

14 MAR 06. Dear Phil: It was great to receive your letters of 10 & 11 March & the outstanding enclosures. As the news article of bee deaths indicates, we have been playing fast & loose with our food chain. First, we got the nigger bees from Africa & now this parasitic mite. With all the pollution & diseases in our environment, we may have to grow our food indoors, using bees bred indoors as well, in isolation from potential sources of infection & contamination. Our farms would begin to look like biowarfare labs. Oh brave new world!

The privatization, i.e. internationalization of Indiana highways is merely a logical aspect of globalization under the jew world ordure. The Dubai Ports Scandal may have awakened some American sheeple to the enormous sellout which has occurred of U.S. assets, including vital infrastructure, that is, the means of production & distribution, including electric power facilities. In Montana, privatization & deregulation have been deemed "a disaster," just like the deregulation & 'Enronization' of California's state power facilities, which led to over-pricing & power shortages entirely based on the greed of the sellers & the need of the buyers. When infrastructure items become scarce &/or unreliable, the entire economy, as well as the society, can no longer maintain a regular supply of goods & services. Imagine a factory which would face recurrent power outages. How could it meet production schedules, so as to fill orders on time? No way, Jose! It reminds me of Iraq's wartime electrical shortages, but our excuse for such can only be greed. With crooks, war damage is unnecessary. We are witnessing a return to Robber Baron Capitalism, which was the impetus for labor unions, regulations, socialism & communism in previous centuries. We may see privatization of law enforcement, along with privately run prisons, which already exist. Under such a "free market/monopoly system" we will pay our money & take our chances, much as we do now, under ZOG taxation.

The potential for upheaval is high, in view of the creation of our huge & growing welfare class. Millions of non-producers, including criminals, have produced only consumers of taxpayers' money, but now they are suddenly expected to work & to pay their own way, with \$ they never earned before, in an economy where jobs are scarce, food, housing & transportation costs are rising through the roof, & tremendous demographic changes due to the illegal alien invasion. These are sure objective conditions for revolution, based on my studies of history. The USA is an illusion, aside from being a business address for fly-by-night profiteers & an open cookie jar for increasing swarms of illegal aliens. I can imagine no more exciting times than these, especially since we may be on the eve of World War III.

Present day USA is a creation of the automobile, which may go the way of the dodo, as hard as that is to imagine, but few could imagine that the enormous herds of buffalo would disappear, either. Unless some economical alternative to imported oil is discovered, & unless our economy allows people to earn sufficient to pay all the costs involved with car ownership, many Americans will be hoofing it, as I already do. If drivers must also pay as they go for road-use, sheeple will think twice before they jump into the car & go for a drive. One writer on the Internet enumerated all the social changes which have to occur in a carless society, such as urban planning to enable people to live close to their jobs & retail outlets, schools, &c. as we used to do. That's why high-rise cities came into existence, but planners & developers behave as if the Automobile Era will exist & expand into the infinite future. Maybe, as long as we can afford the price of fuel! But I don't believe in the Tooth Fairy, either. How are we going to pay for oil imports & imports of everything else with our Federal Reserve funny-money? Are foreigners as dumb as we are? Stay tuned! The Catholics have long been subjects of foreboding in regard to their authoritarian hierarchy & its threats of hellfire in order to maintain discipline, but what we see in North America, at least, is an eclectic approach toward church teachings, rather than lock-step obedience. "Man is fallible," as they say. What I see is that the Catholic Church goes where the \$ & the numbers are. In Black Africa, there are polygamous Catholics, along with the incorporation of Voodoo doctrines there & in Latin America. These variations are not included, to my knowledge, in Vatican doctrine, but they are certainly tolerated, as I have seen. In other words, we see a wide divergence between doctrines & disciples in practice. Remember, Nixon was a Quaker, but that did not deter him from war. Our problem currently, is that Bush is a jew, & his orders seem to come from Israel, not the Vatican. Thanks for the 'entertainment ad'. That's what we need: more ugly, jumping niggers. Maybe their gibbering & gyrations can distract us from the disasters on the political, economic & demographic front, here on the USS TITANIC.

All the best, as always. DOWZ! & ORION!

*Eric*
