13 JUNE 06. Dear Brian: Many thanks for your mailing of 6-6-06, with your letter & enclosures. Great artwork! I appreciate your descriptions of your demographic experience in mongrel France, which confirms the Bhagavad Gita warning against race-mixing. My paraphrasing thereof is: If you don't know who you are, you won't know what is good or bad for you. It is this loss of understanding which is the root of "all evil," which begins with "the corruption of women." I like your creative approach toward communication. Rockwell had a cute parody entitled "Communism is Irish." It showed a cartoon of a grinning jew in a leprechaun costume, accompanied by all the 'proof' that "Communism is Irish!" Would your message go over with the Irish if you were to wear such a costume in blackface? It would be a hoot for a 'wannabe Black' speaking with an Irish brogue on behalf of "Black Irish!" Ha. I believe the Good Doctor (Goebbels) said: "Propaganda is what works." The Zud had a slogan above the door in his studio: "It's not propaganda if it doesn't sell!" We see the truth of this slogan when millions of Whites pay to watch the jews' anti-White propaganda. Such a deal!

Let's get back to scientific research on race: There are 3 Races: Black, White & Yellow. They are divided into subraces, or nations, which are divided into tribes. There are 3 hair types which correspond to the 3 races. DNA findings support this thesis. The systems of racial classification you have studied are derived from 19th century tape & caliper measurements. They are not scientific, hence they are unrelated to racial reality in terms of biology. The obvious proof of this is that "races" are related to places, such as "European," "Hither Asiatic," &c. or they are related to skeletal proportions, which may correlate with race, but they correspond as well with mixtures of races, nations, tribes, &c. Race is a fact, not an emotion, just as one is tall, short or in between, regardless of how one feels, how one wants to be, how tall one's ancestors were, where they came from, &c. Again, this is not race, but emotions, locations, cultures & traditions. The mixture of nations, such as a White Frenchman with a White German, are not racial mixtures, since both nations are White. Confusion can lead us nowhere. Some "nordics" are White. Most are not, for "nordic" is a place, not a race. Eskimoos (Asians or Yellows) are abundant in the North, as are Eurasians (mongrels) such as Finns & Lapps, denizens of Siberia, &c., so "nordic" is as unscientific in racial terms as is "American," which includes any featherless biped living in North or South America.

Politics is people-power. How it is conducted does depend on emotions, traditions, cultures & locations, as well as race. This is The Gordian Knot with which we are confronted, but if we are to think racially, we must be scientific about race, using modern DNA science, which can identify one's real, biological parents, rather than the ones recorded in traditional genealogies. I understand that the U.S. military uses DNA to identify its soldiers, sailors et al., for family 'records' are frequently false in regard to family membership, usually on the father's side. A child may have more than one 'father' (one real, the other legal), but only one mother in terms of racial/biological fact. If the denizens of Southern Europe envy tall blond people. That is their problem. Obviously, they must envy them to some extent, but a short, dark person may have White DNA, whereas a tall blond may have Yellow genes in his DNA, so he'd be "nordic," but non-White.

I note that you seem to assume that people such as de Valera, Canaris (Meyerbeer), Franco et al. were not jews. My sources say they were. Franco & de Valera were, apparently, conversos, or jews whose ancestors had adopted Christinsanity, at least outwardly. A Christinsane person would claim that such "converts" were not jews, but Cardinal Lustiger declared the distinction between religion & nationality when he proclaimed publicly: "I am a Christian, but I remain a jew!" (I am a Buddhist, but I remain English, would be just as correct.) Gentiles confuse religion with nationality, just as jews like to do with Gentiles. Under jewish law, jewishness depends on one's mother, NOT on one's father. I knew several ½ jews in Europe who could not become Israelis because their mothers were not jews by birth, only their fathers. That's why they lived in Europe & not in Israel, as they told me. If "jewish" is a religion, then why are over two thirds of Israelis classified as "secular jews?" How many "secular Catholics" do you know? I don't know of any "secular" Christians, Moslems or even Presbyterians, nor do I know any ½ Catholics or ½ Protestants, so "jewishness" is something distinct from religion, Christians to the contrary. I agree with jews, that one's nationality does not change with his religion; only if he race-mixes, but that change will occur with his offspring.

I have no stake in declaring people to be jews or not. Traitors can be jews or not, I only rely upon my sources to denote one as a jew. People who are traitors are not necessarily jews, any more than people who buy me lunch are 'not' jews, as the blightwingers claim.

2) I see no point in going to Iran. My value is that I am here to speak to my own people, without becoming a foreign agent, as I would be if I became a mouthpiece for Iranian politics. Moslems often want converts to Islam, not secular or infidel allies, & I do not propose to escape one Semitic religion only to fall into another! Gypsies are jews who don't run banks.

The film on the 1914 Yule Truce must be poignant, just as the Hebrewwood film, "Paths of Glory," which starred the jew, Kirk Douglas, as a French captain in WWI. A French general is offended when the French troops fail to cross no man's land, because they have been mowed down by German machinegun bullets, so the French general accuses his troops of "cowardice," & orders the French artillery to bombard the French positions. The French artillery commander wisely insists that the order be put in writing, so the French general is really frustrated that he cannot make the French soldiers die of French bullets if they "are too cowardly to die from German bullets." At first, the French proposed to execute all surviving members of the "cowardly" companies, but they settled for one man from each, to be executed by firing squad. As I understand, this was based on truth, as is "Joyeux Noel." There are great films available, as you note.

My personal experience has been that I get along quite easily with Germans & Spaniards, but, however I try, I feel some sort of antagonism from the French. Perhaps I could get along better if I were fluent in French, like an Algerian or Gypsy. Ha! Language was not really a problem, for the French I knew were quite fluent in English! I certainly had no reason to dislike the French, but they acted as if I did, which is quite disconcerting. I found quite soon that I was tolerated when they thought I was German! Max Hastings reveals one major reason why in his book, "Operation Overlord," which cites the horrendous British & U.S. carpet-bombings of French towns, in conjunction with the Normandy Invasion. As I gathered, more French civilians were killed by the British & Americans in that phase of WWII than the Germans killed in 3 wars against France! German soldiers killed French soldiers in those wars, but only rarely did they kill French civilians, nor did the Germans use nigger troops to rape French civilians, as did the Americans. No wonder I received a chilly welcome when I was "an American in Paris!" where I had to order my train ticket in German, or not at all.

In view of our willful confusion about race, we are likely to fall into Rockwell's situation in which our "skin color will be our uniforms." When the obvious non-Whites declare "Death to the Whites," pale-skinned bipeds must unite & sort the DNA out later, if ever. A world without Whites could use some form of fascism, or corporate state government, but I doubt that a mongrel society could have any rational form of government, nor large states, outside the rule of a Genghis Khan, Tamerlane, or perhaps a Saladin. A dictatorship with a eugenic program can improve, but dictatorship without eugenics would create something like India, Egypt or Latin America. As you noted, it is folly for Irish to lump non-Whites with Whites in Ireland. There is a big difference! even if the Whites are not Irish.

As you say, we may be voices crying in the wilderness, as long as the masses of sheeple see nothing wrong with their lives under ZOG-bankster rule. One out of 20 is the known ratio of potential leaders to the number of potential followers. Lack of Internet babble allows me to do the work I can do, without secretarial assistance, as I seek the 1 out of 20 who may see value in my message. The place in Brazil is a German colony called Blumenau.

In regard to infiltrators, my essay on "What We Can Do" refers, as well as my letter to ZOG-POW Anthony.

Hong Kong was like the former Portuguese colony of Macao, whose roles switched from being a European finger into China, into being a Chinese finger into Europe. During The Cold War, the British colluded with the Red Chinese to export Chinese goods as "Made in Hong Kong" & the Portuguese did likewise. As I recall, Hong Kong's 'immense' cotton plantations supplied the world with "Made in Hong Kong" shirts, & Macao supplied the world's market for firecrackers. When China got recognition, Hong Kong & Macao had no further purpose, as camouflage for Chinese trade. The British & Portuguese no longer had much to sell China, so the end of the lease on Hong Kong was no loss for Britain, which no longer exports opium to China! As I say: The jews & Gypsies prove that one's state must first exist in one's mind, for it to exist anywhere. Jews & Gypsies bring their states with them, & so must Whites, without a state of mind, we can have no state on a map. The map of Ireland seems to show that the Irish lack a state of mind, so they behave like creatures who have residence in a place, but no real sense of race nor of nationstate. Maybe you can wake them up! Otherwise, the Irish will lose Ireland. As a bit of "Black propaganda," you might sponsor a contest for renaming Ireland, perhaps as

3) "New Hong Kong" or "New Jamaica!" The most likely outcome will be "New Babel." You can advertise it as "Diversity: Insanity Whose Time Has Come!" There must be a way of mobilizing the Irish Diaspora, whose members must be more awake than the native dwellers of Ireland. Travel is certainly educational. I wonder if Hitler would have been so pro-British if he'd spent much time on the British Isles, especially London!

To return to the racial topic, I seem to recall Dr. Oliver writing about the discovery of a Portuguese enclave on the west coast of Africa. It consisted of a fort inhabited by niggers, who were fighting another bunch of niggers. Those outside the fort were "Africans" & those inside the fort were "Portuguese." What had occurred in the days of sailing ships was miscegenation, in which the original Portuguese soldiers had taken native women, & thus vanished into the Black African majority. Nevertheless, their Black offspring declared that they were "Portuguese" & therefore "White," as did their Black tribal enemies. In North America, the majority mestizo population divides into "Indians" & "Whites." All are mestizos (Eurasians), but some behave as Whites, albeit anti-White, & others dub themselves "Indians." In Latin America, the mestizos are darker, but they consider themselves "Indians" or other by the languages they speak & their lifestyles. A "non-Indian" mestizo speaks Spanish, wears shoes or boots & lives in a town, rather than a village, according to their own definition. If the famous mestizo, Will Rogers, were to don Indian headdress, he'd be a member of his "tribe," & if he put on his trademark cowboy hat, he'd be "White." A Brazilian woman claimed that anyone who ate with a knife & fork was "White." Then, if there is an obvious lack of "Whiteness," people talk about "Christian," or "civilized." Some Ameromestizos use "Aryan" in lieu of "White," since they are not White & they know it. They just don't know what Aryan means! Reverting to 19th century calipers, a long-nosed mestizo could also be "Caucasian." Some Japanese have long noses, so they could qualify as "Caucasian."

Our ZOG empire propagandized the creation of "Americans", just as the Soviet Jewnion propagandized the creation of "Socialist Man," but neither the USA nor the USSR eliminated ethnicity, real or imagined. Christinsanity was another ancient, & unsuccessful attempt to erase ethnicity. Instead, it resulted in ethnic churches. As I observed in "Demographic Dementia," race has rarely ever been a source of human conflict, nor a prize to be preserved. Land, women, wealth, livestock, hunting grounds, cities, slaves, &c. have been the ancient causes of human conflicts, as we see anciently & currently with all peoples on this planet. Only when race becomes an issue will people fight about it. Jews want people to fight, so they can increase their wealth & power, by lending each side money. Then, "let's you & him fight!" Douglas Reed predicted in 1947 that the founders of Communism would switch to Zionism & racism to stoke the profitable fires of struggle, for "Wars are the jews' harvests," as economist Werner Sombart wrote. For Whites, the fact of race is becoming important as we learn about genetics & its bearing on intelligence & behavior, for we are, after all, biological entities. The time I have spent amongst non-White peoples & cultures enabled me to appreciate the differences, & to learn that behavior & culture is biologically-based. What else would explain the behavior of Blacks in America who've never seen Africa, nor lived in a traditional tribal setting? After some 500 years of contact with "Western Civilization," Blacks still behave much as they do in their natural tribal environment, even when they do not have tribal status. We see that Robert Mugabe wears a suit & has "White" status symbols, but his behavior & values remain stone age, despite his "Western Education." Jews can come from anywhere, have any social background & education, & they still behave as jews, just as other criminals behave as criminals, regardless of garb, culture, education & social skills. Criminal behavior seems to run in families, according to my own experience, as does social parasitism, so genetics is more than skin-deep: It is what we are & what we will do, in patterns of behavior. By bringing in "diversity," our ZOG s & bankster-rulers guarantee that conflicts will arise to supplement or to supersede existing conflicts, since we lack the intelligence, the courage & the identity with which to prevent them.

As I gather from Greek history, Greeks were distinguished from Turks only by their religion: Christians went to newly-independent Greece & Moslems remained in newly-formed Turkey, with the end of the Turkish Empire. Macedonians, whom I know, distinguish themselves from Greeks & Turks, although I do not know how nor why. Perhaps it is a regional ethnicity, as with Albanians & other Balkanese denizens. In Brownest Yakima, I live on the border between two mestizo gangs: the Sureños & the Norteños, who are distinguished solely by their gang colors, not by DNA nor by behavior. Contacts in the police force tell me that gang warfare is frequent in this barrio or neighborhood. I said that I could tell them that, myself! We hear periodic gunshots, including an AK-47, which one of my fellow veteranneighbors was

4) able to spot from his vantage point in our building, & he quickly dialed 9-11 to summon the cops to the shooter's location. I've heard no more AK-47 shots since, so they may have captured the shooter or scared him so as to hide his weapon. With illegal aliens come illegal drugs, diseases & weapons. Fast-breeding mestizos are the gangs & warlords of the future, if things proceed on their current trends. That's why I report in my letters that it's all quiet on the Western Front, if it is. This is also why I consider my residence a 'position', rather than a 'home,' whatever a home might be. As a camper, I noted my attachment to my campsites, which I felt when it was time to break camp & move out. I also note my attachment to my dwelling places, to which I become accustomed, but neither habit nor attachments prevent me from moving out, whenever appropriate! I also keep a 'bug-out bag' of bare essentials handy, should I be required to leave at short notice. These habits I bring with me out of the jungles & forests of my past experience, for they pay off in emergencies.

As you say, White Nationalism is in its infancy, & it never appears to have existed in name, until Whites are threatened with extinction, wherever they dwell on this planet. To think globally also means to think racially. That is our crisis & also our opportunity. But if we wish to think racially, we must define what is meant by race. One writer coined the set of physiotypes which were invested with 'racial' aspects: ectomorphs, endomorphs & mesomorphs, as I recall. Ectomorphs were tall & slim, usually with nervous dispositions. Endomorphs were short & fat, with more stolid, phlegmatic dispositions, while mesomorphs were in between, with athletic tendencies. Such physiotypes transcended 'racial' characteristics of the 19th century caliper period. I have noted a correlation of behavior with such physiotypes wherever I have travelled. It stands to reason, since fat people must think before they exert themselves to move around, while mesomorphs move around because they enjoy it, & ectomorphs move around because they tend toward nervous irritability, according to their statements. If a person lacks fat buttocks, he or she tends to become uncomfortable in unpadded chairs, which causes shifting about because of discomfort. From my own observations, the 3 'morphs' have as much in common as do the 3 races, for there appears to be a strong correlation with physical morphology & behavior, regardless of 'race' & culture. It may be that miscegenation of 'morphs' is as important as mixing of breeds of animals, like dachshunds & great Danes or Arabians with Clydesdales.

Most so-called White Nationalists put money far ahead of race, so the jews have an easy target for inciting Whites & part-Whites into their latest 'crusade' against Moslems in Moslem countries, as they allow Moslems to invade formerly White countries. As science proves, neither Southern nor Northern Europeans need be White. In Toronto, I have noted a high incidence of sickle cell anemia in Greek & Italian families, according to their own statements. Sickle cell anemia means one thing: Black admixture. Those with Yellow admixture report allergic reactions to milk products, as do some Blacks, for whom milk is indigestible, as is widely publicised in ads promoting milk substitutes made of soybeans, using Black models. I know several local mestizos who tell me they cannot digest milk in any form, which is tragic, for Mexican food includes sour cream!

Now that DNA is recognized as the scientific way of identifying racial characteristics, I would suggest that DNA testing be done before a couple plans to have children, just as a syphilis test was mandatory for U.S. couples getting marriage licences. Dr. Israel Shahak said in a Toronto speech that if a jew rocks the boat in Israel, his genealogy is checked to determine if he has any non-jew female ancestors, going back 4 generations. If there was a non-jewess within that bracket, the jew is deemed non-jewish, which makes him an 'unperson' in the jewish state of Israel. His marriage is nullified; his children ousted from jewish schools, his family evicted from jewish neighborhoods. One who thought himself jewish suddenly becomes defined as a Goy or Gentile. Since he is not an Arab Israeli, he has no status in Israel as a citizen nor as a resident. His devout relatives hold a "cherem" for him, a funeral, & treat him as if he were really dead. Such a deal! If buried in Israel, his non-jewish female ancestor is also ejected from the jewish cemetery, in accordance with jewish law. It is logical that White Nationalists, especially those who want children, should have their DNA checked. When I advised that to Covington, I heard no more from him. I am disgusted with mestizos playing at "White," as occurs so frequently in America. Apparently, such DNA tests would interfere with Covington's funding. Oy veh! If it turns out that no one is White, then we should discard the WN concept forthwith, possibly in favor of 'degrees of Whiteness' as in Brazil, where it is a matter of complexion only. I strongly suspect that the degree of Indian admixture had much to do with U.S. participation in the two genocidal wars against

5) White Europeans in the 20th century. Having lived in Europe, from north to south, I note a peculiar reptilian tendency in American "White" behavior, which I have learned to be a sign of Yellow admixture, a tendency to lie in wait, in a state of sloth, until passing prey triggers a predatory pounce. I have known many self-admitted Anglo-mestizos who behave that way, & who also voice their hatred of people who are "Whiter" than they are. In "The Day of the Avenger," the mestizo author & witness to the Dachau Massacre, Buechner, records the attitudes & behavior of the American Indian unit whom he accompanied to the camp under the command of a Lt. Bushyhead. Dachau had an ongoing typhus epidemic, due to wartime shortages & overcrowding, so the Red Cross requested that the Germans continue to guard the camp, for orderly handover to the invading Allied forces. Hungarian SS hospital inmates capable of walking were detailed for the task as camp guards. As the American forces arrived, they duly handed over guard duties to the invaders, including the Amerimestizo "Indians". Beuchner writes that these semi-Asiatics could not stand the lack of fear displayed by the "White" camp guards, so Bushyhead rounded them up against a wall, as photographed, & machinegunned them. After murdering half the guards, Bushyhead figured he'd better murder the rest, so he did it in two batches. Buechner lamely wrote that the "Indians" did it to avenge themselves on Whites because of their victories against the "American Indians," also admitting that the Dachau camp guards had no role in those events, nor ^{for} responsibility for the terrible state of the camp, since the guards had just arrived at their posts, shortly before the U.S. invasion of the area. Patton heard of the massacre of some 500 guards, who'd surrendered peacefully, & ordered the destruction of all photos thereof, by burning them in his wastebasket. The mestizo, Buechner, kept his & used them in the composition of "Day of the Avenger," which constituted a hard-covered, numbered confession to murder! So Dachau has a fake gas chamber & a real Injun massacre to its name! What an attraction for Injun-loving, self-hating German tourists that will be.

You must be lucky. The only specimens from Minnesota I've ever met were dark, Mongoloid mestizos who claimed to be "Norwegian." I recently encountered a self-proclaimed "Viking" or "Norseman" who had all the physical attributes of a sambo: part Yellow, part Black. He came from Minnesota, he said, & added that the "bad" Vikings had blue eyes, pale skin & blond hair. I agreed that they were not just 'bad', but terrible! I should know! Ha.

The WN slogan of ORION! (Our Race Is Our Nation!) is exactly a White International that you describe, for it supersedes all current citizenship in favor of race & the creation of a racial nationstate. I do not need as much help as the Iranians do, so I shall let them write me at my P.O. Box, if they wish, as all others are invited to do. As you say, lack of staff does impede creativity & activity, so we must tailor our cloth accordingly by living within our means. This is also congruent with our existence IN TIME, in terms of the Zeitgeist or spirit of the times, so politics is indeed "the art of the possible." I am content with my present state of being. If others are not content with theirs, they should apply their minds, & when all else fails, they should drop me a line, poor devils!

I'm surprised that you'd mention "The Old Mole" bookshop. I first heard about it from Dr. Faurisson. I immediately said, "Old Mole," wasn't that Lenin's code name for the Communist Party? Or, perhaps, even a term used by Marx?" Dr. Faurisson said it was. I understand that they carried Dr. Faurisson's revisionist writings until their functionary, Gillaume (?) got in trouble with Francozog as a thought-criminal, around the time of Faurisson's own judicial persecutions. That grisly quote about someone being strangled with another's guts I first heard from Communist Party USA leader, Gus Hall (berg) at Berkeley, when I was an undergraduate at the University of California. I have an excellent background in Red studies, thanks be to ZOG! That was my entry into Jewish studies, under the umbrella of International Relations. I also learned that universities are places where Goyim study their subjects & Jews study 'their' Goyim, so they learn how to manipulate them. This was apparent during my graduate studies at San Francisco State University in the late 1960s, during the Jew-led student riots. I agree that revolutions must be totalitarian, that is, go all-out, as some of Hitler's critics have observed with 20-20 hindsight. This was The Zud's major defect & proved to be as disastrous for him as it would be for a general to half-commit his forces in battle, & then to camp out in no man's land, as if the war were over! Half-measures are a formula for defeat, without really fighting. There is a certain wisdom in the slogan: "Victory or Death!" After all, life is always fatal, whatever we do, so why not fight to win? The Zud would say: "Hey, I've stopped fighting, so why do you keep hitting me? Oy veh!"

Keep up the Struggle. All the best & ORION!

ESK
