

15 AUG 06. Dear Brian! Many thanks for your letters & enclosures of 7 AUG 06, including the CD! Covington seems to be ubiquitous in his touting of Covingtonia, The Great White Hopeland. What I note in his propaganda is a lack of ideology, in favor of moving pale-skinned bodies into the northwestern USA, just across the line from Chinese Canada alias "Hongcouver", British Columbia. He also omits any mention of the substantial Amerasian population alias Indians, in this majority non-White area. His promotion of migration is legal, but his advocacy of secession from the USA is not. Recently, he has advertised his violent fiction as "subversive", as in the enclosed flier, which rips off the veil of fiction in favor of what ZOG may interpret as illegal advocacy, to wit: advocating armed secession from the USA, which has been illegal since 1861. I wonder what he thinks he is up to, & we shall see in due course. His words may bode ill for those on his mailinglist. ZOG only knows! You made appropriate use of his material. Waste not, want not.

16 AUG 06. Jewradio made much of the "Whiteness" of Covingtonia, which would include the northwestern U.S. states, Oregon, being the southernmost, since it borders with "Mexifornia." Zionist demographics are treacherous, like equally kosher Soviet statistics, for the word, "White," includes non-Whites. U.S. FEDERAL Wanted Posters use "race" to classify offenders wanted on federal charges, so this ZOG-view is what passes for "race" in the USA: American Indians, who are mestizos (Eurasians) to one degree or another, are deemed "White!" All "Hispanics" are deemed "White," even if they are tri-racial mongrels with a great Black admixture. In Hispanic countries, Black slaves were absorbed & mixed with the mestizo populations, especially in the coastal regions, as I can state from personal observations.

Mestizos are produced by all groups in The Western Hemisphere, as are mulattos who are defined as $\frac{1}{2}$ Black, $\frac{1}{2}$ White. A sambo is $\frac{1}{2}$ Yellow, $\frac{1}{2}$ Black. In Brazil, varying mixtures of all 3 races are lumped together as pardos or mixed breeds. In English, mestizos were usually called "half-breeds" or "metis" in French. In Brazilian tradition, a pardo with a drop of White blood can be deemed "White." A pardo told me that anyone who uses a knife & fork is "White." Those who use their fingers or just a knife or spoon are not! That would mean I had changed my "race" when I ate my army rations, & whenever I eat a sandwich. Absurdity is bound to occur with misuse of language, as when biology is confused with table manners.

A major theme in North American society is one's being able to "pass for White." I knew two mulatto sisters who attended my high school in California. One was obviously Black in complexion & features, whereas the other could "pass for White" if she stayed out of the sun & kept her hair straight. When one knows who the parents are, one knows what one is dealing with. America taught me a lot, which conforms with your view on colonial life in which one lives apart from his own kind. I can speak from firsthand experience, having lived in North America, as I do now.

We know how Catholics promoted race-mixing in Latin America, but what is not generally known is how Freemasons like Jefferson & groups like Mormons promoted race-mixing with the so-called American Indians. Hence, the Anglo-mestizo population. If Indians are deemed as "White," then mestizos would be "White," according to Zionist 'logic.' How long have Whites been THE minority in North America? A lot longer than we'd care to know. As you say, the worst anti-Whites are mongrels who pass for White. I suspect this is the underlying reason for Americans' anti-White role in history. I note that there is a strong tendency for those who want to be deemed "White" to seek to harm those who are "Whiter" than they are. Jews behave this way in terms of envy toward those who are good-looking, brighter & wealthier than many Jews are. "The best of the Goyim should be killed," according to their Talmud. It has been noted that Jews would become extinct if they could realize their ambitions of becoming tall, blond & good-looking. In lieu of that, they concentrate their efforts on eliminating those people with such traits.

The Ku Klux Klan has long been a haven for wannabe Whites, as I've seen. That is why I object to any state based on "White Supremacy," including South Africa, where "White" was pretty much arbitrary, based on ostensible family, rather than individual^{the} race. I've seen families with the same name whose members were obviously different races! Now that we can test for DNA, race may become the proper field of biology, rather than psychology & political opportunism.

Were race not important, we could ignore it, just as Semitic race-mixing cults & our Zionist Occupation Government advise us. I began life as a non-racist, but I soon learned from non-Whites that race = identity = interests. I learned that my interests did not conform with others' interests, chiefly those who were non-White & mixed.

2) I have lived in alien cultures, so I could identify my ways in distinction to the ways of others, regardless of language. I felt at home in Sweden & Germany, even though they did not speak English, but their ways were in accordance with mine, unlike non-White countries & cultures. Soon came the realization that "The American Way" was alien to me as a White man. It had become so after World War II, most notably with the Judeo-Africanization of media-borne music. During WWII, AM radio usually played European & American classical music, but this was rapidly replaced by sambo 'music'. The samba is a form of Afro-Brazilian dance music. The word means, literally, a female mongrel of Yellow-Black admixture, in brief, jew 'soul' music. You can imagine my consternation in 1946 when the classical music program was replaced by such Judeo-American cultural 'triumphs' as "Cement-mixer, puttee-puttee," & later by "Open the Door, Richard." My elementary school teachers were female non-Whites & anti-Whites, so I could see that my culture was under attack on all fronts. Whites or alleged Whites had done their bit for the jews by killing off our best in the 2 World Wars, like good little jew-slaves. Korea & Vietnam were more White-culling operations. Iraq, Afghanistan et al. now play that genocidal role, combined with open-border alien invasion. My parents were non-racists, nor did they tell me much about my ancestors, beyond my great grandfathers & grandfathers, whose behavior ours resembled to an astonishing degree, such as our thirst for knowledge & adventure, travel & life in foreign lands, such as the USA. Rudolf Hess was born of German parents in Egypt, as I understand. I was born in the USA of Hebridean parents. Physically, I have been far from home, but not biologically nor behavior ally. As a White man in anti-White America, my contributions to such a society have been on par with my economic position therein: little to nil. Indeed, how would my minority, alien contributions be received? One man's meat is another man's poison, is true, after all. I recall Thoreau, who was urged by his fellow Bostonians to "help the poor." Thoreau did so, enthusiastically, but the 'poor' rejected his 'help', since he lived much poorer than they did! The difference was that Thoreau's riches were alien to the poor, who saw themselves as poor, whereas Thoreau saw himself as rich, for his lack of material possessions & dependencies! How could I 'help' a mestizo society, with mestizo values & behavior? Could I cheer them up by playing Mozart? Ha! Thus it is that I recognize that I am an alien living amongst aliens in a Judeo-Capitalist empire, which is about to be taken over by Asia, as about 50% of North Americans already are, with a rapidly-diminishing admixture of White. The Eurasian specimen known as Kennewick Man comes from 9,000 years in the past, but he may well represent our future in North America. I sometimes suspect that such demographic changes have all happened before, in time out of mind.

It seems that 'human' behavior never changes, except under conditions of scarcity & abundance. Elmer Pendell noted this in his "Sex versus Civilization", in which Nature's adversity improves people racially, & Nature's abundance allows the survival & multiplication of dysgenic "Problem-Makers," as he calls them. America proves his point, for our abundance in terms of space & natural resources has produced a land of fatheads & scrubs, rather than a super-race of minds & bodies. The supply of resources is finite, but the breeding of parasites is not. I think Hitler advised the jew, FDR, that America could prove the validity of its values only when its territory had become populated & its natural resources limited, as in Europe. Only then could rich & vast America offer to teach crowded, hungry Europeans how best to solve their problems.

In times of material abundance, a politician is tempted to pander to the masses of asses, chiefly as an entertainer, a showman, rather than a leader of substance. That's why an actor like Ronald Reagan could be a successful politician, & why Arnold Schwarzenegger is Governor of Mexifornia, largely because of their media high-recognition factor & their stage personae. TV newscasters can easily run for political office, since most people get to see them so often, & therefore think they 'know' them. The job of a leader is not to give the people what they WANT at any moment, but what they NEED & will need into the foreseeable future. Thus, a leader is like a parent, who sees beyond the momentary clamor of his children. Lucky indeed is the leader who can give his people what they not only want, but need. Hitler was such a leader. Until such time as people perceive their need for a leader, any crook will do. Being led by crooks insures that the people will eventually perceive their need for a leader, but by then, it may be too late to save them, from themselves.

It has been argued that we can ignore race in favor of "survival of the fittest," in which eugenic specimens of all races could be bred with eugenic specimens of all races. Unfortunately, this concept is insane, like breeding the best Dachshund with the best Great Dane.
