

23 APR 06. Hail Joshua! Many thanks for your great letter of 18 APR 06! I'm glad you got the pages of the U.S. Constitution, & I enclose the rest with this letter. Thanks, also, for the newspaper clippings about the jew-run concentration camp for Arabs: Zionist Occupied Palestine alias Israel. The jews are starving their prisoners, the Palestinians, but no one dares call it genocide, nor a human rights violation. CIA asset, Osama bin Laden, is stoking up the "crusaders" versus "Islam" line which is what the jews also promote. It's the old "let's you & him fight" trick, which is as old as the jews themselves. We appear to fall for it every time. That's why "wars are the jews' harvests," as economist Werner Sombart wrote around the beginning of the 20th century. It is still true, as it was in the distant past, as with the early crusades. Such a deal!

English is tricky because it is only about 85% phonetic. Words pronounced the same way can be spelled differently & words spelled the same can be pronounced differently. Your use of "stationary" means that which stays in one place. The word you want is "stationery," which means writing paper. My trick for remembering is that "the A stays." A good example of same spelling, different pronunciation is "read." Today I read. Yesterday I read. The pronunciation changes if "read" is in the past or present. So much for trivial pursuit.

Irving is a funny kind of 'historian,' for journalists should check their facts, & historians should be better at that, since they are researching events in the past, whereas journalists are dealing with events in the present. Irving waffles. He changed his mind at least ^{twice} on the Hitler Diary Hoax: once he said they were authentic; later, he said they were fake, or vice versa. Formerly, he believed in "gas chambers", then not, & now he does. All German camps used hydrogen cyanide (HCN), brand name, Zyklon (German for Cyclone). Zyklon-B was the type without the safety odorant, a wartime scarcity measure. As I understand, Zyklon-A had a warning odor to let people know the lethal HCN was about to be released by the crystals which carried it. For the same reason, natural gas has a strong scent added to it, for it does not have much or any odor, otherwise. All German camps used HCN for delousing bedding & clothes, to prevent typhus infections carried by lice. In Auschwitz there were posters warning everyone about the danger of lice: "Eine Laus = Dein Todt" "One louse = your death." If the louse that bit you were not infected with deadly typhus, you would be very lucky. No German camp had lethal gas chambers for humans, except for those camps, such as Dachau, where "gas chambers" were built for propaganda purposes AFTER World War II. The Allies or "All-Lies" alleged that all German camps had lethal gas chambers for people, but in 1960 they changed their lies: Suddenly, all the camps outside Poland were no longer so-called "death-camps," but six camps in Poland remained as official "death-camps" with places deemed to be "gas chambers". When HCN is used, it bonds with any iron on any surface to produce iron compounds, such as ferric ferrocyanide, also called Prussian blue dye. The ferrocyanide chemical bond is permanent, for all practical purposes, so the dye doesn't run, & it embeds itself into a concrete wall, turning the surface dark blue. There are no such dye stains in the so-called gas chambers, according to samples taken on the spot by Fred Leuchter & his team, who also televised the sample-taking at each site. Off limits areas of the camps, such as Auschwitz I, have the actual delousing areas where Zyklon-B (HCN) was used. These areas have walls heavily stained by Prussian blue, where the mattresses were beaten. The "gas chambers" in these areas where delousing occurred are too small & too delicate to use for people. That is why they are off limits. Friends of mine gained access to those areas, however, & took color slides & photos which reveal where HCN was used. Thus, we are supposed to believe that no people were "gassed" where the gas was used, but "millions" were "gassed" where it wasn't used! Gas chambers for people were used in U.S. prisons before, during & after World War II. Their inner surfaces are enamelled to prevent the HCN from bonding with the walls of the real gas chambers. To remove Prussian blue from a concrete surface requires removing that part of the surface which contains the dye. It can't be wiped away, otherwise. The jew-liars should have accused the Germans of using gasses which would not leave a permanent trace, for forensic experts can determine the quantity of HCN necessary to produce a dye stain. The jews were lazy, stupid & arrogant, but we who believe them are lazy, stupid & cowardly. Take your pick. Irving claims to be a jew, perhaps on & off, as with "gassings." He does not favor White, & prefers dark women. All he betrays is the truth. Why he went to Austria, where there was an arrest warrant for him, is a mystery. Even I know there is one for me, were I to visit any country where thought-crime laws are in force! I am not a historian, for I merely pass on what historians have told me, as well as researchers into the Holohoax, such as Fred Leuchter et al.

2) As ZOG wills it, however, I can be deemed a "thought-criminal" if I carry a piece of paper which questions the Holohoax, whether I have read it or not, & whether I agree with it or not. "Conspiracy to commit thought-crime" can be worse than thought-crime itself. If I travelled outside the USA, I would be subject to arrest, according to the recent U.N. Resolution on thought-crime; specifically on Holohoax-Denial. For that matter, the president of Iran could also be arrested if he steps out of his country! The USA may agree to extradite U.S. citizens for thought-crime before it adopts its own Holohoax-Denial law, but there's no guarantee. ZOG only knows!

Well, it's a privilege to correspond with a fellow fire-fighter. In the U.S. Forest Service we envied all other fire-fighting outfits, for they were said to have better funding & equipment than we had. I don't recall working with the California Dept. of Forestry crews, but we sure liked the L.A. County's equipment. On one fire, we nearly drank a whole tanktruck full of their water! The hills were blazing all around & we were drinking the county's water. Shame on us! The others had bulldozers to clear fire breaks, but we followed them with our handtools, like infantry led by a tank.

The jews like to have ready explanations for their atrocities. I'm sure the 5-year old girl they murdered was being trained as a "terrorist."

I enclose a flier for "Fidelitas" so you may contact them about items you want them to publish, in addition to the first one you sent me. They can also send you books, which I cannot, since I'm an individual, not a bookdealer or publisher.

I'm not sure what Jefferson's role was in writing the U.S. Constitution, which replaced The Articles of Confederation. I agree with King George (Bush) II that "it's just a piece of paper," especially since FEDZOGUSA has nullified The Bill of Rights, specifically habeas corpus & due process. Now, any U.S. citizen may be abducted, confined & tortured without being charged nor tried, & he may be confined indefinitely. In Latin American banana republics, people are "disappeared," so we may see this here. The Padilla Case is perhaps #1, although we still know about him. Bush lied that this illegal procedure would not happen to U.S. citizens, but Padilla is a U.S. citizen. Since "terrorist" is undefined, a "Terrorist" could be no one or anyone! The sheeple don't care. I thought a quote from Hitler would liven up the otherwise blank page of The Constitution. I'm glad you enjoyed it, as I do whenever I read it. How true his words are today. No, Hitler did NOT write The Constitution, so you can let your zoggies know that. One viewer of "Triumph of the Will" asked me if that movie were made "before or after World War II?" At least he had the right war. If Bush continues, he may accuse the Constitution of being a "terrorist" document. One newspaper political cartoon showed Jefferson being led away by the FBI for that "terrorist" document called The Declaration of Independence. I'd laugh, but I feel a chill on the back of my neck, so I'll shiver instead.

The hispano-mestizo invasion continues; once illegals are amnestied, more will flood in, which will further increase the "reconquered" territories. It's a corrupt game on both sides. The Mexicans would leave the former U.S. territories if they became part of their beloved Mexico, for there'd be no welfare to support their brats. Mexicans cannot live under Mexican government. That's why they come here. U.S. employers can pay lower wages to illegals, while U.S. tax-payers pay for the illegal workers' dependents. If the employers had to pay them a living wage, with which to support all their dependents, the illegals would not be 'cheap.' The ZOG takes the withholding taxes from the illegal workers, so the ZOG has another incentive for letting them in, but ZOG could receive even more taxes from U.S. workers who were paid U.S. wages! The genocide occurs when Whites must pay to breed, while they must also pay non-Whites to breed. Because of the Mexicans, I could not obtain a low-level job in Brownest Yakima. In Louisville, KY, I worked as a gardener, but try getting such a job here! When I returned to the USA in 1992, I learned that citizens have duties & illegal aliens have rights. At one job center, I read all the racial categories on employment applications & I commented loud enough for others to hear: "My God, we have more racial categories than Nazi Germany!" which is true, unfortunately. Gee, I thought we were all "equal." If "race is not important," then why is it listed on employment & residential application forms? Maybe we should all put "jewish." That way we could call ourselves non-Whites for quota purposes. As you may know, the Mexican Nazi Party is called La Raza Unida (The United Race), yet, they accuse U.S. citizens who dislike their invasion of being "racists!" The USA is fiction. Race is fact. If we do not think as Whites we shall not exist as Whites. "American" is like "terrorist:" It's anything one wants it to be, at any moment. "Who defines controls," as Orwell said, & "might makes right," according to Teddy Roosevelt. I say who controls money controls might.

ORION!

FRID
