

31 AUG 06. Dear Claude! Many thanks for your letter of 20 AUG 06 & the outstanding enclosures! The Debt Bomb is certainly disastrous & very dangerous, for it may cause desperate criminal regimes like the ZOG to opt for war, as a distraction for the masses. Thanks for correcting that claim, which I read in only one Canadian source, that there were so many Chinese in Sudanese oilfields. I wondered how Sudanese oil was being transported, for one thing, since I'd never heard that Sudan was rich in oil, nor in Chinese! The Chinese must be related to jews, since their numbers are infinitely variable!

As you say, whatever Ian Smith may have been, politically, Rhodesia was firmly in the pockets of the jew banksters, & utterly dependent upon the good will of South Africa. I merely objected to his frequent promises of "no majority rule in my lifetime," which he repeated from the day he became Prime Minister, in 1965, if I recall correctly. I know we are supposed to be 'too sophisticated' to take a politician's oath seriously, but how does that reflect upon our own oaths of office & of loyalty? Those who fought & died for Rhodesia believed Smith. I never did, but I had no where else to go, so I stayed & took my chances until the time for handover to Black Marxist Misrule was allegedly decided by Kissinger in 1976. That was the year I was deported from Rhodesia, making it a total of 5 deportations, beginning with the USA in 1969.

I certainly agree with your analysis of White Africans' anti-White policies toward potential White immigrants. Others have seen it as we do: Douglas Reed in his book, "Somewhere South of Suez" & Earnest Sevier Cox in "White America." Cox described Harry Oppenheimer's stated goal of having a Black work-force under White or jew management as 'the best of all possible worlds.' When <sup>Harry</sup> got what he wanted, he thought again, & pulled his sheenie-skedaddle in Old Testament style: a rat leaving the ship he'd scuttled! Cox said that a White workingclass was necessary to maintain a White civilization, therefore a White worker must be able to earn sufficient to sustain himself & his family. Cox wrote decades before Oppenheimer got his wish, that it would be foolish to think that a White elite could sustain itself upon a Black social base, much as you correctly criticise Wayne. I have attempted to point out to Wayne that no leader survives without his followers, his people, for how can anyone be a leader without a people? I have always objected to Nietzsche's concept of a superman without a folk, just as I cannot imagine what Beethoven would achieve if he had been confined in a kaffir kraal, without his folk.

My suspicion is that the Chinese <sup>from</sup> over Africa. In 1963, with the break up of the Belgian Congo, Indian troops had occupied strategic positions in Africa under U.N. auspices. That's when China made a violent demonstration on India's northern frontier, so Indian troops had to be pulled out of Africa, & have never returned to my knowledge. It appeared as if India had intended to fill the power vacuum which the departing Whites had created in a resource-rich region. China wants what Africa has, & they may want more than what the land produces. They want the land, especially if they can take it when the Blacks kill themselves off. In North America, we brought in the Chinese to build railways. The Chinese are still here!

As you say, the Mexican invaders are an immediate problem, but I see the Chinese invasion as a rapidly-growing problem, which the niggers & mestizos serve as distractions. The Mexican have never succeeded in governing themselves, nor in organizing themselves for war or for production, as have the Chinese. To me, the Mexicans are a street gang, but the Chinese are like an army. As I say, Canada's latest census reports that Mandarin is now Canada's second language, rather than French. The Chinese are buying up former jewsmedia, such as newspapers, TV & radio stations, & they are in the banking sector of North America. I was struck by the big bank building in Buffalo, New York, with its golden dome & its name: Hong Kong Shanghai Bank! I thought I'd left Hong Kong on the other side of the Pacific Ocean! Incidentally, what has happened to South African factories has already been happening to Mexican factories, which used to be U.S. factories: Gone to China!

In your letter to Wayne, your view of scientists coincides with mine: clever fools. I recall a good line from "The Island of Dr. Moreau." A visitor to the island reads Moreau's studies on converting animals into men & vice versa. Moreau asks him what he thinks. The visitor says: "Just because something CAN be done does not mean that it SHOULD be done!" Scientists just do whatever CAN be done, without regard for the consequences, as you say. I changed my academic field from science to humanities when I decided I was much more interested in what men did with hammers, than how the hammers were made. Scientists resemble 'idiot savants' because they concentrate on specifics without seeing the context in which they occur.

2) Wayne's religion seems most applicable to robots or cyborgs with computer brains, not people, as you & I have been telling him. He is selling his idea to the wrong market, so he should stop trying to reach people, & go for machines, instead. I told him, years ago, that man is animal & that his reason is the SERVANT of his emotions, which are the servants of instincts. Man is therefore not ruled by his reason, except on very rare occasions. One's body informs the brain that it is hungry, so the brain decides how best to satisfy the hunger. The brain can also recognize that eating a poisonous substance will satisfy the hunger in the short run, but will be fatal in due course, so the brain decides to look for something else to eat, or simply, remain hungry. Thus, the brain does not serve reason, but uses reason to serve the body, on behalf of the survival instinct. A brainless person will behave as if he has no survival instinct, so he responds to the stimulus of the moment. His brain is too switched off to recognize danger in the long or short term. A jew doctor in White-ruled South Africa scoffed at the idea that Blacks could be protected from AIDS via 'education.' The jew could say what no White man could, so he pointed out that the typical Black had around an I.Q. of 70, which diminished his foresight. To warn such a creature that 'unsafe sex' could result in AIDS within 3 years was beyond his mental capacity, which would be strained if the AIDS incubation period were only 3 weeks! Without the foolish White scientists & suicidal missionaries, the Blacks would evolve rapidly in Darwinian terms, with the culling of the least intelligent, or, they could breed an AIDS-resistant strain of Blacks, like those you reported.

In his great little book, "Sex versus Civilization," Elmer Pendell describes humanity in two categories: The Problem-Solvers & The Problem-Makers. The former create civilizations in order to solve problems, which include inventions & social institutions, as well as culture for our enjoyment, after the problem of scarcity has been solved. The Problem-Makers are culled by Nature, under harsh conditions, so they do not become a majority in human societies, until the Problem-Solvers make living easy for those who breed, but cannot feed themselves or others. At one stage in the collapse of a civilization, The Problem-Makers so outnumber The Problem-Solvers that society & its civilization can no longer solve the increasing problems generated by the Problem-Makers. That's when a civilization becomes history, as occurs so frequently in White societies. Pendell also states that abundance is often accompanied by vices, such as Christinsanity, in which Problem-Makers are sentimentalized as being somehow worthy of support, rather than slaughter. The civilized Scandinavian socialists of the 1930s apparently practiced a happy medium in which Problem-Makers who could not earn their livings were subsidized at public expense, but THEY WERE NOT ALLOWED TO BREED more of their kind. Consistent adherence to such a rule would tend to improve society. This is called 'negative eugenics'. Positive eugenics would use public funds in favor of the fittest, brightest members of society, to increase their numbers in proportion to the whole, thus shifting the bell-curve toward social improvement, rather than our present policy of social destruction & genetic devolution, in which the unfit breed at the expense of the fit.

Over the years, Wayne has erroneously concluded that eugenics "does not work." He has concluded the same in regard to racism & White Nationalism, in favor of Cosmotheism. I've attempted to inform him that such programs are valid, but they are not being tried. It appears that the same will apply to untried Cosmotheism. Wayne's 'logic' would be similar to concluding that "water does not put out fires," if no one uses it for that purpose!

As I see it, our most immediate problem in our ongoing social devolution will be crime, since our Zionist Occupation Governments permit savagery on the part of criminals, but deny self-defense to the non-criminal populace, as is occurring in Brazil, South Africa, Europe & North America. Economic crises, such as rising unemployment, will certainly increase the current level of crime in the USA, & our huge & rapidly-growing prison population constitutes an enemy garrison, maintained at Problem-Solvers' expense, which awaits the opportunity to sally forth, as did the criminal population of Russia, on behalf of the jew-Bolsheviks. I live next to Mount St. Helens, an active volcano, but I am aware that I sit on top of an even more dangerous socio-economic volcano, which may erupt at any moment.

All the best. ORION88!
