

11-11-05. Hail Kevin! Many thanks, indeed, for the great downloads! The beautiful copies of Hillary, the 'cop', with the 'outstanding' picture of Delay, plus the beautifully 'engraved' peso bill are real gems, which I shall try to duplicate, as well as possible, on my black & white photocopier. Wish me luck!

The NSM was mentioned in USA TODAY's OCT 17th article on the NSM demo in Toledo, OH, which I received today, along with your mailing & that from another correspondent who says the NSM lost another member named George Minner, along with Jacques Pluss, neither of whom I've ever heard of. So much for publicity attracting members! What the NSM demo proves is that niggers can use any excuse to riot: Nazi rumors, sports defeats, sports victories, &c. It must be a "Black Thing". Speaking of which, many thanks for the "Black Invention Myths!" I had no idea there were so many alleged Black inventors! I'm reminded of the old Soviet claims that all inventors who originated anything were from Russia. The others just "copied" those inventions or stole them outright. Sure.

I'd nominate the two Aussies for "Honorary Niggers of the Month", for I think they merit the award as biggest, dumbest bandits in decades. Were they on drugs, or are they just demented dimwits? This is why I believe in eugenics!

An Irish writer who lives in Flaming France describes the IRA & "The Shin Feign" as total sellouts who don't mind wogs & niggers invading Ireland, north & south. The dubious jew-like character, Gerry Adams, seems to be in politics for the money, which is what apparently happened to the Mafia, which started as a nationalist movement against foreign occupation, but degenerated into a bandit gang living off murder, theft, prostitution, extortion & other rackets. Instead of liberating the people, they imposed larceny & looting upon them. So, too, with the IRA, according to this correspondent. It thus appears that the IRA no longer stands for Irish independence, but for Jew World Ordure Globalist Genocide, for profit. That's really too bad, but it's par for the course, all over the world.

He says that the French ^{Interior} Minister, Sarkozy, is a sinister-looking kike who is definitely NOT on the French side in the immigration matter, since he is himself a second-generation jew immigrant. The potential civil war situation between the French & their Afro-Moslem invaders & occupiers could be exacerbated by this jew, who controls the police, & who may want to become premier of France. It was the jews who instigated Europe's Moslem invasion in the first place, so as to destroy the hated Whites, but Moslem Europe may be 'too much of a good thing' for the kikes. It looks like lots of fireworks in the offing, so we shall stay tuned. On a positive note, it appears that the rioters are stimulating the motor vehicle market, for that is what they are burning most of all, in addition to buildings, including their own schools. That sounds like genuine nigger behavior!

The writer in France wonders how one might determine if a 'photo' is a fake when digital reproduction is used. As far as I know, digital retouching is undetectable, unless one knows that the Eiffel Tower is not located in downtown Yakima! It used to be that motion pictures & videos were admissible as forensic evidence in court, since they were much harder to fake than still photos, but now, this is questionable. With digital technology, one could animate a picture of Lincoln & have him dancing a tango with Hillary Clinton! The horror, the horror! The same faking can be done with audiotapes, I understand, based on voice samples. Welcome to "the brave new world" of hokum!

Apparently, the U.S. auto industry was caught napping with the advent of the current oil crisis, for their SUV's are not selling, & they are stuck with the inventories. The Asian automobiles are selling quite well in the USA, despite the oncoming depression, according to a recent New York Times article. Maybe Detroit will just have to give them away! Not bad for a tax writeoff. It appears that the petro-gangsters' greed is ruining rackets for the rest of our kleptocratic economy. If this were Chicago of the 1930's, we might expect some 'hits' in CEO circles. Maybe the oil crooks figure that they rule the roost in rascality, but we shall see. A real government of the people would 'recycle' their ill-gotten gains. That's apparently why Hugo Chavez of Venezuela is giving the oil racketeers the heebie-jeebies. One writer noted that the U.S. imperial adventure in The Middle East has weakened U.S. control in Latin America. It seems like the ghost of Che Guevara is having his revenge, not with "1, 2, 3, many Vietnams," but with many oil-producing countries, too many for the U.S. to handle, with China in the competition for oil in the same regions.

The USA is not only running out of steam, but also out of gas!

All the best & ORION!

Evia
