

22 FEB 06. Hail John! Many thanks for your letter of 15 JAN 06! Your zoggies did not return the letter you mentioned, so I don't know what they forbid. I do not know what NOT to send you if they don't let me know. Did you receive my letters to you dated 28 JAN 06, another written on the same day, & one other dated 4 FEB? As I say, until I get the missing mailing back, I won't know what they objected to.

Many thanks for your great essay on "A White Warrior!" I am honored!

ZOG willing, you will receive the 25 points of the program of The NSDAP, in answer to your question about what The Party stood for.

Hitler's father was an Austrian customs officer, as I recall, & his mother was a housewife. As I recall, Hitler had a brother & two sisters, maybe more, maybe less. Hitler has been compared to Napoleon, who was also a corporal, by his critics, but Hitler never rewarded his family members, nor his friends with Party nor government positions. Hitler's political decisions were based on merit, not personal relationships. He was on a very slim allowance from home, as I understand, so he worked as a day-laborer, digging ditches, among other things. That's how he learned to appreciate the workers' importance & their hardships, for he was one himself. He longed to be an architect, & his drawings & paintings reveal his talent. He sold his artwork on the streets. Hitler's architect, Albert Speer, said that Hitler had an architect's eye for scale, so whatever he drew small, was perfectly proportioned when it was made large, as with his sketch of his people's car or Volkswagen, which Hitler sketched on the back of an envelope in the backseat of his car, while he was on the road! His critics claim that "Hitler was a house-painter, a paper-hanger, &c." That's why his critics denounced such honest work, for Hitler's critics were dishonest men, who preferred such occupations as pimp or usurer. When two FBI men sneered that my father was "just a mechanic" I replied that Lincoln was "just a wood-splitter!" I have more patriotism in my little finger than the ZOG has in its entire mercenary army. The ZOG has more than I do, but that does not mean those who have are any better than us have-nots. At least have-nots can prove that they did nothing wrong, as all Zoggies have, to be rewarded by the ZOG! Despite his poverty, Hitler loved art, music & beauty. When he came to power, he promoted his people's cultural life. I think I've seen a version (kosher? or not?) of Hitler's family background. I don't recall seeing the "Schickelgruber" connection, which was used by Hitler's critics to 'prove' Hitler had jewish ancestry. This could be readily established by DNA testing: any Afro-Asian genes would indicate that Hitler had jewish ancestry, as I tell all his present-day critics, so they can either put up or shut up. Remember: it was no crime to be jewish in The Third Reich. It was only a crime to be a criminal! Since many jews were criminals, they found themselves out of Germany, or doing time for their crimes. I knew many jews who were living in Germany, before, during & after Hitler, & they were never 'persecuted' for being jews. Thousands of German jews fought in the German forces during World War II. Of course, if Hitler were jewish, his critics would have a much bigger problem, for then all the alleged evils of the Nazi period could be blamed on a jew! It is entertaining that jews would want to claim that Hitler was a jew! When one jew caller told me that, I asked if he'd like to see another 'jew' like Hitler. He screamed & hung up the phone. Ha! Hitler left many relatives, so their DNA could be used to test such jewish accusations.

It would be nice to receive my ZOG-blocked letter to you, so I know what it is they forbid. All the best & ORION!

*Eric*
