

13 OCT 05. Hail Chad! Many thanks for your letter of OCT 9<sup>th</sup> & the great photo! Photography has certainly improved since I had my passport photos taken. I'd like to send you one of them, but I'll need to study your ZOG-gulag's photo policy, which is the most paranoid & peculiar of any U.S. gulag. Since I'm in a hurry to answer all my current correspondence, I'll defer sending you a photo until later, for I must dig out your gulag protocols from my files.

I see no end to greed as a prime motive in human behavior. Dr. Oliver wrote that few featherless bipeds can resist the sound of a \$100 bill being crackled, & that the sound of two \$100 bills being rubbed together is considered the voice of God. Most Whites had no concept of race, judging from their behavior in various parts of the world, including their own homelands. They were mainly interested in gaining food, clothing, shelter & sex in any way possible, so they'd serve any master who offered them those things, regardless of their Folk & Future. Race is only important as Whites become threatened with extinction, but race is not important to at least 90% of Whites, judging from their behavior. Of course, most ostensible Whites are not really White, but Eurasian, which explains their apathy on racial matters. It also explains Americans' willingness to kill White people, as we learned from World Wars I & II. Of course, there are downright stupid Whites who will do whatever a Jew tells them to, like the criminals who are getting shot up in Iraq. All the wars the U.S. has fought since World War II have been illegal wars, according to our own Nuremberg rules. A soldier who kills anyone without a declaration of war on the part of his country is defined as a "war criminal", by the U.S.A. Any country which attacks first, as in "pre-emptive strike", is guilty of waging "aggressive war", which constitutes war crimes & crimes against humanity, in terms of our legal precedents established by us in the Nuremberg War Crimes Trials, so we are at least as guilty on all counts as those Germans we hanged at Nuremberg around 1947. As long as we are ruled by aliens & by stupid, greedy members of our race, this suicide is likely to continue. Those who serve the ZOG do their race a disservice. There is no good in confusing patriotism with profit, as most of us do.

The Soviet Jewnion's collapse was hastened by their "economy" in which almost 1/2 the population was hired to spy on & guard the other 1/2. Our judeo-American economy has many similarities, but just because our ZOG is willing to waste young people in its gulags does not mean that you should waste yourselves. The challenge is to find meaning in your life. It is also an opportunity to inform yourself & prepare for your own survival in this rapidly changing world. Your present situation reminds me of my university experience, in which I lived pretty much in a small cell & read, wrote & listened for over 6 years. Sure, I could go out, but I could not neglect my studies, or I'd flunk & be out on the streets. If I failed, I'd lose my G.I. Bill of Rights' scholarship funding. You have a precious commodity: time. People who must work for a bare living do not have that luxury, for they must run around & work under very tight schedules. Make the time work for you. That is the challenge you face. I no longer work for a living, so that is also my challenge. Like you, I live under restricted circumstances, due to my meager income. Since I learned to live on very little as a student, I view my present life as a continuation of my university experience. I saw no combat in the U.S. Army, but I saw lots of combat as a civilian in Colombia, along with normal mayhem. I saw most of my dead bodies in Colombia, & a few more as a colonial civil servant in the former British colony of Rhodesia, so I actually fought in the last colonial war in Africa, which ended in 1980, with the handover to Black Marxist Misrule under President Robert Mugabe. Unlike Colombia, I was at least supplied with weapons by my government under Prime Minister Ian Smith, & I was also in command of a district, with my own Internal Affairs troops, who were all Black. Sometimes I or my Portuguese assistant would drive up & down the airstrip before I did rifle inspection. Every day began with a dawn stand-to, as every day ended with a dusk stand-to. These are times most favorable to attackers. Stand-to means that everyone is armed & in position until ordered to stand down. I gave those orders, since I was in charge of the fort, which I fortified by ordering the digging of trenches with proper lines of fire, & by sandbagging & stringing out our small stock of barbed wire in concertina fashion. We were not attacked during my stints of emergency military service, mainly because the guerrilleros used my district for their rest & recreation area, with the connivance of the local Black chief.

I don't recall the exact 14 words, so I'll say, Unser<sup>e</sup> Rasse ist unser<sup>e</sup> Nation! (Our Race is Our Nation!) Race & nation are feminine in German, but I initially omitted the endings. Haste makes waste! All the best & ORION!
