

5 JAN 07. Hail Chad! Many thanks for your thoughtful letter of 3 JAN 07. Many thanks, also, for the 20 zogbucks. I'll let you know if I get them. Yes, ZOG works in mysterious ways its wonders to perform. Your donation will help with my costs of postage & photocopying. Most appreciated!

The only connection I make between the Knights Templars & "the holy grail," is from a Spielberg movie which starred Harrison Ford & Sean Connery, a sequel to "Raiders of the Lost Ark."

Your questions on the money problem are indeed relevant, & we are going to see what happens, as inflation increases, despite all the official ZOG claims to the contrary. The U.S. \$ is "monetized debt," so it has no backing, except for foreigners' willingness to hold their reserves in these jew I.O.U.s. When they change their minds, the jew-ass dollar is in big trouble! The death of the dollar may be the pretext for King George II (Bush) to declare the existence of The North American Union, comprised of Mexico, Canada & the USA. I understand that our new funny-money will be called "the amero." No doubt, we shall see. I hope we shall not have to haul truckloads of inflated zogbucks around, as occurred in Weimar Germany. One survivor of that era told me that it took her almost 6 months to send a penny postcard to her mother, who also lived in Germany. Every time she went to the post office, the price had gone up, & the value of her money had gone down even faster! It did not pay to save money in those days. I asked a local bankster if the U.S. \$ would soon be on par with the Confederate \$. He said, "Please, don't even say that!" Either the dumb Goy sheeple have not received the inflation news, or they don't even want to mention it.

Don't sell yourself short in regard to your principles & determination. I've seen people betray their race as a matter of course, which revealed that they just pretended to have their race at heart. My former Prime Minister, Ian Smith, of Rhodesia, did just that, without hesitation or apology, after he won his elections on his slogan: "No majority rule in my lifetime!" He was just a liar, from the very beginning, & only pretended to be on our side, just as I had tried to warn my fellow Whites. I was deported from Rhodesia for being pro-White. Now the country is called Zimbabwe, named, fittingly, after a ruined trading post of Arabic design, where slaves, ivory & gold were assembled for transport to ports on the Indian Ocean, thence to Egypt, Arabia, &c. to be sold. When I mention that I fought in the last colonial war in Africa, people think that I'm very old, but that war ended in 1980, with White surrender. When a local Yakimoron seemed impressed that I have come from "The Yakima of Central Africa" to "The Bulawayo of Central Washington," I merely said that I was probably the youngest British colonial civil servant he'd find at this end of the bar. No doubt the place was swarming with former British civil servants. He looked around. Maybe he expected to see fellows wearing khaki bush jackets & pith helmets all around. No, I was not wearing my pith helmet, just my khaki bush jacket! Ha! I do wear it when I have to take long walks in the summer sun. One character thought I was Australian, because of my hat. When I assured him that I was a native-born American, he wondered if it did not make me feel out of place. I told him that all Gringos in Brownest Yakima look out of place. Thus ended that conversation, as I resumed my trek to Walmart. If I had a sombrero, I'd probably wear that. Old Gringos are capable of wearing anything, for I have no one to impress.

If I recall my reading of the jew-book correctly, the hebes had to skedaddle from Egypt after "the money failed." Since they engage in the same rackets of which they bragged in their Old Testament, the results are likely to be similar. They stick to their old sheenie formula: sneak in, screw & skedaddle. The chief difference between jews & gypsies is that jews favor their bankster racket. I asked my professor of economics to tell me the difference between banking & counterfeiting. He said: "Bankers do not print money & counterfeiters do not charge interest." When I said that Banking seemed a better racket than Counterfeiting, he changed the subject. He was, after all, on the local Federal Reserve board!

As I see it, our problem is to provide work for Whites when they get out, so they do not go back into the ZOG-gulag. In our current economy, that is likely to be our foremost problem. Keep up the good work, & Happy New Year! DOWZ! ORION! & 88!
