

15 JAN 06. Dear Tom: I really appreciated your Aryan Overviews & Insights of 11-11-05, + JAN 6th & 7th of 2006. I heard nothing about the "White" suicide-bomber who blew himself up outside the Oklahoma stadium at the time of the niggerball game. "Probably something he ate," according to the jewsmedia, were they to publicize the incident. Any local coverage you can supply would be most appreciated. ZOG knows things are happening which it wishes to hide from the American sheeple! All I've gathered from jewsmedia sources is the dire fire situation in CO, TX & OK in December & January! It sounds as if the Great American Desert (Central USA) is now in the southern hemisphere, which is in mid-summer. In the NW Land of Amerizog, we are having good, mild, winter weather, with reasonable precipitation. There must be an 'invisible shield' preventing the central states from sharing in our good wet weather, for I worked in fire-suppression for the U.S. Forest Service for 5 complete fire seasons, which conveniently lasted every year from June until September, since I was a student. It seems that someone must have moved the calendar, probably that "extremely-accurate" Mayan calendar which is round, so it could revolve, thereby changing the seasons. End of the world addicts, who were disappointed on Y2K, eagerly leapt on "Planet X", the 10th planet in our solar system, as being the bringer of world-destruction, but that dreaded day seems to have passed without incident. Now they are yammering about The Mayan Calendar, which they claim predicts the end of the world around 2016, if I recall their necro-natter correctly. I suggested that The Mayan Calendar may be like a sundial or even a White man's clock, which comes to the end of the day's cycle, & begins a new one, without exploding or otherwise disintegrating. Boy, that upset my end of the world informant! Imagine the frustration of being denied 3 ends of the world in as many years! What an anti-holocaust. Oy veh! As you say, we are now faced with a combination of "global-warming" + a "new ice age." It reminds me of that 1960s song: "What nature doesn't do to us will be done by our fellow man." It appears that some people are insufficiently entertained by ongoing demographic, economic & political crises, so they need MORE natural disasters than we've been getting, so far. People have been doing their best to bring on natural disasters, by depleting & polluting their natural resources & by moving into areas which are prone to natural disasters, like tornado alleys, floodplains, earthquake zones & fire-prone areas, where fires are followed by mud-slides, as in my native southern California. If those were boring, we also had earthquakes, with more of same promised in the future. My boss in Rhodesia was Chief Registrar of Deeds in the capital, Salisbury, now Harare. He said what he always said to new clerks, that land was a fixed quantity which could not be increased or decreased. I replied that I was from California, where one's lot could fall into the Pacific Ocean or slide into another lot, along with the house built thereon. Eventually, I showed him an example of what I meant in an L.A. Times news photo. He said no more on that subject! I was qualified for the job in The Central Deeds Registry because I could raise a 100 lb. object above my head. This was required for "data-retrieval." The clerks had to climb up steel shelves which held the Land Registers. Each Land Register was approximately 2½' X 3' in area + 6" to 8" thick. The covers were wood, covered with leather & the interior pages were bound with thick steel clamps which were opened & closed with cranks. If one of those books were to fall on one's head or foot, scratch one Registry clerk! It was then that I knew what Dickens described, in 3-D, living color & weight. All entries were made with India ink. The Deeds were on legal-size, 8½" X 14", parchment pages, which were bound in books held together with brass screws & heavy cardboard covers. Those books were usually 3½" thick. Multi-page documents were bound with "redtape", which is really pink. (This was the British colonial civil service, so terms were typically-twisted in Brit-fashion.) Redtape was tied & sealed with embossed sealing wax, as was used for many centuries before. After I learned that red tape was pink, I also learned that the redcoats worn in fox-hunting are called "pink coats." Apparently, the foggy conditions in England impair their color-perceptions, or maybe the booze impairs their speech, or maybe they twist their words so as to confuse & thereby identify foreign spies... I think they do it because they are just typical, contrary Brits: my sort of people.

Will Nature, that Nazi, catch the jews before they make their getaway? And this time, will they need to getaway to another planet, like the jew-aliens in "They Live" who came to despoil Earth? Sometimes fiction resembles truth so much that it is not really fiction at all, but 'super-realism'. When the jews are through with America, those of us who survive will consider the Old Testament Egyptians lucky, indeed! As you observe, Whitey is being fed all sorts of kosher crap about the mestizo invasion. Sure, Pedro 'just' wants to make a living, but how will Whitey make his living, when his jobs are leaving for China & India?

ybe we can all go on welfare & let Pedro & Company do everything, but Pedro's many de-
ents are also going on welfare, in addition to consuming all available public services.
the diligent Chinese are not only manufacturing our goods, but they are also flowing in,
s recently admitted by the Canadian census, which reports that Mandarin is now Canada's 2nd
language, not French! Chinese invaders do not stop in Canada, where they arrive by the con-
tainer shipload & by 747. They come into the USA. That's why the Chinese colonies are grow-
ing so rapidly & Seattle & San Francisco are the Hong Kongs of our west coast. Up in Canada,
Vancouver, B.C., has long been called "Hongcouver", by the politically-incorrect. "American
Jewish World Service" brags that they are importing lots of niggers from Somalia & The Sudan.
The American Renaissance monkey, Jared Taylor, loves jews & hates niggers, so it is no wonder
he has not mentioned the kosher sponsors of this nigger-invasion. His Jewish wife might ob-
ject! Taylor prates that jews are "White", so White man, beware!

I have long noted the correlation between the stock market & U.S. workers: Every time the
workers are fired & laid off, the stock market goes up, but if U.S. workers are not being
sacrificed on behalf of the globalist Jew World Ordure, the stock market declines. One econo-
mist described U.S. mortgage rates as "supernaturally low", & he wrote that the Fed racketeers
must raise interest rates to slow inflation, but that will tighten credit & adversely-affect
the housing-speculation bubble. Zoggies are so scared of that possibility that they deny that
the housing-bubble even exists!

As you say, elections are scams & Congress is the circus part of the Roman bread & circus
tactics of imperial rule. It is generally agreed that we have the best government money can
buy, for Plato correctly predicted that "democracy degenerates naturally into plutocracy,
when the rich discover they can buy votes from the majority." When we know who the plutocrats
are, we can understand why the USA is coming to resemble decadent Rome & Old Testament Egypt.
As Benjamin Disraeli said: "Those who do not understand race can never understand history."
After all, he should have known, as Jewish Prime Minister of Britain! I would not waste time
studying "psychology", which is a particular brand of b.s. written to enhance the incomes of
psychology-writers. Anthropology is more relevant, especially in such a multi-cultural society
as this empire of ZOG. I once showed a summary of Latin American values to a psych student,
omitting the title. I asked him how he would assess a person with such values, like picking
on the weak because they are weak; attitudes toward women, &c. He replied that such a person
would be "sick", possibly psychopathic. I revealed the title, & I said that "psychology" as
taught in the USA was applicable, perhaps, to middleclass Whites, but to no one else, so it
was not a universal subject. Anthropologists discovered that the "universally-applicable
Rorschach Test" was indeed culturally-biased when they encountered Pacific islanders who saw
the inkblots not as objects, but as HOLES in objects!

I tend to doubt that there is any split in Jew-think about the fate of the USA. When such
splits have occurred, they usually involve how best to fleece & slaughter the Goyim. When jews
disagree, the Goyim bleed. I think Orwell noted the ZOG's tactic of using a Bush to take the
discredit for a policy profitable to the ZOG, at the expense of the USA's sheeple. Hillary &
Obama stand in the wings, waiting to carry out the ZOG's post-Bush policies, it appears. As
Orwell noted: "Party members can be wrong, but The Party is always right!" Others have used
such tactics, notably in the espionage racket, in which faithful, loyal agents are sacrificed,
to allow their bosses to escape responsibility for their deeds. Sun Tzu wrote of agents who
were told bogus secrets, & then betrayed to the enemy, so the enemy would obtain false in-
formation by torturing the loyal agents they'd sacrificed. As my father used to say: "Never
get into the spook business & never join the Mafia!" How right he was. As Mark Twain wrote,
the older he became, the wiser his father became. If the ZOG's scheme is correct, the sheeple
will stampede from the Republican Tweedledee to the Democrats' Tweedledum, none the wiser, &
much poorer! Such a deal! As you say, the jews can't help doing what they always do, so maybe
events will surprise us all! I'd be more surprised if they were to continue as they are now.

ZOG-stats are as dubious as ^{were} Soviet-stats about everything in the USSR; as the old saying
goes: figures don't lie, but liars can figure. On this line, I recommend for your evaluation
an article in "Population & Environment" entitled "World Energy Production, Population Growth,
& the Road to the Olduvai Gorge" by Richard C. Duncan. He resides at The Institute on Energy
& Man, 5307 Ravenna Place NE, #1, Seattle, WA 98105. His thesis claims, credibly, that we will
run out of electrical energy by 2030, assuming the depletion of fossil fuels, along with popu-
lation growth absorbing non-fossil fuel-generated electricity. Thence, back to The Stone Age.
Presently, from one to two thirds of energy is lost in the power grid, so decentralized gener-
ation of electricity would be far more efficient than the present centralized system with its
long transmission distances & line-loss of current. All the best! DOWZ! & ORION!
