

9 NOV 05. Hail Chad! Many thanks for your letter of NOV 6th. I'm glad your zoggies have found some 'recreation' for you to do. Yes, immobility can be fatiguing, as well as boring. All of us need physical exercise, regardless of age. I have found that the more I walk, the more I have energy for walking, & the more I enjoy it. The distances increase, but my body does not complain as it used to when I had very little time for walking as recreation, rather than transportation.

It's an ancient struggle, as you describe: the battle between moral principles & financial profit. As they say, it's a judgement call. When Greeks were Aryans, they'd discuss "virtue", such as principle, morality, courage, honesty... In his Socratic dialogs, Plato described virtue as its own reward thusly: the greedy man is unhappy because he never has enough. The coward is unhappy because he always lives in fear. The thief is unhappy because he suspects all others to be thieves. The murderer is unhappy because he fears that others will kill him, as he has done them. The liar is unhappy because he does not trust others to tell the truth, & so on. The jew, Rockefeller, believed that every man had his price, & he was not disappointed, for he could buy out a competitor or hire someone to blow up his oil refinery. J.D. Rockefeller alias "Wreckafeller" said that "Competition is a sin!" That was his justification for his oil monopoly. Such a "free enterprise capitalist"! No wonder he was a major U.S. backer of Marxism. But when greed leads one to commit treason to his race, that is no laughing matter, & it merits the standard treatment accorded to traitors. "Ignorance of the law is no excuse," as they say, which includes speakers of the past & present. ^{one} I think every cop knows that one. It is also said that everyone loves treason, but no ^{one} loves a traitor. Think of the British & Benedict Arnold, the U.S. hero who betrayed West Point, or would have, had he not been exposed by British major & spy Andre, whom the Americans hanged. If I recall correctly, Arnold got away, but he's buried in the USA. Of course, there's the old riddle: "Why doth treason never prosper? What could be the reason? Why, if treason prosper, none dare call it treason!" A sociology professor told us, "only small crooks go to prison."

You raise a key issue in promoting White Survival: that those who stand for it should not alienate Whites who need to know about our danger of extinction. But those who say they stand for White Survival may not have that as their top priority. Those who make so much of outward show as "Nazis", "Skinheads", "White Supremacists", &c. are usually the worst sort of 'examples' & as 'salesmen' for their alleged cause. They can be so off-putting to Whites that I ask which jews are paying them to engage in such shennigans. Those with the "magnetism" you describe can be leaders, as well as promoters, but those on the scene appear to be promoters of their own profits from their touted cause, instead of leading & building the cause for White Survival.

Anti-White content in 'our' media of education, information & entertainment is deemed "genocide" in terms of The Genocide Convention, which is a treaty ratified by the U.S. Congress, having the full force of The U.S. Constitution, according to Article VI, Paragraph (2) of The U.S. Constitution, but Congress, in violation of its oath to "defend the U.S. Constitution," has failed to implement this treaty & the executive branch does not choose to enforce it. So much for our Freemasonic Felon Founders' fib that "we are a government of laws, not men." Our government which is "the best government money can buy", is very selective about which treaties & laws it will enforce. I asked a former Washington state legislator about the railroad treaties which stipulated that the railroads were to provide public transportation, in exchange for all the land & mineral wealth they received in terms of the treaties. "Oh," he said, "some treaties are 'more equal' than others." Now, under the so-called Patriot Act, The Bill of Rights is effectively abolished, & any U.S. citizen may be abducted without charge or trial, to be incarcerated indefinitely & subjected to torture. This is the present fate of U.S. citizen Padilla, who has been accused by the ZOG & incarcerated, without a suitable response from our allegedly 'constitutional' legal system. Even World War II spies were tried in U.S. courts, but not those now accused of being "terrorists", a term which the ZOG refuses to define. "Murderer" is legally defined. This means that I cannot be charged with murder if I am caught stealing a hubcap. "Theft" is also defined, but not "Terrorist", who may only be thinking of things the ZOG does not like. He may have no connection with others, nor engage in illegal acts, but he still may be deemed a "terrorist", because there is no legal definition for the word. If I jump out from behind a tree & say "Boo!", causing people to be scared, that can be construed as terrorism, for I might give someone a heart attack. The danger is that such occurrences are no longer deemed funny, thanks be to ZOG.

2) My previous residence in fascist Spain & communist East Germany (2 years in one & 2 weeks in the other) taught me how to live in present-day USA: No picture-taking of subjects deemed 'strategic', nor should one loiter around such places or structures. One must have photo I.D. at all times. I still have my fascist I.D. card which had to be renewed every 5 years, or sooner, if one moved down the hall from his former quarters. If you were caught without your I.D., you could be arrested immediately. In both countries, Spain & the German Democratic Republic, I also carried my U.S. passport, which I also keep handy here in the USA, along with my current I.D. card! Greyhound informed me that I must show my I.D. card in order to take a bus to the next town, which is within easy walking distance, fortunately, but if I were stopped in my stroll by 'people's police', I'd have to show them that I was 'kosher', or questions might lead to incarceration for "failure to carry I.D." Having read "1984", I am well-educated in the ways of the ZOG. In view of the present enforcement of thoughtcrime laws in Canada & Europe, & the introduction of "hate-crimes" in the USA, knowledge may be deemed unlawful, like the illegal possession of explosives! "Thought-criminals" are incarcerated in solitary confinement in Europe right now, so knowledge may also be deemed as "thought-crime". As you can guess, life on the 'outside' is becoming very interesting & exciting for innocent citizens, especially those who believe in freedom of inquiry & expression.

A writer addressed the issue of education, as you do, in his essay, "Here's How to Control People," by Charlie Reese, which I enclose, ZOG willing.

Jews like to confuse Whites by equating anything pro-White as "White Supremacist". I have lived in White Supremacist countries, starting with the USA & ending with Rhodesia. I have never agreed that an inferior White man was the superior of a superior Black man. Nor do I agree with the race-mixing which always accompanies "White Supremacy" when two or more races occupy the same living space. I believe in the improvement of my own race, rather than the imposition of its inferior specimens on other races. Because of my belief in eugenics, racial improvement, I am a National Socialist, which I equate with White Nationalist. As Hitler said: "The state protects the race & the race protects the individual." Imagine Beethoven or Edison attempting to compose or invent if they were in an African tribal context! The 14 Words cannot be realized, ever, without White Nationhood & a White Nationstate, so those who mouth the words without proclaiming ORION! have no idea what they are talking about. How does one protect White children under ZOG? How does one become a White Separatist under ZOG? ZOG is no nation & never was, since it is a Zionist (Jew supremacist) empire AND IT ALWAYS WAS, from 1776 to the present! Which came first, The Bank of England or the USA? Who owns that bank? The Rothschilds & their tribe. Who introduced similar banking in the USA as soon as it was founded? Hamilton, the Bank of England agent, & he did it twice! This meant that we gained independence from King George III, but not from his own master, The Bank of England & its Jew bosses. Independence indeed! The third time we lost our theoretical independence was in 1913, with the incorporation of the Federal Reserve Racket; like The so-called Bank of England, the Federal Reserve is a private corporation which does not belong to the USA, nor its government, yet, it controls everything the U.S. government does, by controlling our money supply, as it did when it caused The Great Depression of the 1930's, according to plan. After all, The Federal Reserve is a private business & business exists for profits! Profits mean whatever one can get away with. The Federal Reserve is really big-time crime, but the dumb Goy sheeple don't know & they don't care, any more than the cattle worry about being next to the slaughterhouse, as long as there's food in the trough. That's why the Jews call us "Goyim" ("Cattle"). Sadly, they are right, as long as we behave like cattle. This is the role we have adopted for ourselves, thanks in large part to the Christian doctrine that we are "sheep". When a male Jew comes of age, he is deemed a "man", not a sheep, so there is a lot of cleaning we must do in our own minds before we address the problems posed by non-Whites, including Jews. They are not our misfortune: We are! If we cannot rule ourselves, we shall never free ourselves of alien shepherds, cattle drivers & rulers. In the old movie, "The Battle of Algiers", the Algerians first had to free themselves from their own criminals & degenerates before they could free themselves from their French colonial masters. If charity begins at home, so does house-cleaning. All the best, as always, & ORION!

Eric
