

2 NOV 06. Hail Chad! Many thanks for your great letter of 30 OCT 06. So welcome to the world of theory, hypothesis & b.s. We used to say in college chemistry that b.s. baffles brains. Philosophy is a great field in which to encounter b.s., as are sociology, economics, anthropology, & other schools of bafflegab stemming from the kosher commie "Frankfurt School" of the 1930s, which infests most branches of 'learning' in the USA. A real master of bafflegab was Herbert Marcuse, who lectured at San Francisco State College, now 'University', for an hour. Marcuse^{was} a member of The Frankfurt School, was a bona fide jew commie, & worked for the OSS (predecessor of the CIA) against Whites in World War II. My colleagues who worked for FEDZOGUSA in that war referred to the Office of Special Services as "the Office of Soviet Stooges." Unfortunately, they were correct. Dr. Revilo P. Oliver was a good friend of mine. He helped crack the Japanese codes, so Pearl Harbor was no surprise to FDR, nor his commie buddy, George Catlett Marshall. They had all Japanese radio transmissions monitored from Corregidor, Midway & Hawaii. That meant the USA knew not only what the Japanese were saying, but where their fleet was located enroute to the take off point for attacking Pearl Harbor. Pearl Harbor was a secret only to the U.S. commanders on site & the U.S. sheeple. The zoggies in The District of Corruption knew all about it, long beforehand. This was the attack which FDR wanted, so the USA would go to war on behalf of the Soviet Jewnion. The fact that Germany & Japan were not allies was of no concern to FDR. The Anti-Comintern Pact between Germany & Japan was abrogated by the Hitler-Stalin Pact of 1939, so the military alliance between Japan & Germany only occurred on 18 JAN 1942. FDR said that we were fighting "The Axis Powers." At the time he spoke, only Germany & Italy were members of The Axis, not Japan! The USSR did not declare war on Japan until Germany's surrender on 8 MAY 1945. Hence, the USA really should have declared war on Japan, only, but a patriotic U.S. government would have tried FDR et al. for treason before Pearl Harbor. The trigger for that attack was FDR's oil embargo against Japan, whose fleet had converted to oil, from the previous coal it had used. According to a U.S. history prof., Japan had 2 weeks' supply of fuel for its fleet. Japan, like Britain, was totally dependent on the sea lanes for its commerce & survival. In these days of air-travel, we can imagine how the USA would treat a situation in which it had only 2 weeks' supply of aviation fuel! Japan decided to seize the rich oilfields of Dutch-ruled Indonesia, but the U.S. Pacific Fleet was a major threat to that strategy, so Japan decided to knock out the U.S. Fleet, which FDR had contrived to concentrate at Pearl Harbor, so as to tempt the Japs. Since FDR knew in advance about the oncoming Jap attack, he pulled a fine bit of jew-jitsu by sending all the best ships out to sea, including the battleship USS Washington, leaving only obsolete battleships, including the decommissioned target battleship UTAH as bait, which the Nips bit. When the first bombs hit Pearl Harbor, FDR reacted to the information in an outburst of talmudic ecstasy, according to his biographer: he darted this way & that in his wheelchair, shouting, "This is it! This is it! This is it!" One woman observed that FDR hated all men who could walk & Churchill hated all men who were sober. My jew history prof. said that "The U.S. Pacific Fleet was utterly destroyed." In fact, it appears that 2 destroyers in drydock were destroyed, & one battleship, the USS Arizona. The Utah was already a target ship for the U.S. Navy, but FDR said it had been destroyed, as if it had been on active duty. The loss of U.S. personnel was several thousand, since they were caught by surprise, as FDR intended. U.S. losses had to be sufficient to goad the U.S. sheeple into war, to make the world safe for Soviet communism. My jew-prof., Rappaport, warned us that any student who thought that FDR had prior knowledge of the Pearl Harbor attack would receive an "F" in his course. I therefore steered clear of addressing that topic & anything else to do with WW II. I wrote a paper on The Progressive Movement instead, & got an "A" in the course. I am not one to rush onto the fixed bayonets of the enemy, so I made a mental note of the jew's hysterical outburst. It took me several decades to learn the truth about Pearl Harbor. In those days, there was no Internet! On 7 DEC 1941, the jewsmedia were in absolute control of our news. Had I been informed, prior to Pearl Harbor, I could have, perhaps, sent a telegram to someone, or, if I had a shortwave transmitter, I could have told other listeners what I knew. I could have telephoned someone like Charles Lindbergh, Jr. & Sr. & others of The America First Committee. As for commercial, kosher, radio & print media, that would be out, & I'd probably find the FBI knocking on my door! Nowadays, 9-11 has been largely unmasked by the Internet, which is worldwide & fast. Fifty years is a long time to wait for the truth. Of course, truth cannot make us free if we do not heed it, which is what we are doing when truth appears online. We are presently CONSUMERS. For us, news is entertainment, & sheeple don't care if it consists of lies, if it helps us kill time.

2) But now onto current topics: Kuhn wrote in his little book, "The Theory of Scientific Revolutions," that science is not cumulative in terms of theory, for the rigorous application of a theory, he says, practically guarantees that the theory will be dropped in favor of a new theory. One professor likened a theory as a type of coatrack, upon which we hang facts. But what happens if our theory cannot accommodate a fact or set of facts? We can ignore the facts, as ZOG does with race, & we can carry on, pretending that such facts do not exist, or are not important. However, if we are really scientists, rather than kosher commissars, we need to work with the new facts. The previous atomic theory did not account for X-rays, but there was no doubt that X-rays existed, as proved by repeated experiments. Thus, a new atomic theory came about which explained the existence of sub-atomic waves & particles. The idea that the Earth was the center of our solar system was long assumed, until sufficient facts were discovered which proved that Earth revolved around the Sun, rather than vice versa. Of course, the Earth-centered universe was an official church doctrine, so those who believed in the Sun Centered Solar System were apt to be tortured & burnt at the stake by the holy-hokum hucksters. So it is today, that the more we learn of racial differences & of the importance of genetics, the less we are allowed to change our behavior in accordance with this knowledge. It used to be that all blood was considered 'equal.' Even animal blood was used initially, for transfusion into humans; then all human blood was used. Hence, our discovery of blood-typing came at a price in human lives. Now, we'd say such a practice is 'dumb', but zoggies still insist that racial differences do not merit recognition, as more & more facts appear that different races react differently to medications, & different races are associated with different medical conditions. I am not Black, so I have no sickle-cell anemia; I am not Jewish, so I have no Tay-Sachs disease. I am not Finnish, so I have no surplus iron in my blood, &c. An interesting finding on general health in Britain & the USA reveals that the Brits, whose diet is at least as bad as that in the USA, do not suffer the same degree of diseases like diabetes & coronary problems which USA denizens suffer. The key has been suggested that Brits walk & Americans don't. But, there is a genetic factor: Brits are not usually part Asian, whereas many, if not most, so-called Whites in America are part-Asian, via adultery with Amer-Asians alias Indians. Apparently, real Whites are less prone to such ailments than are Asians & mixtures thereof. This discovery underlines my early suspicions that most ostensible Whites in North America are mestizos, so DNA-testing should be done as a matter of course for proper medical treatments, just as blood-tests are now the norm. The problem is that we cannot be sure that our lab reports are correct, nor that the report is even our own! I hear numerous complaints from neighbor-geezers that their wog-docs from Asia don't even examine them when they show up for appointments, but they make sure to collect their fees from Medicaid/Medicare et al. In medicine the rule is: let the patient beware. Over 100,000 American patients die every year from mis-prescribed medicines & improper dosages. I suspect that we are in the midst of a medical holocaust designed to kill the elderly & unfit in the USA. As FDR said: "Things are MADE to happen as they do!" FDR was a 33° Freemason, as was Satanist-in-Chief Crowley, so it's a small world, indeed. One writer reported that medicines are designed for "180 lb. White males," so they are not designed for females, nor for other races. Well, duh! I recall a 19th century prescription on a patent medicine bottle which said: "One teaspoon for adults & large animals. Three drops for children & small animals." The label touted that the medication was "A General & Specific Homeopathic Remedy for Spavins, Gleet & Blind-Staggers." I noted that it contained, aside from herbs for flavor, 52% alcohol! Hey, if it doesn't cure you, you'll be too drunk to care! The abovementioned ailments are those of horses, not humans, but I understand that gleet describes a nasal discharge in horses, so a human could take it for a cold. Such a deal! An overdose of the medication could result in blind-staggers.

Of course, that which is neither proven nor disproven, like String Theory, remains a matter of scientific conjecture & recreation for mathematicians, like non-Euclidean Geometry, in which parallel lines intersect! I suppose such topics are the equivalent of 'Politically-Correct' Jew-speak, in which homosexuals are now "gay" & "marriage" may be defined as any relationship between more than one organism. It may be hopeless, but it's sure not serious. The Frankfurt School also used the tactic of "cognitive dissonance," that is, bafflegab of the sort used in the late "Victim Awareness Education Program" at your ZOG-gulag.

3) So let's hear it for Vlad the Impaler! It is wisely noted that history is written by the victors, so all 'bogeymen' of history deserve our consideration in terms of what they really did, & for whom, as well as our 'heroes'. The question to ask in crime & in history is "Cui bono?" "Who benefits?" This old Roman credo translates into Judeo-American as: "Follow the money!"

Voting consistently for either phony political party will neither impede nor promote the oncoming revolutionary situation in the USA. Both parties are controlled by those who control the money supply & the jewsmedia of information, education & entertainment. I voted for Bush because I believed he'd go to war for Israel, just as he did. I did so because I wanted to participate in our oncoming Civil War in my lifetime, for I think I have something to contribute, on behalf of White people. ZOG knows I've spent most of my uneventful life learning about the conduct of revolutions, insurgencies & civil wars! I spent 11 years in countries involved in civil wars, while keeping my eyes & ears open & my brain in gear, so my knowledge is not only from books. A consistent vote for incumbents will keep our kosher neo-conmen on their present course to disaster, so, by all means, vote Republican & "stay the course!" I see that the jew, Kerry, suffers from acute foot-in-mouth disease when he said that those young people who do not go to college will go to Iraq. He seems programmed to lose, just like the hysterical Mr. Dean. Perhaps Madman Bush will declare a state of emergency & extend his term of dictatorship, er, office. In any event, the USS Titanic is steaming full speed ahead toward the fateful iceberg. Relatives of mine founded this anti-White racket, back in 1776, so it may be incumbent upon me to atone for their sins by assisting in its windup. Fate can be surprising, so my present state of retirement is by no means guaranteed. An ancient German saying applies: "The Gods bring victory or defeat, but you must bring the courage." Terror on behalf of tyranny is indeed an ancient formula for herding sheeple to the kosher slaughterhouse, & it usually works, as we see today.

As you observed, the Asians can be good at refining White ideas, but sometimes they miss the point completely, as I discovered in Japan, where cities had no street addresses. After arriving in Hiroshima in 1966, I found that it took 5 hours to find the address we wanted to go to. House numbers on a street indicated the age of the house, for example, so #10 would be the tenth house built on the street. We asked city police, then local police, & finally a local grocer, who told us how to reach the house! Whites understand that fast trains exist to make reaching Location B from Location A much quicker, but a lack of street addresses would greatly impede our travels, just as they did in Japan, with the world's fastest trains. Our strength is in knowing "why." The Asians can copy, but they tend not to know that. Japs tend to pile gadgetry upon gadgetry for its own sake, regardless of function. I note increasing complexity on photocopiers which impedes the production of simple photocopies. In Asian culture, form does not necessarily follow function, & complexity usually defeats reliability, as with modern photocopiers, which put out great quality, as long as they decide to work, which they frequently do not. Machines now have minds of their own, so the human operator is not in complete control. My first experience with computers was in Africa, where our new diesel locomotives were frequently breaking down, because the onboard computer would decide to switch off the cooling system! I suggested they put monkeys in charge of the locomotives & save money on computers. My next experience was with microchips in my car, which would decide to shut off the fan when the engine was running, & discharge the battery when the engine was switched off. Luckily, I could push-start the car. I also dislike automatic transmissions which shift into high gear when I am trying to use 2nd gear to slow my vehicle on a long downhill stretch, to save wear on my brakes. Okay, I'm not a 'swinger' & I don't play jazz. I saved my battery by disconnecting a battery cable when I parked.

Re your RIP Course: Henry David Thoreau said that "The unexamined life is not worth living." ZOG provides you with opportunities to examine your life, as your zoggies examine you, so your participation teaches you more about yourself & also, about the ZOG. Double-Double good! as the subjects of "1984" would say in "newspeak," which resembles jewspeak of today, to the proverbial "T." Your fellow RIP participant seems to be engaged in a typical Communist course of "self-criticism," which is predictable, considering who is in charge of RIP. I have sufficient creative writers on the Internet who describe my character traits, so I don't need to consider them on my own time. As I last read, I am now "a former CIA supervisor of Mossad hit-teams." So far, I've not been accused of stomping cigars out on my hosts' carpets, but that may be added to my list of foibles, since I never smoked! I never considered writing my own obituary, including my eulogy. I guess I'm not sufficiently in-

4) terested in myself, as I am in others & in other topics. Maybe if I were jewish, I could be more concerned with myself. Oy veh! As a White, I'd like to be applauded by those of my own kind & hated by non-Whites of all persuasions, however, I'm not particularly concerned what others think of me, but only what I think about myself. When I'm alone, I'm in good company, so I'm a lucky fellow.

Re La Raza: I recently received a copy of their newspaper from Chicago. It would be great if Whites were to reprint it in English, inserting "White" wherever "Latino" appears. I enclose a two-part photocopy of their front page which announces their defeat of a local measure intended to enforce U.S. immigration laws against illegal immigrants. Another headline boasts that "Latino" cooks have "talent in their blood." It seems all races can boast of their alleged genetic virtues, but Whites cannot. Not only are we deemed racists by jews, but they claim there is "no White Race." How come jews hate us so much, if we don't exist? In The Talmud, they command that "The best of the Goyim should be killed." Goyim = Gentiles. This is an incitement to murder, so why aren't such believers hauled into court? ZOG only knows! If "jews" were substituted for "Gentiles," ZOG's response would likely be different.

Thanks for the report on the ZOG's "Security Threat Group" classification which does not deem La Raza (The Race) as STG. Mexican Supremacy is kosher, but White Supremacy is not. This proves that we live in a hypocrisy, not a democracy, as I've said for years. Of course, Whites who love their own kind are not "supremacists," for we have no desire to dominate nor associate with non-Whites. As usual, jewspeak is not truth, but propaganda. Zionists are jew supremacists, whether they are jews or not, & the tenets of Zionism include genocide against Whites, so who are the real 'haters'? When a jew points one finger at Whites, he points 3 fingers back at himself.

King George Bush II lied, as usual, when he claimed recently that the USA is governed by laws, but he failed to say that many laws are not enforced, such as those on immigration & the adoption of foreign languages, like Spanish & Mandarin as officially-used languages on such things as voter information forms, &c. Sherlock Holmes would describe this practice as "the dog which did not bark in the night." If "ignorance of the law is no excuse," why are zoggies allowed to ignore & defy the laws of "Usrael," as they have been doing? It is well said that "a corrupt society is known by the number of its laws," & that a "tyranny is known by the number of laws it breaks." In Peru, the saying is: "If you have an enemy, just apply the law." This means that anyone may be prosecuted, no matter what he does or does not do, in terms of existing laws. I say that "selective justice is injustice." ZOG knows!

It will be interesting to see how long our ZOG can increase its Soviet-style gulag system before it collapses from its own policies, as did the Soviet Jewnion. I note some major kosher contradictions, such as the tightening of surveillance, while leaving the country open to alien invasion. Such behavior does not compute. I also note the Babel-style confusion in regard to voting qualifications & voter I.D., as well as voting methods, which cast doubt on the validity of all previous elections. "Vote fraud" has been around a long time in Latin America, but U.S. sheeple are too dumb & trusting to suspect such things, until the possibilities are rubbed in their dumb faces. The last time I voted in Brownest Yakima, I was not required to show any I.D., nor proof of U.S. citizenship, as I was when I first voted in 1960, in California. La Raza says that asking voters for I.D. is "racist," just like enforcing immigration laws. Here is "The Race" accusing our ZOG of "racism!" Does that compute? I guess some racism is more 'equal' than others, as any jew can say, & usually does.

My advice is to enjoy the status quo while we may, for the future looks "very interesting," as the Chinese curse goes: "May you live in interesting times."

The Mexicans of La Raza salute one another as they say, "Viva la Raza!" Since they are not STG, I guess I'm entitled to salute you, & say: "Long live The Race (Our Race)!" All the best. DOWZ! ORION! & 88!

Eric
