have admitted that its disastrous experiment in multi-racial empire is indeed a failure. Of course, the Blacks will not be missed, least of all by the remaining mestizos & Asians!

These two hurricanes, Katrina & Rita, have hit the U.S. economy as effectively as a massive strategic-bombing campaign. Even jewsmedia have reported that they knocked out 25% of our oil-refining capacity, damaged our gulf oil & gas production & put our Mississippi port out of action, thereby causing a serious blockage of incoming & outgoing trade, which must be diverted onto the already overloaded EW transport networks. But worst of all, the storms produced dependent refugees, around a million of whom will drain already slender U.S. resources. I understand that the USA is also receiving FOOD shipments, as well as gifts of refined petroleum products, such as gasoline & diesel fuel. The Privateer headlined its article: "The U.S. Facade is Washed Away." No mention has been made, to my knowledge, in the jewsmedia about a third major hurricane this season, which has several more weeks to last. Oy veh!

As our situation heats up, one's skin will be his uniform. Already the jews are infesting such "pro-Euro" groups as Jared Taylor's with their specious claims to be "White", according to the relatively kosher Occidental Quarterly, so he is being bought off, if he had any brains to begin with. When I was in Africa in 1974, jewish leaders & academics

3) suddenly 'discovered' that they were not White. In due course, local jews began to address us as "you White people." But, since the lying kikes weren't Black enough, the niggers were not fooled. As for other mixed-race darkies, they were not Black enough, either, since they had no tribal affiliations. In the Liberty City, FL, riot, Blacks murdered a mulatto, who was too pale to satisfy them. The writing is on the wall in America, just as it was in Africa.

The evacuation fiascos of Katrina & Rita prove how generally stupid the U.S. sheeple really are, in regard to the fact that necessities become scarce in emergencies. Duh! I recommend for the Darwin Award those idiots who bring their electric generators into their homes, so they can remove themselves from the gene pool, thereby doing humanity a favor. What is really stupid is that Whites are not, apparently, seeking to organize themselves into survival groups, even while we enjoy the time & means to do so. Events have a way of occurring suddenly, long before we are mentally prepared for them, aside from being physically unprepared. Because of these factors, our reactions to reality are likely to be fatally slow. Would more time help us to survive? Not if we refuse to see reality, in preference to niggerball on TV. From your report, it appears that the Blacks are not as dim-witted as Whites, for they appear to sense danger instinctively, if not intellectually.

The Britzog/USzog debacle in Iraq is brewing right on schedule, & one zogling has said that a U.S. troop withdrawal could occur "next year". He made no mention of occupying firebases in the country, but I agree with Chittum that this will not be practical. I will blow my own horn by stating, as I said before we went into Iraq & Afghanistan, that "when you occupy, you will begin to die, & you will continue to die, until you declare 'victory' & leave." Bush II could do that any time his Israeli bosses tell him that he can.

Re John Wayne: I read that U.S. Marines who'd enlisted after being inspired by the actor's macho image booed him when he appeared in person, after they'd tasted real battle. Yes, we sure have a population of suckers. What else can we say about those who tolerated his movie on "The Green Berets", in which he not only won the Vietnam War, but made the sun set in the east! I think he appealed to American anti-intellectualism, which accepts any idea that's simple, even if it's wrong.

I agree that ZOG's reliance on 'professional', that is, mercenary military forces is the equivalent of playing with fire. Such forces under CIA direction participated in the heroin trade from 1954, through the Vietnam War & after, just as they now play a similar role in the Colombian cocaine trade. Should ZOG's ability to bribe &/or punish such mercenaries weaken, they would likely set up their own little kingdoms, for personal power & profit. I remember when our ZOG announced the existence of a U.S. "shadow government" which would take over if the overt government were vaporized by some "terrorist act" or a major disaster. The public seems to have forgotten this announcement, but I have not. Such an announcement is an open invitation for a coup d'etat, & no banana republican dictator would ever be so stupid as to make such an announcement. I'm sure our special ops boys have not forgotten, either.

Yes, our society is increasingly complex at the very time our intelligence is diminishing to its lowest point in our history. Add to this our endemic corruption & our confusion of races, & we have disaster in the making. We have become most arrogant in our ignorance at the very time we are most dependent on systems we don't understand, without the slightest idea of how we may cope when such systems fail. Maybe we have become a land of sleepwalkers, who fear to wake up.

When we consider the proportion of medical doctors to the general population, I would say that the proportion of keen-eyed, smart & sane political observers is even smaller than that of doctors. Imagine if we knew all the common medical symptoms of diseases, which we could spot in the general herd of featherless bipeds. We would be considered 'weird' if we bothered to tell these critters that they had some disease in its late or early stages, even if the critter "felt O.K.", according to his opinion. Of course, medical doctors are usually believed, even if they are wrong, but honest political analysts are no often believed, even if they are correct, for when the truth is revealed in events, the sheeple have forgotten, or are too shocked & distracted to remember the good advice they did not heed in time to make a difference. Thus it is with sheeple. I sometimes state my ideas in the form of wry humor, so that the dummies think I'm joking & the smarties know I'm not. I would not call this tactic a survival mechanism, any more than it would be on The Titanic, for the ship of state will sink with me on it, in all likelihood. What, me worry? ORION! E.T.
