

JAN 06. Dear Phil! Many thanks, indeed, for your great mailing of 13 JAN 06! It looks as if Covington has finally flopped. What a surprise! Although I have corresponded with him for decades, I never really knew him, nor did I associate with him personally. My dealings with him have been rarely social, but mainly political, the brief time I tried to work with him in Rhodesia, without success, I might add, for Covington was a great saboteur of everything we did, doing things on his own which adversely affected our organizational efforts. When I returned to the USA & tried to start The White Power Movement in 1976, Covington did the same sort of sabotage. I'd say that my association with Harold lasted about one year, after which we went our separate ways. During that time, I had no suspicion, whatsoever, that Covington had any perverted proclivities. In fact, he was apparently quite a skirt-chaser, before & after his marriage, which ended in divorce, I GUESS, for I have ^{certain} knowledge about his female affairs. All I know is ^{hearsay} that he tended to shack up with any sort of female & have children by her. Of course, he could have had closets full of kiddy-porn, but I never had cause to search his closets. The thought of a chance encounter with his dirty socks would be horrifying, as you can imagine.

Let's play devil's advocate & assume that Covington is innocent until proven guilty. The download you sent me (again, many thanks!) stated that Harold was arrested in a "child porn sting," & that he was allegedly "found in possession of large stashes of child pornography." The "sting" suggests that Covington was caught buying the porn, or could the sting have been a plant? Back in the 1960s, the FBI would "find" pot on a victim or his premises. Then the FBI would 'request' that their victim would spy for them, unless he wanted to be arrested by the DEA for possession of drugs, which the FBI was thoughtful enough to bring to their victim! Proof of purchase is one thing, but "possession" is not substantial proof that one has purchased the items in question. The ZOG could park a moving vanload of forbidden material nextdoor, with my name thereon, which they could "find", & then accuse me of "possession" of those items. When we ask "cui bono?" in regard to this arrest, the ADL is first in line. That does raise suspicions about Covington's guilt, in addition to the two jews, Cohen & Abramov, who were Covington's alleged partners in crime. On the other hand, one who is so degenerate as to purchase &/or possess child pornography would probably not object to dealing with jews! If Covington really has been a dealer in porn, then he is a foul fool, for he must have known that he'd be under the ZOG's spotlight. The ZOG loves to eliminate dissenters on criminal charges, rather than overtly political persecution which confers martyrdom on the victim. Criminal charges, especially for degenerate behavior, confer ignominy on the victim, which he may have brought upon himself. In the Soviet Jewnion, dissenters were denied martyrdom because they were defined as "insane" & put into "mental health institutions" instead of normal gulags. With suitable treatment those 'patients' often did become insane, which made Big Brother appear prophetic, as well as correct. As Orwell said: "Who defines controls." Please keep me posted, & I will do the same, when I get word on the progress of this case.

Unfortunately, I do not receive Carlos Porter's material, but what I have seen of it is very good. If you could supply me with any, I'd be most grateful. I once spoke to him on the phone. I believe he called me when I was in Toronto.

The International Forecaster makes very informative reading. As usual, The Detroit Free Press says what few newspapers want to print: in this case, the border fence issue on the Mexican Border with the USA. Hey, if Israel does it to the Arabs, why can't Usreal do the same with the Mexicans? I think the invasion has gone on too long for this belated attempt to assert U.S. sovereignty over its borders, thanks be to ZOG! I think the U.S. CONgress is playing "good cop-bad cop" with the American sheeple. The House talks tough, & the Senate is likely to please presidentes Bush & Fox, who want the border left open, so the invasion can continue.

The Forecaster says that "there will be no invasion of Iraⁿ prior to March 2006." A recently-received German download says Israel has planned to attack Iran in late March, so the manure is liable to obstruct the ventilator economically & militarily in the merry month of March! Even if World War III does not begin in Iran, we've still got lots of fun right here in the Jew Ass Oy Veh alias Aztlan, so it's not as if we shall find life boring.

Keep up the good work for Folk & Future. DOWZ! & ORION!
