

TBR Books & Videos for the New Year

The Third Rome: Holy Russia, Tsarism & Orthodoxy

By Dr. M. Raphael Johnson, former editor of THE BARNES REVIEW. Academic historians, liberals and communists have been fashioning a fantasy world around Russian history for nearly 100 years, spreading slander and myth about an entire population. Few nations, rulers or peoples have been subject to such merciless attacks as the Russians have. Now, however, all of that has changed. Here's the first book in English that sets out to defend the history of Tsarist Russia from St. Vladimir to Tsar St. Nicholas II—Russia before bloody Bolshevism. Johnson has emerged as one of the few Western scholars with the skill to tackle Russian history from a Revisionist perspective. Quality softcover, #368, 246 pages, \$24.95 minus 10% for TBR subscribers.

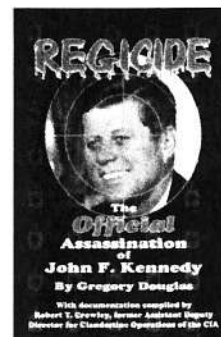

The Dartmoor Massacre: A British Atrocity Against American POWs in the War of 1812

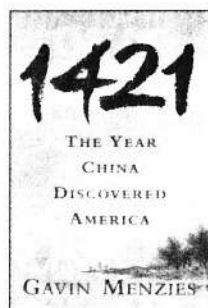

By Vivian Bird. The affair was grisly. Seven Americans were killed and several more would die in the coming weeks from the more than a score that were wounded. No members of the British garrison were killed or injured in any way. Rumors circulated throughout the prison depicting Captain Shortland's attempts to hide and bury the dead before the prison doctor could produce a body count. Also includes: a list of killed and wounded and how they died; the ships from which almost all were impressed by the Royal Navy; depositions from eyewitnesses on all sides; little-known details of the massacre; photos and diagrams. Was one of your ancestors in the prison? Find out! Softcover, 104 pages, Item #319, \$7.95 minus 10% for TBR subscribers.

Regicide: The Official Assassination of JFK

By Gregory Douglas. The author offers evidence from official secret files to document the charge that U.S. intelligence was up to its ears in Kennedy blood. Loaded with reproductions of fantastic official documents that will make your head spin. A must addition to any conspiracy buff's library. Think you know who killed Kennedy? Well here's the written proof. The compiler of this book was also the author of the famed Heinrich Mueller *Gestapo Chief* series and has become well known for his meticulous research. #320, hardcover, 223 pages, \$15 minus 10% for TBR subscribers.

1421: The Year China Discovered America

On March 8, 1421, a huge treasure fleet sailed from its base in China. When they returned in 1423, the emperor had fallen, leaving China in political and economic chaos. The great ships were left to rot at their moorings and records of their journeys were destroyed. Lost in China's self-imposed isolation was the knowledge that Chinese ships had reached America 70 years before Columbus and circumnavigated the globe a century before Magellan. Information compiled from 120 countries, 900 museums, libraries and major seaports operating in the late Middle Ages. Hardback, 552 pages, lots of charts, maps, illustrations and color plates, #370, \$27.95 minus 10% for TBR subscribers

Why Civilizations Self-Destruct

Dr. Elmer Pendell examines the most crucial demographic phenomenon of our age. Perhaps Pendell's most important contribution to modern thought—a contribution which comes through strongly in this volume—is his linkage of inherited social drives to the almost universal tolerance extended to socially intolerable birthrate differences. Softcover, 175 pages, #388, \$16 minus 10% for TBR subscribers.

500,000 Civilians Massacred in Dresden

Firestorm Over Dresden is a video account of the firebombing of Dresden from eyewitnesses who somehow escaped the most dastardly and cowardly attack on a civilian population ever perpetrated. Historian David Irving combines these interviews with archival pre-war film footage and information from Winston Churchill's private diaries to help explain the purposeful massacre of more than 500,000 inhabitants of a city deemed of no military significance. In addition to the great loss of life, thousands of years of art and architecture was destroyed in what had been known before the firebombing raids as the "Florence on the Elbe River." #90, VHS, 77 minutes, \$29.95 minus 10% for TBR subscribers.

25 JAN 06. Dear Tom: Many thanks for your letter & enclosures of 21 JAN 06! Yes, indeed, our ZOG is 'marketing' niggers as if they were precious, rare commodities. The jews know that most dumb Goyim (a likely redundancy) believe anything if it's repeated often enough, & given prominence in the jewsmedia. Ford's "The International Jew" provided examples of the sheenies' payola promotions of songs, in the days that player-pianos were high-tech. Later, their control of the media of information, education & entertainment allowed the hebes to promote such charlatans as Freud, Einstein & Picasso as 'geniuses', & the Goyim lapped up the kosher slop like pigs, dogs or cattle, as the jews classify us. Well, if we behave like two-legged livestock, why not? If it's not true, why do we behave in accordance with the jews' definition of us? The Moslems have a useful concept which is called Jihad or Holy War. As I understand, the toughest part of the battle is within oneself, regardless of the outside world. Islam is defined as "Submission" (to Allah's will), so the good Moslem strives for 'self-conquest'. Apparently, the conquest of infidels is easy, compared to one's personal struggle to achieve "Islam" within. Hitler recognized that all of us must wrestle with our "inner Schweinehund", that is, our personal tendencies toward sloth, greed, cowardice & stupidity. The problem is, for most featherless bipeds, that they are slobs, but they never see themselves as others see them. How does one overcome his inner lout if he is a whole lout & nothing but a lout, & totally unaware that there is anything wrong with that? One thing I noticed on my return to Usreal was the amount of litter denizens drop all over their residential areas, regardless of education or economic status. Rich people have servants to pick up after them, but doctors & middleclass Americans don't, so litter lies where it falls from their careless, heedless fingers. This was as true of an upperclass area in Louisville, KY, as it is in Brownest Yakima, where there is no lack of trash receptacles in convenient locations. I can understand, to some extent, that such bipeds might refrain from stomping out cigarettes on their Persian carpets indoors, for those are 'their' carpets, in 'their' house, but when they go out for a walk or a jog in their neighborhoods, does the notion that they don't have a deed for the landscaped, verdant grounds outside their houses mean that they aren't bothered by the sight of discarded containers, wrappers, cigarette butts, chewing gum, &c.? Why is it so hard to carry a cigarette butt all the way to drop it in the gutter, instead of the lawn? One difference from upperclass "Loserville" & mestizo Yakima is that Yakimorons not only drop litter, but they spit everywhere, especially on sidewalks, which is 'nice', considering we have a local TB epidemic, according to the New York Times. This item was 'somehow' omitted from our local jewspaper which is fondly called The Yakima Harlot-Repulsive, published by self-hating Whites & White-hating mongrels, similar to The Bulawayo Chronicle of former Rhodesia. I have the same wonder about subhumans who slash the seats of public transit vehicles, which they, themselves, are likely to ride every day. I guess they can move to seats which are still unslashed, until they run out of those which lack protruding springs. Let's hear a loud "DUH" from the slobs! I do not see litter as a bad thing in itself, for it is also the tip of our social & mental dungheap, which reflects the swinish, loutish minds of the American majority, as Sherlock Holmes would deduce. One can tell a lot about a society by walking down its streets. On this line, a woman was reported on radio that she got a ticket for littering a Walmart parkinglot with her MacDonald's salad. The woman is going to protest the ticket in court, for she maintains that the salad is biodegradable. "It came from the earth & will go back to the earth" (through the asphalt of the parkinglot?). Well shit is also 'organic', so if she wins that case, watch where you step! Methinks the Turd World cometh, pronto!

A potentially landmark case is underway on illegal mestizo workers employed by a local fatcat felon. A brave & patriotic attorney named Foster is attempting to have the traitors tried under the RICO law (Racketeering-Involved Criminal Organization), based on their hiring of illegal aliens, which (gasp!) is still against the law in the present USA. Stay tuned!

Black Americans are being wooed by the Ghana tourist bureau, so they can return to visit the very places where their fellow Blacks sold their ancestors into slavery, for shipment to plantations in the Americas & the Caribbean. Ghana is using Israeli precedents to provide all Black ex-slaves^{heirs} with passports & citizenship if they so request. Then they can become official "Ghanorrheans". Such a deal! Let's hope that the Back to Africa fad catches on, so as to reverse the Africans' arrival in America. Slavery still exists from whence our former Black slaves' ancestors came, so they may wish they were living in 1850s America, instead of present-day Black Africa!

All the best. DOWZ! & ORION!
