

INTERNET FREEDOM DEFENCE TEAM

Paul Fromm, Barbara Kulaszka, Marc Lemire and Douglas Christie

February 20, 2007 - CHRT Tribunal hearing - Toronto

Join the Marc Lemire Defence Team

Support Marc Lemire's Constitutional Challenge

Four weeks of hearings have been held in Marc Lemire's Constitutional Challenge to Sec. 13.1 of the Canadian Human Rights Act -- the Internet censorship provisions -- truth is no defence. We have led three powerful expert witnesses. The Government's two experts, especially Dr. Karen Mock, formerly of B'nai Brith, were demolished. At least six days of hearings remain -- with travel expenses, lawyers fees, and massive photocopying bills.

People who loyally attended the hearings, donors, people who drove participants around, paid for dinners or did research are all part of the Marc Lemire Defence Team. Be part of our team and contribute what you can to defeat this horrible law and protect Freedom of Speech in Canada ! [The enclosed postcard is a token in advance of our appreciation of your support.]

15 MAR 07. Dear Tom: Many thanks for your letters of 9 & 10 MAR 07, both of which arrived today. It's interesting to learn that one zogling claims that China's military is "20 years behind" the Jewnited States et al. I recall a U.S. admiral saying 10 years ago that the U.S. Navy would not be able to prevent China from annexing Taiwan 10 years hence. The jews are giving/selling China all our latest military technology. Bernie Schwartz of Loral is said to have given/sold China our latest missile guidance technology. Result: China scores a direct hit on one of its space satellites.

Back in the 1950s I was concerned that we might see a mushroom cloud blooming in our neighborhood. A U.S. Army officer told us Civil Defence people that "war with the USSR is not a matter of 'IF', but 'WHEN'." At that time, digging in & 'duck & cover' were promoted as the way to deal with a nuclear explosion. Later, evacuation was the idea, but it was obvious in the L.A. area that evacuation by automobile was going to be impossible, given the increasing speed of bombers & then missiles, so Civil Defence was scrapped in favor of individual fallout shelters, which one could defend against his neighbors. So from 1952 to 1962 the whole nuclear war plan changed. Now, we have no plan. Besides, the USA is being invaded without a fight, so why would anyone want to bomb us? China has no reason to do so. When I see the immense demographic changes around me, I no longer fear 'The Bomb.' In fact, I wouldn't mind if it were dropped, with me as ground zero. As you say, why get hysterical?

On the Western Front here in Brownest Yakima, we had some entertainment in our neighborhood a few hours ago. I heard 2 gunshots in rapid succession, & I figured there'd be more, so I hit the floor, & cautiously drew my curtains closed. Why make an easy target? About the same time, a desperate druggie from the crackhouse next door was attempting to force an entry into my apartment building, in broad daylight, with people at home! Our building manageress called the cops. The druggie ran back to his crackhouse, & the cops collared him there. I know what the town is like, so I am on a perpetual war footing: I keep my army entrenching tool handy. If this be trench warfare, then we shall make the most of it. I also keep a couple of throwing-bricks handy.

As Gore Vidal opines, an economic crisis would quickly reduce "Usrael" to chaos. The crime rate is already high & rising, so crime is likely to be the sign of an economic collapse, with resultant food shortages. Our means of production & distribution are extremely vulnerable to disruption, & the decline in demographic quality makes it more so. People advise us to stock up on food & water, but they do not advise us how to defend it from human or subhuman predators when the crunch comes. Whites refuse to organize, but non-Whites are already organized. The struggle will be one of 'individual all-stars' vs. teams. Teams usually win.

Your observations on the egregious mistreatment of the Irish immigrants to the Jewnited States agrees with Hoffman's book: "They Were White & They were Slaves." Whites were treated much worse than Black slaves, since the Blacks were much more expensive. I sympathize with the Irish who fled death by starvation, only to face death by battle in the Jew-banksters' Civil War. Thanks for that great quote from Patrick Henry who said The Constitution was a "pact with the devil." He was so very right! Even King George Bush II called it a "damned piece of paper," or words to that effect. The USA began as part of the Bank of England' empire. After the Civil War, the Jew, Teddy Roosevelt, promoted conquests overseas, such as Cuba, the Philippines, Panama et al. As you say, The Monroe Doctrine was an imperial policy, & since the U.S. Navy was tiny, the Monroe Doctrine was enforced by the British Navy! So much for U.S. "independence!"

As you note, the USA is always rushing to the 'rescue' of 'oppressed peoples,' anywhere in the world, especially those oppressed peoples who dwell upon oilfields, &/or who present trading prospects.

Jack London, as I recall, observed that "The Chinese bind women's feet, & the USA binds the people's minds." Maybe that's why Usrael has produced so few native inventors. In the 20th century, most of our inventions were stolen from the Germans: everything from aspirin to jet planes, rubber made of hydrocarbons, &c. My USAF ROTC instructor said that our aeronautical vocabulary increased by 40,000 words when we got the patents from Germany! In Nikola Tesla's biography, "Lightning in His Hand," Edison, who allegedly cheated Tesla, was described as a diligent plodder: if given the task of finding a needle in a haystack, Edison would go to work, sorting the straw from the elusive needle. Tesla would 'see' how to find the needle, make a formula, & go right to the needle, but Tesla's inventions were much more impressive than finding a needle: Alternating current, 3-phase electric motors, radio-controlled devices, &c. Some are truly more equal than others! DOWZ & ORION! *SJE*
