

7 SEP 07

Hail Brian! Many thanks for your letter of 31 AUG 07. I'm surprised that ZOG returned a letter from you to Daniel Deville. In my experience, he has been able to receive everything which gulags forbid in the state of Washington. I'm surprised that Deville is able to publish his booklets on "Separate Living," as he has, so far. Well, changes in ZOG policies can & do occur. I am now branded as a "Security Threat Group" in this land of WAZOGDOC (Washington Zionist Occupation Government Department of Corrections), as it is popularly called by its victims.

On the ZOG-gulag front, I've mailed Michael Nelson's voluminous appeal against his unjust prisoner classification, which has no relevance to anything he has done in or out of the gulag. The appeal documents were made in triplicate, one to The Supreme Court of the State of Washington, the second to the Attorney General of the State of Washington, & the original back to Michael Nelson, ZOG willing. His zoggies often harass him further by seizing his legal documents, which constitutes an obstruction of justice, under The Law of ZOG. We shall see what results from his appeal. I understand that Washington State Prisons are corrupt, anti-White & incompetent, all rolled into one. Such a deal!

Tom Nee is on a policy of Ireland for Irish, only. I wished him good luck, but he will eventually see his fallback position as White Nationalism, by reason of the Irish government's anti-Irish agenda, plus Irish corruption, stupidity & inertia. The USA, being an empire, never had a national identity. All new-comers & even jew-comers were deemed more 'cheap labor', so the denizens of America never had a national identity to erode, as has occurred in formerly Irish Ireland. Irish & White Nationalists should study "The Battle of Algiers" for insights into the colonial nexus & its anti-Nationalist minions. The movie portrays Algeria as a colony of France. Now, France is a colony of Algeria! What fools these Goyim be.

When we consider the contradictions of politics (people-power), we have much to keep us occupied in thought. I have identified the malfunctioning phenomenon as The Law of the Contrary. As I noted in the case of Tom Nee (rhymes with Mon-Nee) & yourself, those who have, don't do, & those who would do, don't have the means with which to do it. The anti-Irish rulers of Ireland look Irish, as I guess, but their real visages should reflect the nature of their loyalties: jew, Nigerian et al.

Janis Joplin defined 'freedom' as a state in which one has nothing to lose. The problem is that those with nothing can do nothing or very little. You observed the Gypsy-like conditions of many in your area. They are mobile, yet they seem unable to do anything of a useful political nature, on behalf of their people. On the other hand, those I know who have property are so rooted therein that they can do nothing, either, aside from supporting the status quo for their quid pro quo: they do nothing for their people because they have 'too much' to lose. I saw such types in White-Ruled Rhodesia, & they were perfectly useless. They lost what they feared so much to lose, because they would spend none of it for their folk. I wish those types could be around to teach others that wealth is only relevant if one's people can defend it. Imagine the jew, Rockefeller, confined within an African kraal, totally dependent on the goodwill of the Blacks for any mealies they cared to share with him. Without White civilization, Rockefeller would be an utter failure. Yet, he & his ilk actively work at destroying White Civilization, from which & off which they live & thrive. That is the hallmark of the jew: to kill those who feed him.

Thanks for the addresses. It's good to know that one can go to Iceland & get around in Polish. "I've seen the Future, & it's Poland!" I won't copyright that statement, so you are free to use it in your speeches. When Jimmy Carter was campaigning in Amerizogland, he was to speak to a Polish audience, & he wanted to do so in Polish. His translator had him say in pseudo-Polish: "I lust for the Duchy of Poland." No doubt his Polish listeners had peculiar expressions on their faces. Allegedly, Carter intended to say that he loved Poland. Had I been Polish, I might have winced, since there is no doubt that Austria, Russia, Stalin & Hitler all loved Poland, but not so much the Poles who went with the territory. China loves the entire Western Hemisphere, even moreso, when all the "foreign devils" are removed. I say to Amerizombies that everyone loves America, except the U.S. government, which wants to give it away. They agree, but they don't like it. Well, neither do I. No doubt there are millions of Nigerians who love Ireland, as well as Irish women. They'd also love it if all Irishmen would jump in the ocean. I'm sure the Nigerians would like to help them do so, but not if Tom Nee can catch his plane to New Zealand, first! All the best. ORION!
