

25 OCT 07

Dear Steve: Many thanks for your great mailing of 16 OCT 07, with the beautiful calendar. How it reminded me of "Breaker Morant!" There were also formations which could be in Africa or North America. Well, I guess we live on the same planet, after all. Many thanks, also, for the enclosures in regard to the White Struggle for Survival. Most of them I had missed entirely, so they are appreciated. The report on the decline of Zimbabwe is as bad as anything I could have imagined before Ian Smith sold out to the Black Marxist Mugabe regime. The article on Pierce's takeover of Resistance Records was notable. I knew George Burdi alias Reverend Eric Hawthorne who founded the business, which was raided by CANZOG & USZOG simultaneously, on both sides of the US-CANADA border, allegedly for tax purposes. Burdi was arrested & got a ZOG-chat, after which he joined a Black rock group. He proved my suspicions to be correct, for I thought him much too extreme for survival under ZOG. It was an example of the saying: "If you can't take the heat, don't go into the kitchen." Poor George could not take the heat which ZOG was able to apply.

Robert Frens pointed out the fact that revolutions are not tax-deductible, & Burdi showed that revolutions are not profit-making ventures, unless one is a jew-bankster who lends money to both sides. This raised questions in regard to Pierce, who continued to amass property & money under ZOG. Usually, ZOG hits dissidents' incomes & property, if any, as it did to Metzger & Butler. When that fails, for lack of such items, then ZOG attacks their personal freedom with trumped-up charges.

Bill White was, apparently, an Internet blogger, & is now a magazine-publisher & an activist for his American National Socialist Workers' Party. If he's genuine, I wish him all the best.

The Internet is revolutionary in regard to public access for inputs & output, which the jewsmedia monopoly long enjoyed. It took me 50 years to find out about the FDR treason at Pearl Harbor, but only 5 weeks to find out about the CIA-Mossad terrorism of 9-11, thanks to the Internet. All sorts of information are now accessible on the 'net, such as people's addresses, including zoggies' home addresses, which has amazing laxative effects thereon. I understand from a brief radio report that the Editors & Publishers of "Village Voice" were arrested in Arizona for revealing the address of a local sheriff. Maybe there's a law against revealing policemen's home addresses. ZOG willing, we shall find out.

No one believed the scenario in "Camp of the Saints," in which mobs of 'boat-people' simply land on the shores of a European country (France) & take it over through sheer weight of numbers, with the co-operation of the churches & liberals. We see that nightmare coming true, for the same reasons, plus the jewish desire to eliminate the Whites, who are "the best of the Goyim," whom The Talmud commands to kill. I recall World War I & II propaganda in the USA that we were supposedly fighting to keep the USA from being invaded & occupied, as were Britain, France et al. Now, we permit our former countries to be invaded & occupied without a fight. "Wha' happen?" as they say in Los Angeles, California, in mestizo English. Peaceful conquest is now in vogue, according to our respective Zionist bankster regimes. In World War II, what would we call a Frenchman who helped the Germans come into France, or an Australian who helped the Japs invade? I think we'd call such people "traitors!" This term certainly applies to those who promote immigration alias invasion, occupation & takeover of our former territory. Memory is a major enemy of tyranny, as Orwell would point out, in terms of the chocolate ration in "1984" & its treatment by "Mini-Tru," alias The Ministry of Truth. Unfortunately, there is lots to learn from "1984."

My memory tells me that there were formerly European empires throughout the world. I recall seeing all the red countries on an old world map at elementary school. The Red countries were not communist, but parts of The British Empire. "Give us our own countries," cried the wogs & nig-nogs, "so we may rule ourselves." FDR swore that he would destroy the European "Reichs" or empires, which he did, although the huge White losses in two jew wars had knocked the wind out of the Whites' imperial sails. O.K. so they got their countries. Now they demand to come into our countries. This is what I call non-White imperialism. If White imperialism was unjust, then so is colored imperialism into White livingospace. But, seemingly, there is no one to tell White people that. Just me, here in Brownest Yakima.

So far, no jewsmedia pundit has claimed that Allah is punishing the USA with droughts, floods & fires, so Moslems are missing an opportunity for propaganda. Islam, incidentally, is the fastest-growing religion in North America, as I understand. The Nation of Islam has clout amongst North American Blacks, & Louis Farrakhan is a good speaker, who used to appear frequently on talmudic TV.

All the best. ORION!
