

8 DEC 05. Dear Phil: Many thanks for your letter of DEC 4th & the outstanding enclosures! It is pretty easy to foresee events when one learns the motives & capabilities of one's rulers. Our plutocratic kleptocrats want to buy cheap & sell dear, which means importing 'cheap' (for them!) aliens & exporting jobs to China, India et al. When the U.S. population lacks money to buy the Chinese goods, would the capitalists allow the Chinese to absorb their own production by raising Chinese wages? Stay tuned! I still think that our ZOG will permit the Chinese creditors to buy U.S. real estate with their zogbucks, just as they did to the Germans during the Weimar inflation period, in which foreign jews could buy German property very, very cheaply, with their foreign currency, after the criminal devaluation of the German mark. One correspondent wrote that we'd be making a great mistake in equating our situation in Zionist North America with the Germans' situation in the Weimar period. He said that our economy could go Weimar, but there would be no mass-awakening, accompanied by a leader & a mass political consensus, for our culture & our demographics are quite different. Hence, we should look forward to Roman conditions, rather than Weimar conditions, as I tend to agree. Diversity produces chaos & collapse, not consensus & regeneration, & what we have is Roman-style diversity in this Empire of ZOG.

Thanks for "Train Wreck of the Week", downloaded on 29 NOV 05! Bob Chapman is not the only analyst to foresee the possibility of World War III starting in The Middle East, as the USA becomes more desperate & less responsible. We accuse the Moslems of religious fanaticism, but our ZOG is no less fanatical, in view of its Armageddonist tendencies on behalf of Israel. The USA is definitely a threat to world peace, as the French describe us: "firemen who start fires." The USA is like a runaway train, whose crew has no intention of stopping it. If we are luckier than we deserve to be, perhaps a wiser external force may stop our genocidal juggernaut before it reaches a disastrous destination for Planet Earth. The death of this ZOG will mean life for a human remnant, if it occurs in time. Otherwise, we may indeed bequeath this planet to the lowly, but hardy cockroach. The brighter outlook is that, as our situation becomes more hopeless, it becomes less serious. Those who live like cattle die like cattle.

Israel wanted us to destroy the secular Arab government of Iraq, for the jews want The Middle East to return to its former tribal system, which they deem easier to dominate by the imperial tactic of divide & rule. Diversity = weakness, not strength, but diversity is what the jews want for their own flunky, the USA. The latest U.S. involvement in Iraq has produced what the jews think they want: a tribal civil war in Iraq. The danger is that Kurds & Shi-ites may obtain their own nationstates, which ZOG does not want for its Jew World Ordure! Of course these ZOG policies are contradictory: wishing to divide a territory, while wishing to maintain unity under a secular, non-ethnic regime. If the Israeli army were in Iraq, they'd pull out without further ado, just as the Israelis did after Sharon's invasion of Lebanon & its destabilization of that multi-ethnic state. But the U.S. grunts are "only Goyim", so they can stay & bleed, on behalf of Bushy's 'machismo'. Our losses are not Israel's losses!

Others have noted that declining powers' folly leaves them, usually, with only their military forces to brag about. Portugal was declining, so their crazy, Christinsane king Sebastian took the flower of the Portuguese Army on a crazy crusade in North Africa. Neither he nor any of his army came back from their warm welcome at the hands of the Moors! The former USSR was decaying on all fronts at the time they launched their invasion of Afghanistan, the eventual failure of which signalled the end of the USSR. So, too, will be the likely outcome of the U.S.A.'s imperial adventures in Iraq & Afghanistan. Chinese military strategist Sun Tzu would describe the USA as already defeated, largely by its own folly, so its military posturing is merely the fanfare signalling its collapse & surrender to outside forces, such as China, which will have won without firing a shot, just as Sun Tzu taught! Obviously, men were wise, even without computers! Computers prove that technology is no remedy for fools. The job of the army is to serve the state & the job of the state is to serve the people. If the priorities are reversed, the only result is disaster for all.

Stay tuned! All the best. DOWZ! & ORION!

Eric
