

THE ZOG'S CHILDREN by Eric Thomson. Living as I do in a polywog, mulatto, sambo, mestizo, anti-White area, next to a big Amerasian-mestizo "Nation" or Reservation, I am truly experiencing the ZOG's version of an "All-American city". Ostensible Whites (O.W.s) here are typical anti-White lemmings, who think nothing of selling their futures and those of their children for a moment of relative peace or a few zogbucks toward their hand-to-mouth, debt-slaves' existence. Their lives are fraught with hurry, worry and chaos, with a tawdry cast of wives, ex-wives, girlfriends, boyfriends, ex-husbands et al., along with the gaggles of motley brats, which are the by-product of their mindless couplings. As I gather from observing this typical cross-section of North American society, these children, whom I call ZOG-tots, can be of any chronological age, but for now, I shall merely address those who are legally minors. The ZOG-tot is a menace to himself, to others, to his society and above all, a menace to his parents or parent. He is the child of parents who are themselves children. He is often of mixed race, resembling neither of his biological parents, who are neither willing nor able to provide him with desirable examples to emulate. Perhaps this is why he emulates the bad examples, and adopts the ooga-booga values of the worst Blacks, which consist of noisy, nasty promiscuity and predation. The jewsmedia of education, entertainment and information constantly promote these values and lifestyles. In ZOG indoctrination centers, which are euphemised as "day-care centers" or "schools", the ZOG-tot associates with bullies, gang-bangers, disease-spreaders and dope-pushers, while he receives his disinformation from his so-called teachers. Most children soon become properly dysfunctional in this dysfunctional society, so their own parents learn to fear them, their friends, their diseases and, most of all, the constant threat that they will denounce their parents to the ZOG, which programs them with suitable nomenclature for their prosecution. "Child-abuse" is a catchall term which covers a spectrum of complaints running from gentle chiding to drawing and quartering. Under ZOG, the parent has 100% responsibility for the child, and zero authority, which is deemed "child-abuse". Since the jews are stirring up this mess, we can foresee the outcome here, based on what they achieved in Russia, from 1917 to the present. The kosher commissars of the soviet regime believed that Goy families were a threat to their new, jew state. Parents might contradict the jew-bolsheviks' indoctrination and 'one-world' propaganda at home. The jew solution was to smash the home and remove the children from their parents, as soon as possible. In Russia, their scheme of family-destruction was compulsory. Here, the victims comply voluntarily, but the results are quite the same: the children are alienated from their parents, just as Jesus desired, for he declared that he'd come to turn "father against son", etc. After all, bolshevism borrowed much of its platform from Marx, who borrowed it from Christianity. Jews preached atheism and collectivism to their Goy subjects, but they retained their rights to religion, family and property under the soviet system, just as Bakunin the anarchist foresaw. The destruction of Russian family life which was the outcome of war and bolshevik policies produced roving rabbles of promiscuous, diseased, predatory children, which the bolsheviks themselves had to round up and shoot, so they could achieve their systematic exploitation of their productive Goy victims and subjects. The jew recipe has never varied, although the results are not always to the jews' liking: they are congenital terrorists. Thus did the Russian Goyim experience first the terrors of chaos, then the systematic regime of terror under bolshevik rule. Rule-by-terror was first enunciated by the jew, "Lenin", then implemented by the jew, "Stalin", who was the model for Orwell's Big Brother. "Lenin" said that The Terror was necessary because the Russian Goyim were "damned wantless people". If want could not make them work, then fear and the whip would. Here in North America, the Goyim work, to the jews' delight, because they want everything, even things they have no time to use or enjoy! Although the motivations for the Russian Goyim and the North American Goyim are different, the results are much the same: a growing tax burden and a growing prison population, and 'best' of all, a growing personal and public debt! The outcome of jew misrule over Russia is squalor, crime and poverty. In North America, the Goyim have only their toys to distract them from the growing squalor, crime and poverty here.

Thus it is that the ZOG-tot, of whatever age, is a decadent savage who is utterly dependent on White Civilization for his survival, but who is utterly ignorant, arrogantly ignorant of that fact!

1 FEB 06. Dear Wayne: Many thanks for your letter of 23 JAN 06 & the informative edition of Canadian Heritage News. It appears that the ZOG may succeed in clamping down on the Internet, as<sup>18</sup> apparently succeeding in China. The same means used to crack down on the recipients & purveyors of child pornography will also work on political dissidents. FEDZOG-USA is presently demanding access to Google web access records, as a test case for ZOG supervision of all Internet transactions, such as searches, so they will know who looked for what, at what time, just as the ZOG wants access to such records in public libraries. It is still hard for them to know who pulled which book off a shelf, read it, perhaps copied it, & then put it back in its place. This surveillance would require additional methods, such as making all library books inaccessible to visitors, who would then have to receive their books from a clerk, after showing suitable I.D., for in-house reading. Lots of surveillance cameras could also be used, but the manning requirements could get very expensive & cumbersome. Well, 'security' is never cheap. We wouldn't want Osama bin Laden handling our books with his camel-dung-smeared fingers, now, would we? Obviously, the quality of surveillance & security personnel would have to improve, which would mean major demographic, political, educational & economic changes. One saying which sheeple prate is that "power corrupts & absolute power corrupts absolutely." This is absolutely true in such places as Haiti, for a dictator is no more powerful than his supporters. When a society from top to bottom consists mostly of corrupt & incompetent people, any security system is bound to function as a sieve, rather than a stopper. The USA & Mexico are examples of corrupt governments which cannot even control their borders. When we have the best government money can buy, money talks & it can grease open lots of doors. Corruption leads to vice & vice leads to weakness, so in the real world a tyranny is only as effective as the competence, virtue & efficiency of its minions. Corruption cripples any regime, for its enemies can buy their way into positions of power. The proof of that statement is visible wherever we look.

I see no reason to be discouraged over lack of progress. Aside from the intellectual exercise obtained, it is otherwise a waste of time & effort to seek to convert those who see you as their 'competitor'. Some live in their own fictional worlds, doing battle with demons of their own creation. One fellow excludes all Whites from his concept of White Nationalism if they live outside the USA. Please refrain from dubbing all those blightwingers "White Nationalists", for they are no more White Nationalists than they would be Black Nationalists. Certainly, Black Nationalists far outnumber those of us who are White Nationalists, although I hope that ratio may change. Even one's attempts to co-operate are viewed as 'competition' by many blightwingers. I would drop such people from consideration & I'd save my words & paper for a truly receptive audience. More on that later.

Exchanging information amongst fairly like-minded people who help to spread the word is no more 'preaching to the choir' than it is to run a wire service news network like AP & Reuters, or printing The New York Times on paper or on line. Information may then reach activists. Say that one activist reads an article in a publication, which stimulates him or her to act by contacting fellow activists to organize a protest demonstration, for example. The informed majority who have read the same article usually do nothing, for throughout history, revolutions & resistance groups comprise around 10% of a population. This was true for the so-called American Revolution, the Yugoslavian resistance against the German occupation, &c. The Internet can reach everyone, unlike distributing pamphlets on the streets. Those who log on to pro-White sites may just wish to amuse or to inform themselves. The success of any medium of communication is realized when it reaches & informs people who are activists, who are willing & able to do something in regard to their information.

For 11 years I have also tried the face-to-face approach. To Whites I gently promote White Nationalism; to non-Whites I gently promote AZA. Not one of them would be suitable to receive a Cosmotheism booklet. Not one! At this stage I can report: Prospects: over 100; Results: zero in terms of response. The reason for this lack of success is twofold: one is the lack of interest in changing one's views & adopting a new worldview. The other is that people who are not institutionalized have too many distractions for them to give due consideration to any new way of thinking, let alone behavior. So who are those most likely to consider new ideas & information: the institutionalized, as your prison contact proves. I have a rapidly-growing number of prisoner correspondents whose thinking is as good, if not better than most people on the outside. They have lots of time & freedom with which to read, think & respond, AND, they can also spread the message amongst their friends & families. We can thus turn the ZOG-gulags into White universities, just as the Black & Mexican nationalists have done, & also the Moslem missionaries. Can Whites copy a successful example? Let's try & find out. ORION!

*Eric*
