

15 OCT 05. Hail D.R.! I enjoyed, as always, your latest of OCT 5<sup>th</sup>. The transcript of the World War II radio speech of Ezra Pound seems to demonstrate that fine Italian wine may not be the best refreshment for literati who wish to make cogent speeches on large topics. Oops! As I understand, the complete speeches of Day, Pound, Axis Sally, Tokyo Rose et al. entitled "Axis Americans" are in U.S. Archives, possibly at Suitland, MD. They were recorded on Edison cylinders, rather than disks, so their fidelity leaves much to the imagination of the listener. Some of them, by now, may have been digitalized into total audibility & true fidelity, better than the original recordings. Certainly, this would be a worthwhile job for audio historians. Many thanks!

Yes, I also appreciate BBC, when I am able to listen to it. Their worldwide coverage applies to an empire, such as the USA, with fingers in every pot, all over the world, so it behooves Boobus Americanus to know, at least, where ZOG is sending him or his children. "Nawlins" has pretty much been talked to death, but the jew, Daniel Shore,<sup>sp</sup> of NPR says we don't need to stick with one disaster, for there's always a new one. It's all "show-biz", as far as the dumb Goyim are concerned, so they don't care if their 'entertainment' is true or false. Most don't seem to view the "news", anyway, since they are apparently addicted to niggerball. We are the real (decadent) Romans of this era, ZOG love us. BBC is also jewsmedia, & therefore 'kosher' for Goy proles to feed upon, with meat or dairy products (but not both at once!). Thanks for passing on the new, scary buzz-words: "environmental refugees"! Finally, someone has coined & permitted the usage of a relevant & meaningful term. For those who can think, we can now wonder why we should admit people whose over-population & land-abuse have rendered their own regions uninhabitable, so they can help us make our lands uninhabitable. ZOG has let the proverbial cat out of the bag with this term. American Jewish World (Dis)Service proudly admits on the jewsmedia that it is helping to worsen our mud-influx, so they can feed off us more conveniently.

I'd appreciate it if we could stop using "elite" to refer to our top criminals. Why not call them what they are: our Foremost Felons? There is nothing elite about these rich rascals. As a local Medicare spokeswoman said: "It's survival of the richest!" Were our ruling rascals worthy of the "elite" title, they would at least arrange for the non-survival of "the inept poor" & useless-eaters. If they were truly elite, they would contrive to reduce the entire world population, in order to keep our planet habitable, & if they were super-elite, they would support the proliferation of the eugenic, rather than the dysgenic members of society, but since they are themselves dysgenic, that will not happen. Since they are infinitely greedy, they are also unlikely to reduce the proliferation of the poor, on behalf of infinite labor & infinite markets for infinite profits--on this finite planet. Thus, we leave the essential task of culling human locusts to our oldest Nazi, Mother Nature, who may kill us off before we kill ourselves with our infinite pollution & depletion of the resources we depend on for our existence. If Nature acts soon enough, there may remain some parts of this planet still capable of sustaining human life, but if not, where do we go? A writer ascribed China's woes to the "Three O's": Over-logging, over-grazing & over-population. These factors create & enlarge deserts all over the world. The deserts of Arabia & Africa are man-made, as is the Gobi of Asia. The Amazon is becoming a desert, as other large jungle areas of Brazil have become decades ago, & even centuries ago. Guatemala & the Philippines experience great mudslides every year, & certain areas of Indonesia are similarly affected by deforestation. When ground-cover is removed by man, torrential rains also remove the fertile topsoil. I saw this process in fast-motion in Southern California, where brushfires were followed by mudslides nearly every year. The U.S. Forest Service would quickly seed some sort of grass or other ground cover, which would absorb rainfall & hold the soil in place, so as to prevent the soil erosion, at least to some extent. I did not spend my fireseasons with my eyes closed & my brain switched off!

Our 'diverse' government cannot decide which forest policy to adopt: (1) Injun: "Let it burn. Let's fold our teepees & skedaddle." (2) Jew: "Chop 'em all down. Sell & move on." Or (3) Aryan: "This is our garden, so let's take good care of it. We intend to be around here for a long time."

Yockey correctly defined a political organization as one which has the power of life or death over its members. As such, groups currently called "political parties" are not by any means "political", for they do not control ballots, any more than they control bullets. The great fear which Whites have is that they must agree to a White Nationalist program & abide by its discipline,

2) without which no amount of weapons can achieve anything. Weapons without the will & the disciplined use thereof are thus irrelevant to politics (people-power). When the will & the discipline exist, the weapons shall be acquired, just as Menachim Begin wrote in his book, "The Revolt." It is obvious that Whites still reject real politics, in favor of fantasies & wishful-thinking, unto death. Of course, the ZOG sets up phoney combat cells that purport to seek "revolution now", so pro-active Whites must use prudence, as in everything.

It looks as if the nigger is doomed to go the way of the dodo, for more intelligent races want his turf & resources, without the noxious Black 'overburden', as they say in mining parlance. Black misrulers just do what comes naturally, to them, thereby assisting in the reduction of the Black population of Africa. Black extinction is not only natural, but highly desirable. Under Black rule, the area now called Zimbabwe could support barely 300,000 Blacks, who spent much of their time chasing other Blacks around in the bush. Under White colonial rule, the same area could support 7 million + Blacks. Since Black values remained after White rule ended, the population must return to its previous figure or lower, which Mugabe et al. seem to be doing. All the White man need do is to stop his insane Christian meddling with Nature in Africa. By doing nothing there, he benefits himself! Also, he must stop Christians & jews from bringing in more & more Blacks from Africa, as they do now, into Europe & America. How long must we wait for Whitey to wake up? Those great 'holy men', the Hindus (& they'll tell you so!) were invaded by refugees from Bangla Desh, some decades ago. The 'environmental refugees' squatted in a poor, rural area of India. One dark (I suppose) night, the local Indians massacred the invaders & squatters with their farm implements. In a short time, none were left alive. That is possibly why we hear nothing more of an influx of 'environmental refugees' into impoverished India. The uneducated Indian peasants knew it was a matter of "to be or not to be", but we may be 'too educated' to see that this applies also to us. Abundance allows the reproduction of fatheads & problem-makers, as Elmer Pendell wrote in "Sex versus Civilization". Since America has been so abundant, it has a great surplus of fatheads & problem-makers, including voters & those who hold public offices. If they do not go, then all of us must go. Nature is watching us to see if any are sufficiently fit to jump off the train to Dodoville. Are there any Problem-Solvers out there? As I have observed, all problems are self-solving. If one is hungry & cannot eat, he dies, thereby solving his hunger problem. So, will the Big Sky Jew serve him some of the Pie in the Sky in the Sweet By & By? I wouldn't bet on it, but I can offer those who believe that fable a real bargain on some (offshore) real estate in Florida, & a quaint old bridge in Brooklyn, real cheap!

Will the Chinese stand by & let their jew I.O.U.s depreciate into nothing? As you say, what they really want is land in North America, which our desperate & insane ZOG may be willing to sell them, once the real estate bubble pops. I understand that bust could occur if the jew Federal Reserve Racket raises interest rates to prop up the dollar, by a few more points. Then, many sheeple-speculators will be broke, jobless & evicted, leaving a lot of housing available for Chinese who pay cash in full, along with business properties, just as Hitler prophesied, that if the Americans cannot throw the jew monkeys off their backs, America will be a great gift to China! So far, I'm beginning not to care, since no one else does, apparently. If a coup is to occur, it better be soon! The resulting Shadow Government must be lean, mean & fast. I'd recommend that the motley ZOG-mercs be left in the Middle East, Afghanistan, &c., & that a new militia be created from White citizens to defend White living space & take turf from non-Whites. An alliance could be made with China, so we might safely dump Israel & the enemy aliens alias hebes. In any case, change must be rapid, so the slow-thinkers will have to do right, & let their minds catch up later. If we do what's necessary for our survival, we won't have much time for leisure thoughts & idle contemplation. In our situation, we should probably let China have Africa & Latin America, provided they deal with the resident bipeds there on, while we clean up North America, to the best of our weakened abilities. Perhaps we can receive help from Europe, but I would not bank on it, for Europeans will have their hands full, if they don't already, to defend their own former living space. Our nukes will be of no use in this effort, to free our own turf from alien occupiers, & their race-traitor stooges. I say, "Bring it on!" to quote our bandido presidente. We don't lose until we, ourselves, give up.

All the best. DCWZ! & ORION! E.T.
