

5 OCT 06. Dear Tom: Many thanks for your letters of 20 & 21 SEP 06! It's always great to hear from you. The strategic picture looks pretty dire for denizens of North America, as you observe. Even without an official world war, the U.S. political/economic/demographic picture looks grim. As I see it, U.S. power is dissipating externally & dissolving internally. The U.S. military forces are depleted, exhausted & worn, as well as strung out logistically. Now, jews & Blacks want massive military forces in The Sudan, as American Jewish World Service imports Blacks from Black-ruled Africa, including Somalia & Sudan, as they brag on NPR jewsradio. A Mexican civil war threatens, which would produce a mass-invasion of the USA, to add to the millions of illegal Mexicans et al. already here. Any country which cannot control its borders dissolves in due course, as we saw with East Germany, whose government lost control of its borders & soon ceased to exist. The U.S. regime has achieved the same loss of control, but massively, in terms of alien invaders.

The Freemasonic Founding Felons of the USA purposely built their rascal-republic on a big banana peel: Article VI, paragraph (2) of The U.S. CONstitution, which puts it on par with "all Treaties." This means that the USA may be lawfully abolished whenever the political prostitutes of The District of Corruption are told to do so by the money-masters, for whom the USA was created. As you quoted: "If elections were important, they'd be illegal." The Founding Felons designed their system to thwart any attempt at majority rule, that is, democracy. The people cannot vote on issues which most immediately affect them, such as a war planned to benefit a minority. Eustace Mullins wrote succinctly of the U.S. system in his book, "The Federal Reserve": Unelected 'advisors' rule the executives & unelected lobbyists rule the legislatures. One judge can defeat the will of the people, if they get out of hand, by any chance. Wealth governs the parties & the promotion of political candidates. The USA is not a republic for patriots, but a racket for the rich.

One example of this statement I see from the many U.S. war veterans who are being cheated out of their alleged veterans' benefits. One friend of mine was listed as AWOL for the time he was a prisoner in Indochina! Another who is dying of Agent Orange is diabetic, so the VA hospital CHARGES him for his insulin needles. He must go to the drug addicts' free needle exchange, when they come to town every week. Similar neglect of vets was portrayed in Hebrewood's movie, "Born on the 4th of July." Unfortunately, it did not exaggerate. War vets of "Usrael" are often bitter, from what they say, in regard to the country for which they fought & sacrificed themselves. I sure can't blame them. The needle-vet no longer loves the USA, he says, so he wants to leave it. I responded with the old World War I joke of the two besieged Brits in no man's land, cowering in a water-filled shell crater as all hell flew overhead: "If you can find a better 'ole than this one, go for it!" And if I knew, I'd tell you. The USA is a temporary shelter, with the impermanence of a shell crater, in what is becoming no man's land, that is, no White man's land.

A Black puppet, Rangel, apparently wants to restore the military draft, as well as the CCC & WPA, but on a conscription basis, also. It would be like decadent Rome drafting its mob! A waste of ammo & uniforms, not to mention rations. Maybe FEDZOGUSA can con the invading Mexicans to fight for Uncle Schmuelsing in exchange for instant U.S. citizenship. Are Mexicans that stupid? Stay tuned!

As you say, events seem to be accelerating. World Wars I & II seem similar to a steam locomotive pulling a train out of a station, chuffing slowly at first & then more & more rapidly as it speeds up. The destination appears to be a monstrous trainwreck.

A history professor described alleged thinkers' views prior to the World War I Disaster: There was Bergson, who likened life to "a cavalry charge." I'd think of that idea as exuberant suicide. One effete nut described a soldier going into battle as "a swimmer jumping into cleanness." A. Conan Doyle described the war as "God's own wind." Modern weapons would supposedly ensure that such a war would be "over by Christmas." The French touted their "elan," & "the spirit of the bayonet" versus the Germans' discipline & firepower, while the British Boer War experience had them put their faith in marksmanship. World War I newsreels showed all sides' soldiers en route to the carnage as if they were going on vacation or to a picnic. Norman Angell, as I recall, wrote a book 'proving' that World War I could not occur because it would be too costly. Costly it was, but occur it did. The French wanted revenge for their defeat in 1870, & the British Rothschilds, according to Benjamin Freedman, wanted to smash German competition. Similarly, Germany wanted to defend its commercial interests for its own survival. Russia apparently had nothing better to do, it seemed, & its key officials were allegedly in the pay of the French, so they joined the 'party'. The Aus-

2) tro-Hungarian Empire, that political Frankenstein's Monster, was in danger of eroding & disintegrating if Serbia were not punished for allowing a jew to assassinate the Archduke Ferdinand. At least that was their pretext. I have read that French revenge gold via Russia was used to fund Serbian agents to stir up trouble with Austria; if so, it sure did! Russia also wanted to recapture its Eastern Orthodox vatican in Constantinople from the Turkish Empire, which was falling into the German commercial orbit. The Young Turks wanted to modernize, that is, westernize backward Turkey, so they were eager to work with the Germans, whom they could play off against the encroaching British Empire, which had already stolen Egypt & Kuwait. The Balkans, including Greece, wanted to drive out the Turks, whereas the Bulgarians were allies of Germany & hence, of Turkey. Japan's secret alliance with Britain, under which they had defeated Russia in the Far East, came out in the open against Germany, with the Japanese conquest of TsingTsao, the German 'Singapore.' For Zionism (jew-supremacism) World War I was an immense harvest of Goy bodies, blood, treasure & power, as well as territory, such as the former Russian Empire. The war debts enslaved 'victors' & vanquished alike, under ZOG, just as planned. What worked in the U.S. Civil War worked even better in World War I. That's why World War II was arranged at Versailles, as one diplomat admitted, when he said that "powderkegs are being set up all over Europe, to bring about another great war." A prize-fighter claimed that "you never learn anything 'til you get tired." War- weary people there were aplenty, but few indeed learned anything to stop the next one. Some actually thought they'd won! Besides, a new generation of suckers was being born. General Fuller wrote that 'democracies' rely on propaganda to stir up sheeple for war, but propaganda leaves a poisonous residue in people's minds which hampers their ability to make peace. As Werner Sombart noted, "wars are the jews' harvests," so why should they wish for peace? Peace is only a time in which to reload for war & profits. As U.S. Marine Corps General Smedley Butler observed: "War's a racket!" A racket is whatever benefits a minority at the expense of the majority, so let's you & him fight!

I, too, have wondered if the human animals can ever advance to wisdom, but as long as they choose Judas Goat Leaders & jewish shepherds, they will remain victims of The Big Racket, much like the Eloï victims of the Morlocks. Sheeple will do anything for handouts, & the jew, J.D. Rockefeller, observed "that every man has his price." Apparently, he was never disappointed. I recall the story of an Allied attack on The Western Front which was launched in miserable weather, prompted by officers' reports that "the Germans had warm, cozy bunkers!" It's easy to herd sheeple who are so desperate, for as Rothschild frontman, J.P. Morgan said of the poor: "I'll just hire ½ to shoot the other ½."

A very good account of individual interests for war was depicted in "Verdun" by Jules Romains, as well as "All Quiet on the Western Front" by Erich Maria Remarque. Soldiers were conned & coerced to go to war, & those behind the lines enjoyed wartime prosperity, or suffered wartime privation.

I mention this background so we may understand, to some extent, the current war-fever in Judeo-America & Zionist Occupied Europe, ostensibly on behalf of Israel. Both "Usrael" & Israel have announced their Armageddonist goal & their Samson Option of seeking total world destruction, unless they obtain total world-domination, under the jew world ordure. The Israeli Press article quoting jew-supremacists Dayan & Crevelde refers, in which Dayan declared that "Israel must be like a mad dog, too dangerous to bother," & Crevelde declares that Israel "could destroy all European capitals, with nuclear weapons." Crevelde wants Palestine erased from the map by deporting all Palestinians, in this article dated 1 FEB 2003, which was before Iran's president declared that Israel should be erased from the map. One source which I have not confirmed, claimed that Russia & China have told the USA to lay off Iran, although that may not deter the hysterical hebes, plus US^{is} sheeple associate war as the 'cure' for depression, economically, if not mentally, & war^{is} the means of "Jesus' 2nd Coming!" according to the louts, liars & loonies which we have in abundance. The powderkegs of Europe were bad enough, but now we have nukes, worldwide, in the hands of nuts, so I think we are about to experience even more interesting times than we have believed possible. All the best, as always. DOWZ! & ORION!

Eric
