

23 MAY 07. Hail John: Many thanks for your letter of 18 MAY 07 & the outstanding issue #7 of Brush Fires! I want to congratulate you & your comrades of LibRA: You present progress, not just promises; operations, not just opinions, & manifestations, rather than manifestos. The great amount you have done & are doing on behalf of Eurofolk & Eurofaith is inspiring. LibRA is worthy of our maximum support & participation.

In regard to support, I have not noted the name of Attorney Edgar Steele. Would he be willing to participate in LibRA activities? In my experience, an attorney appears to have clout which a jailhouse lawyer may lack, despite his legal reasoning.

The article by Rowana the Druid stands alone as a great work which is timely & terribly important for Eurofolk. I have long advised Goyim to avoid service in ZOG-forces. Our latest neo-colonial disaster on behalf of Israel in The Middle East is basically a Jew war & a White's fight. We send our best to feed the Zionist monster, while we admit hordes of hostile aliens into our living space. As Rowana says: It's time to wake up, Whitey! Her report on the targetting of White girls, as well as boys, by ZOG recruiters is a dire warning which I hope White parents will heed in time. How can we explain that it is not 'patriotic' to leave one's land to foreign invasion, on behalf of Israel & Global Capitalism? Can't we see that it is deadly & dysfunctional to harm others in their lands, while we abandon our own land to alien invasion? It's time to stop aiding our executioners.

All the best & ORION!
