

24 AUG 07. Dear Phil: Many thanks for your letter of 21 AUG 07 & the outstanding enclosures! W.C. Fields said, "You can't cheat an honest man." History shows the truth of that statement, for no honest man believes he can or should get something for nothing. Speculators (gamblers) believe that they can get something for nothing or very little, provided they sell their speculative holdings just before the bubble bursts, to other suckers, who believe as they do. The 'wise guys' are those left holding the money & the 'suckers' are those left holding the worthless I.O.U.s. I believe that there was The Tulip Bubble & The South Sea Bubble in the 17<sup>th</sup> & 18<sup>th</sup> centuries, as proof that "there's a sucker born every minute," according to P.T. Barnum, who had reason to know that was true. As far as I know, he based his business on that credo, & he never lost any money, as a result.

Financial bubbles take on lives of their own, just like modern 'virtual reality.' Tulip shares become commodities on the market, abstracted from the sale of real tulips. Thus, the market value of tulip shares can overtake & surpass the market value of real tulips, if speculators think the share values will increase, because of other speculators. The key to super-profits is, of course, inside information, of the sort used so successfully by the British Rothschild who received advance word of Wellington's victory at Waterloo. The real estate bubble proves that the suckers are still out there, ready for fleecing. The bankers are moving to bail out the gamblers, with billions of dollars created out of nothing. One economist timidly suggested that this policy just might be inflationary. In other words, the many will pay for the folly of the few. General Smedley Butler defined such a deal as a "racket," as we saw in the 'rescue' of the savings & loan rackets which rewarded criminals who disguised their robberies as 'loans.'

The death of the U.S. middleclass was long intended by the parasitic banker-gangsters, whose scheme is to rob the productive members of society on behalf of profits & power, just as described in The Protocols. After so many decades of banker-gangster rule, we should not be surprised that their scheme shows success. How many depressions do we need to teach us that lesson? Let's stand back & look at the Big Picture: Our Zionist rulers have used Whites to fight against their own interests from Day One in colonial America. The trick for us to learn is to see how immediate gratification can accompany later defeat, as with our 'Injun policies', our Civil War on behalf of 'union', our Spanish American War on behalf of empire, 2 world wars on behalf of 'democracy,' & all the rest since. All our struggles have achieved fewer of us & more of them, within our former living space. When such a policy is consistent, over centuries, can we not begin to see it as a plan, for others' benefit, not ours? When I try to point this out, I am accused by jew-dazed sheeple of advocating "a conspiracy theory." It is indeed a conspiracy, but it is not a theory, any more than our knowledge of the heart's function is a 'theory.' Our hearts 'conspire' to pump our blood, just as our ZOG conspires to pump away our freedoms, our property & our standard of living, with our active help. In many respects, our ZOG is more efficient at pumping than our hearts, so we may wish our ZOG a big kosher coronary!

It is astonishing to note how ZOG 'cures' the mortgage debt crisis: by using its I.O.U.s to back mortgage speculators' I.O.U.s. This would be like attempting to exchange Tulip Bubble shares for South Sea Bubble shares or vice versa. Such a deal! Eventually, we may learn what the exchange rate is for Reichsmarks & Confederate dollars. There's no I.O.U. like an old I.O.U.! We might also try selling defunct titles, like Admiral of the Ocean Sea, once held by Columbus, Emperor of Mexico, &c. Then we could issue shares to speculate on the future values, if any, of these titles, ad infinitum, with payments to be made in 'monetized debt' alias I.O.U.s, created out of nothing. It is upon such an abstract confidence racket that

our daily bread is based. This teaches us that money = trust, so what happens when we can no longer trust what we use for money? Loss of trust has occurred in the past. The jewbook alleges that the jews' final screw of Egypt caused the money to "fail." That was the cue for the fabled sheenie-skedaddle of the fictitious Exodus. Although the Old Testament is myth, the tales told therein are used as recipes by jews in all countries they occupy: (1) Monopolize control of money; (2) Monopolize control of food; (3) Monopolize control of newsmedia; (4) Monopolize control of energy; (5) Monopolize control of certain key goods & services, usually as middlemen. All the jew rackets have been revealed, but Goyim WILL NOT SEE. Many are paid not to see; many are too cowardly to see; many are too stupid to see. Blindness from any cause is not a survival skill. "They live. We sleep." DCWZ & ORION!

END
