

Impeach George W. Bush

No one is above the law, not even the President, especially not the President

Illegal Spying on Americans

This spying included political dissidents and those who oppose the Jew conceived war in Iraq. The chief architects of the Iraq war were two Jews Richard Perle and Paul Wolfowitz who co-authored a report in 1996 called "*Securing the Realm*" which advocated war against Iraq in order to secure Israel's existence. To accomplish this the Jews needed (and got) the cooperation of America's largely Jew controlled media, willing political opportunists like Bush and Cheney, and Israel's fifth columnists in the Anti-Defamation League and the Jew/Israeli lobby.

The argument that the Israel Firsters in the Bush administration used to defend these police state tactics is that they needed warrantless searches to counter terrorism. The fact is that in the over 700 different times that the government asked for warrants for this reason *never* were they turned down from obtaining the warrant they asked for. This illegal spying is in itself an impeachable offense.

In order to quiet opposition to their Jew war aims, the Bush administration has also resurrected the nefarious Cointelpro operations. They have directed the accountants in the IRS and Secret Service (most Americans are unaware that the Secret Service just doesn't protect the president, but also 'investigates economic crimes'. One banker from M&T bank insisted in a Buffalo News article that he has a direct line to the Secret Service) to wage economic war against all who opposed the war in Iraq and who may oppose additional wars planned by the demented madmen in this administration. It is obvious that these plans include the upstart Iran which has a military alliance with Russia. However, it doesn't stop there, according to leaked documents from London, Bush told Tony Blair, Prime Minister of England, that he "wanted to go beyond Iraq" by occupying Saudi Arabia and Pakistan. For those who are not aware, Pakistan, unlike Iran, really does have nuclear weapons.

Illegal Torture

The types of torture that was used at Abu Ghraib, Guantanamo Bay and elsewhere, is not new. The dogs, the isolation, the forced homosexual acts, was simply a recreation of events that Israel has perpetrated against Arabs for decades. In an official report by the United Nations titled, "*Report of Special Committee to Investigate Israeli Practices Affecting Human Rights of the Occupied Territories*", the UN outlined these abuses in detail. All of these practices are a violation of the Articles of the Geneva Convention which was signed by the United States. Bush & Co. adopted the tactics of the Jews and the terrorist state of Israel in clear violation of a major treaty the US signed. The US by the way, signed these articles in order to help protect our own troops from similar torture at the hands of enemy combatants. This is why so many in our military object to Bush's cavalier view of these treaties, a cavalier attitude that carries over to his views on the US Constitution as well.

Illegal War

Bush's "War on Terror" was a pretense to invade Iraq in order to gain the gratitude and support of America's Jewry. He intended to do this all along as has been asserted by one of his former cabinet members and proven by the events that followed. There was no weapons of mass destruction and Bush & Co. knew it. That was only a ruse that Bush used to buffalo the American people into a trumped-up war. It was just another Big Lie!

Col. Lawrence Wilkerson, chief of staff of former secretary of state Colin Powell for 16 years publicly charged that a "cabal" of neocons (Richard Perle, Paul Wolfowitz, and Douglas Feith among others) "hijacked" US foreign policy and drove America into war. Gen. William Odom, former chief of the ultra-secret National Security Agency called Bush's Iraq misadventure, "the biggest disaster in the history of the US".

In Bush's eyes, the Constitution is nothing but an inconvenient and annoying piece of paper. Six months after assuming office he bluntly told the media that his job would be alot easier if this was a dictatorship. This was *before* 9-11. The so-called Patriot Act and his illegal spying only serve to emphasize his megalomania. He has already declared that he wants martial law powers granted to him should there be a bird flu epidemic. Everything always comes down to more and more power with Bush but governing is not about how much power and control one wields, but about developing a consensus through persuasion and diplomacy. George W. Bush is thus unfit to continue to hold office and a danger to America and the world if he is not removed from that office. Salvation begins by supporting the impeachment of George W. Bush.

This is not a question of Right or Left, but of right or wrong. Whether you are a rightwinger or a leftwinger, George W. Bush is a very real threat to us all. At this immediate time all other issues come in second to this one overriding one.

28 APR 06. Dear Günter! Many thanks for the \$20, Your great letter of 24 APR 06 & the important enclosures! Thank you for sending The Toronto Star story about the "Injun Uprising" which received one mention on NPR jewsradio's 11 o'clock morning news broadcast. Then, nothing more. I asked people around town if they had heard anything on the news. Nobody had heard or read anything about it. I was like a character in "The Twilight Zone," the only one who had heard the story. Thanks for confirming that I had heard it right. ZOG has killed the story so far. The Mohawks remain a major pain, because we pay them to multiply: Buy trouble & you get it. I agree that Hitler made a mistake by not capturing the British troops at Dunkirk. Knowing the Brits as I do, I'd have captured the lot & mentioned to the Brits that "We seem to have found a lot of your tourists wearing some kind of festive costumes on the beach. Perhaps we could arrange for you to pay transportation costs of returning them to you. I look forward to your reply in due course. Yours faithfully, A.H." One deals with Brits from a position of strength, not a position of trust, as the Rhodesian Brits discovered, too late!

Like you, I see that we are in a kind of box in regard to the people we reach with our message. I can only communicate with those who wish to communicate with me. I cannot force people to read my message if they don't want to. I could go to a party in which everyone is drunk, & I could tell them about the evils of alcohol, but they'd either kick me out or turn up the nigger 'music.' This is America. It is likely that the ZOG leaves me alone because no one of importance in numbers nor ability heeds my message. When my message becomes relevant to more people, then the ZOG is likely to move against me, but not before. Why should they? I serve to 'prove' that we have freedom of expression, still, in this Land of ZOG, & I certainly do not represent a threat, at least, to my knowledge. As long as David Duke gives sheeple what they apparently want, then my White Nationalist message is no attraction for them. The German people tried EVERYTHING & everyone before they finally tried Hitler, as he said in his inaugural speech, after his election as Chancellor. The American Whites are doing the same, as long as they can get away with it, which won't be much longer. I may not have all the solutions, but I think I have defined our problems pretty well. If we don't know what our problems are, there is little chance we may solve them!

I view the 'lost souls' who write to me as opportunities for mental exercise. I also learn from them how people think & what is important to them. This is necessary for any politician to know. By reproducing some of their correspondence in the form of my replies, I may instruct others. Perhaps I may become "The Leader Who Teaches," as in the Chinese proverb about the 3 types of leaders. I can afford to be patient, for I am not hungry nor homeless & I have the time for such correspondence.

Thanks for the thought-provoking topic on "democracy." As I see it, democracy does not exist. We have .. Zionist dictatorship, Freemasonic republics, which prate of "democracy", but are really plutocracies, as you point out. Democracy means one man, one vote. It also means that the voters decide on candidates AND political issues. Under ZOG we can vote on a pre-selected (by ZOG) list of candidates who tell the usual lies some want to hear, but when they are elected they continue to serve their Zionist-bankster masters. As one Jew wrote: "Weimar Germany had 'too much' democracy!" I do not see 'democracy' in fact nor in name as being 'our misfortune.' I see that we, as individuals, are the source of our real troubles, simply because we adopt the values of the ZOG & conform to its patterns of behavior, even when we have the means to do otherwise. When slaves are so willing to serve alien masters, it is difficult to argue with them. Nature is a good teacher, but Her grading is rough: fail & you die. The Jews are agents of decay, like maggots which consume dead flesh. If the majority of Whites are dead to their racial interests & even their individual interests, then the Jew-maggots are performing a natural service in our societies.

Again, I shall consider the topic you have recommended, & I may suddenly get an inspiration which will allow me to examine 'democracy' in a refreshing & informative manner, which others have not already stated. You probably remember that Athens' "democracy" was about 10% of the population, of which 90% were women & slaves! This sounds a lot like the plutocracy we currently live under, although less than 10% probably qualify as 'voters' under ZOG. Henry Ford opined that only 300 men directed the world's affairs in his time, so "democracy" as the Jewsmidia portray it is just an illusion, not a reality, any more than the Mafia is a "democracy." More thoughts will follow.

All the best, as always, & ORION!

Eric
