

23 NOV 05. Hail Chad & Happy Thanksgiving! Thanks for your letter of 21 NOV. I'm glad you received & enjoyed my mailing. Revolutions take on many forms, as I said in my speech: they can be physical, as in the ice age which radically changed what we could eat & how we could live, no matter what was going on in our minds. Then there are revolutions in thought, new perceptions about existing realities. A nation is not a place. It is a people, just as a race is not a place. To use a local example: The Yakamas are a people who call themselves The Yakama Nation. No matter where they go, they are still members of their nation. Now, if they have a home or place for their nation, then they have their own country. This can exist as a territory, although some nations exist without specific territories, like Jews & gypsies. Yet, they are hardy & successful nations, living amongst other nations & empires. An empire is a state with two or more nations. That is why empires are always unstable, & they collapse, sooner or later. Every nation needs its own government or state, or it dies.

What is occurring right now in northwestern states is not White Nationalism, but White Flight, along with non-White immigration. As I said, nationhood must begin in the mind, for a mere assemblage of pale-skinned bipeds does not equal White Nationhood, as we can see today. Whites who are fleeing the racial conditions they helped to create in such places as Mexifornia are part of the problem, not the solution, for they are not Nationalists either in mind or in behavior. As I said to Covington: Change of place cannot save Our Race; only change of mind can save our kind. It does us no good to move around within this Land of ZOG, while maintaining our ZOG mentality, wherever we go. Our White Revolution must begin within ourselves before we seek to change our relationship to the land on which we live.

Ostensible Whites who are already here in "The Great White Hopeland" complain that the new Whites are driving up housing costs, while White wages remain low & actually decline. Meanwhile, their jobs go to China or India (as my last job did), & aliens pour in to take existing jobs, thanks to White employers who prefer to hire aliens. It's a real scam: the employers pay their workers less, & the workers' families obtain more & more from the taxpayers in the form of welfare & social services, including schooling & medical care. As usual, a few get rich & the majority grow poorer, fast! We are living in revolutionary times, but we don't want to think about revolution. The Chinese military strategist, Sun Tzu, would say: "You being invaded. Why you no fightee?" Well, gee, I mean, DUH! There's only one thing to do: Let's switch on the TV & watch NIGGERBALL! Whites have alien government, not self-rule.

Yes, those who criticize our ZOG run the risk of being called "terrorists", "enemy combatants", "Al Qaeda sympathizers", &c. We've had this experience before, during the Civil War, in which the mere accusation that one is a "Copperhead" (Confederate sympathizer) would land you in one of Lincoln's concentration camps. Sure, we all run that risk, but life is fatal, in any case. Herman Goering said that life is much more than the sum total of all the food we've eaten, all the drinks we've downed & all the girls we've laid. There are such things as honor & duty, which make one a man, rather than an animal consumption-excretion unit. The U.S. Army helped me to grow up, above this plane of existence as a seeker of pleasure in the form of consumption. Imagine that you are told that some people have the right to stop you from anything you want to do, & send you any place, at any time, where you may be shot at or told to shoot a total stranger, who might be nicer than your own sergeant! You may be ordered to endure pain & deprivation, on behalf of--what? That bit of reality taught me that there were things more important in life than my next Big Mac, &c. Since I was required to perform duties which were important to strangers, I decided I would perform duties which were important to me & to my race. That's how I landed where I am, with no apologies to make. It is not a matter of bravery, but of necessity, with every means at my disposal, regardless of limitations. This is the primary qualification for a White Nationalist. It's what's inside that counts & no amount of external symbols can make up for it if one lacks the strength & direction of his convictions & his identity as a White, first & foremost. Whites can easily hang out &/or consume together, but they must also think together as a team of White Nationalists. I have worked with people who can be in the same room, but not have anything in common as goals, because they do not see their common identity as Whites. This proves that when you know who you are, you also know what's good or bad for you. Nationalism cannot exist without leaders, followers & a national government. The role of government is to direct, protect & collect (the material means for its support). Hitler said that the state (government) is the vessel which protects the race & the race protects the individual, not vice versa. If people are well-governed by racial awareness, there is little for the state to do, for everyone knows what to do without being told by someone else.

2) This was originally the touted role of the U.S. citizen, according to Jefferson, but the reality was different, for some citizens were 'more equal' than others. Town meetings, which are the closest we have come to direct democracy, in which everyone has a say & can vote on what is said, became rich men's clubs, in which the 'ordinary people' could attend, provided they behaved themselves in terms of their rich masters' rules. Socialists have long said that we cannot have political democracy without economic democracy. The rich can hire thugs to remove dissenting individuals from the political process, which has been the case throughout history, & probably before history was ever written or passed along by word of mouth. Usually, the strongest, smartest & ruthless became the richest in terms of wives, cattle, land & leadership. Kingdoms grew from that, & empires. The only rights were conferred by might, just as now, if we can see through the smokescreen of political propaganda & play-acting. The role of the jewsmedia is similar to a king's court jester who tells the peasants about the supposed doings in the castle & gossip of little importance, while the king picks his subjects' pockets & sends their sons off to war. A king or leader is identified as one who directs the doings of his subjects; protects them from internal or external foes; collects revenues in the form of taxes & rewards his most loyal & diligent subjects or followers. One rewards his friends & punishes his enemies. If you can do that, you are behaving like a leader. Machiavelli advised "The Prince" to behave like a gangster ruler, hiding behind a mask of virtue, but The Prince was one who practiced enlightened self-interest, for he knew that his good was dependent upon the greater good. This was why the Prince served the interests of his state above all, for his good was bound up with the good of his state (government organization) & his people who occupied the lands he ruled. It is said that power corrupts & that absolute power corrupts absolutely. Machiavelli's Prince would know that corruption would threaten his state, & thus his rule, so Machiavelli's clever trick was in making the Prince realize that he must not only appear to be virtuous, but he must be virtuous, that is honest & free of vice & corruption. The jews succeeded in conquering kingdoms from within by pandering to stupid, corrupt & vice-ridden rulers who cared nothing for their state nor for their people. By becoming the king's advisors & tax collectors, as well as his moneylenders, the jews regularly infiltrated & then dominated the Gentiles, who should have invited their frontman ruler to the gallows. This jew racket goes back to Old Testament tales of the jews' infiltration of ancient Egypt, which resulted in them using their influence over Egyptian rulers in order to gyp the Gyppos out of Egypt! They've already done the same to the stupid U.S. Gentiles, so we can expect to suffer similar disasters when our money "fails", as described in the Old Testament. As in ancient Egypt, the Egyptians owned nothing, because it was all owned by the jews. Who owns any property these days? Most people know that the one who holds the mortgage on their property is the real owner, & it is often the bank or another jew moneylender, including bank employees who follow the jews' directions on behalf of their livelihoods. Jews don't change, because they don't have to. Gentiles don't change, because most of them never learn. Leaders are always a minority in any population. According to the Chinese reports on U.S. P.O.W.'s in Korea, fewer than 1 out of 20 had leadership potential. Chinese guards who spoke no English were told to watch for (1) The man to whom other men listened; (2) The man who had a sense of humor, with whom other men laughed; & (3) The man who showed courage, when he faced armed enemies, even as a disarmed prisoner. Such men were segregated in small, heavily-guarded camps, while the 19 out of 20 sheeple were very easy to guard & to rule. According to the U.S. Defence Dept. report I had to study in Air Force ROTC, as a college student, there were no escapes. In fact, young Americans in the sheeple category often died because there was no leader around to tell them to get out of bed! The ZOG's major job is to kill, co-opt (buy off) &/or otherwise neutralize Gentile leaders, so the jews can rule us as Christinsane "sheep", which includes herding, fleecing & slaughtering. Anyone who agrees that he is a sheep does not merit the title of "man", & that's how our enemies like it. A good jew becomes a man in his religion, while a good Christian becomes a sheep in his. Which religion has the correct view? Jews are trained to be rulers, & we are trained to be ruled. That's why we continue to feed & fatten ourselves beside the kosher slaughterhouse. If we were men instead of sheep, things would be different.

All the best & ORION!

ERIC
