Hail Osred! Thanks for your letter & the Orwellian enclosure on Britzogland's 'affirmative discrimination' hiring policies. Obviously, Britzog plans to expend its 'super-fit' young Whites in its Zionist wars, while the wogs & nignogs remain 'home' to breed & feed, as ZOG does in the USA et al.

Your dilemma should be obvious to you: You are becoming more & more restricted in what OZ-ZOG allows you to say in favor of Whites. Then you will be accused of 'racism' for being White, as the ADL download propounds. At that stage, you will need to sneak around in blackface & speak Kitchen Kaffir. I recall the great line from a Mel Gibson movie, "Road Warrior," perhaps: "Well, ya can run, but ya can't hide." No, Whitey, you are running out of places to run to, & you won't be able to hide in your former living space, which your Zionist rulers are rapidly filling up with non-Whites, militant ones, at that. As long as we are ruled by those who hate us for what we are, none of our virtues will impress them, for our virtues are exploited as our vulnerabilities by our enemies.

My coming to Rhodesia was due to the fact that I could not find work, after FEDZOGUSA stole my doctoral dissertation at gunpoint & escorted me to the Mexican border, to make sure I was out of the country. I was born in the USA, but I was not entitled to reside in the country & remain both free & alive by our ZOG. I was likewise banned from all Soviet Bloc countries, since I'd discovered, on my own, the Orwellian Cold War Hoax, in Lima, Peru, of all places. See Noam Chomsky's book, "The Washington Connection & Third World Fascism," for further details. Once I began to be called up for military duties, I began to form The Rhodesian White People's Party. Ian Smith had decided to sell out the Whites, so I figured that I could die by a Black's bullet or landmine, or I could lead a coup d'etat against the rascal, Smith, & live or die on behalf of the White cause. Those who fought for Smith only thought they were fighting for Whites. I counseled John Coey to return to the Jewnited States & have lots of White children, but he was 'protecting' JEEEZUS with his FN against "Gawdless Communism," as he told me, so he stayed & died in an ambush. In 1976, Henry Kissinger told Smith it was time to begin the sellout to Black Marxist Misrule, so I was deported, & went to Canada, to avoid arriving in the USA, where I was not supposed to be. Through Coey, I met Wilfred Brooks, publisher of Rhodesia Property & Finance. I asked him for some support for The Party, but he told me: "I'm not an adventurer like you. I have too much to lose." I replied that I had only my life to lose, but that was important enough for me. Those with means don't do & those who would do lack the means. Poor Brooks eventually wound up like me, though I wouldn't wish him ill. His son was killed in an ambush; his business was destroyed by Smith, & he had to flee for his life, I suppose to South Africa. I am expendable. I've known that, at least since I was in the U.S. Army.

It's easy to criticise Hitler, who certainly made mistakes. But what are we to say about the anti-White policies of Britain, the USA & their allies? Even an Odinist can do the math: Everytime we fight Zionist bankster wars, there are fewer of us & more of them. I got a bit of a shock when I was perusing some World War II era magazines. I encountered an advert for "Why We Fight." It showed a young German sentry standing on the corner of Main & Elm Streets, if I recall correctly. There was something about the soldier, his alert blue eyes, maybe. I showed it to my schoolmate, who said: "That's you!" The caption read: "We fight to keep the likes of him off our streets." Indeed, that was true, for there are damned few blue-eyed people on our streets, & we are fighting to bring in lots more non-blue-eyed people. We are literally dying to make space for them. I think Hitler was much more a "proto-Odinist" than Jefferson, for at least, Hitler fought & Jefferson left that job to his slaves & others.

Hemingway enjoyed shooting young Germans, & he said so. He was not pro-White & the Germans were not shooting at him. Hemingway was a "proto-Commie," if we'd claim he was not a complete Commie. One nasty critic said that Hemingway spent the rest of his life trying to prove that he was more 'macho' than Gertrude Stein, whom he'd met in Paris. I find something flawed in an Ostensible White man who enjoys bullfighting. I lived in Franco Spain for 2 years, as well as in Latin America, but I was never attracted to a bullfight. After you see men killed, bullfighting seems childishly cruel. Human blood is just as red as bull's blood. I've also seen cattle slaughtered. For you, the Moment of Truth will come when you must decide to give up your rice bowl on behalf of your race. I made that decision long ago, & I see myself as a humble instrument of Our Race, even here in Brownest Yakima.

All the best. ORION!
