

23 DEC 05. Hail Jason! Good Yule to you! I see on your letter's envelope of DEC 17th a postage stamp with a Black snowman. I wonder how one would make a Black snowman, maybe out of road slush. Ha! In Canada alias China-duh, people warned me not to eat yellow snow, 'cause it ain't lemon-flavored. I'm glad to read that time is passing fast for you, as it is for me. People say that time passes quickly when we are having fun, so I guess we're having fun! Don't tell your gulag-zoggies that, or they may kick you out of your residence! CANZOG put me in jail for 2 weeks during my immigration hearing, but they could see I was enjoying myself. It sure beat working! If I'd been a non-White, they'd have put me into a hotel during my immigration hearings, but their zoggies figured they'd punish me; instead, I found the Toronto Don Jail to be pretty nice. It was much better than my cockroach motel which I paid to live in! I also got regular sleep, unlike my regular job, with its odd hours.

Hepatitis comes in 3 main varieties: A, B & C. A comes from eating or drinking things contaminated with the virus. B is usually picked up from unsterile needles, & so is C, as I understand. C is deadly to one's liver, although all hepatitis attacks the liver. That's why it was called "yellow jaundice", for one's skin & eyes took on a yellow tint as one symptom of hepatitis. Fieldmarshal Rommel got his in North Africa, as I understand. Just be careful! Tattoo needles can be contaminated, as well as hypodermics.

Forcing people to mix, when they want to be with their own kind is a ZOG formula for war. If that's what ZOG wants, that's what it'll get, & so will we.

I'm not aware of what Duke did for Whites, but he seemed most able to do things for himself. Lots of people, like myself, also say good things for Whites, but we are not a political party, nor is Duke. Duke promotes Duke. My essay entitled "What We Can Do" refers to our situation. It is based on my own experience. I did not mention another kind of 'leader', for I did not know people could be so stupid to give their hard-earned money to self-promoters who only live FROM the cause of White Power, not FOR it. The real leader creates an organization designed to outlive him. Rockwell did that, but his successors dropped the ball. It appears that Pierce did no better, since his heir seems to have dropped the NA ball which Pierce had passed him. Too bad! The real leader also organizes. This involves speaking & travelling, but it is not limited to speaking, travelling & having one's picture taken. People who get older often prefer to donate their money, rather than go out on street demonstrations. They invest their support in a person who pleases them & tells them that he or she can save Our Race if he or she gets "enough" financial support. This approach is similar to the televangelists who try to sell tickets to heaven, & they largely succeed in doing it!

I don't ALWAYS say that people haven't done anything for Our Race. The only ones I say that about are the ones I know to one degree or another. McVeigh was NOT of value to Whites. He was of tremendous value to the ZOG, which gained lots of sympathy, to cover up ZOG's murder of the Koresh group. After The Murrah Building, we heard no more of the Waco Massacre. The ZOG also used McVeigh to destroy the militia movement, as I understand from people who were in militias. I could run into a synagogue, slit my throat & bleed on their expensive carpet, so blightwingers could say, "At least Eric DID something!" If I carry my team's ball over OUR OWN finish line, instead of the opposing team's finish line, I am not scoring for my team, am I? We have to learn what things SHOULD be done, for all deeds are not equal, especially if they serve the ZOG. In regard to entertainment reading, which I do, in hopes I may discover at least ONE bit of useful information, neither "Hear the Cradle Song" nor "The Turner Diaries" have anything to teach those who wish to learn about insurgency & counter-insurgency, & they must not be confused with reality. I have been in two civil wars, the 1st in Colombia & the second in Africa, so I am comparing experience, not libraries. One book I recommend is Sun Tzu's classic book on military/political strategy. The idea is not to engage in war, but to understand it. We are being invaded & occupied at this moment, but we do not know that we are at war, so we don't fight. Sun Tzu would tell us differently, & he was an ancient Chinaman! If our own government aids the enemy, then our government is also our enemy, in Sun Tzu's analysis, but who could not agree with him? Rockwell was dangerous to the ZOG. In "This Time the World!", he writes of the first attempt, by persons unknown, to shoot him on the way up to his house on Hatemonger Hill. Who pulled the trigger is not important. Who the triggerman worked for is important. Always ask, "Who benefits?" from any action, & you'll have a good clue as to "who done it." Israel attacked U.S. libraries in Egypt, then the USS Liberty, but each time they were found out. Their idea was to incite the USA to attack the Arabs. On 9-11 Israel succeeded! The more Arabs we kill, the more Arabs come into the U.S.A. This is possibly insanity, stupidity or treason, on our part. I met my first Iraqi here in Yakima, & I understand we have 2 mosques. Islam is the fastest-growing religion in
