

18 NOV 07

Dear Phil: Many thanks for your letter & enclosures of 16 NOV 07. I guess Thanksgiving was adopted in commemoration of the Pilgrims' successful arrival in North America with their contingent of White CHRISTIAN (!) slaves. The filthy buggers. Thor's lightning be upon them. Lincoln would be mighty thankful for his terrible harvest of White corpses in his genocidal war to 'save' the Jewnion. Indeed, the turkey should be the official bird of the Jew Ass Oy Veh. After all, jews would consider birds & cattle including, two-legged cattle, as Goyim, so why not?

I wonder about the origins of "von Nothaus," who is mentioned in connection with the "Liberty Dollar", alias "Ron Paul Dollar." The translation of "Nothaus" with the likely phony "von" smells as kosher to me as "von Braunhut," the kosher buddy of the Idiot Identity preacher, Butler. Braunhut means Brownhat, & Nothaus means "Emergency House," likely an outdoor privy, since Notdurft means, in effect, "the screaming shits." Whether one with "Not" can reach the outhouse on time is an open question, of course.

I understand that ZOG allows people to peddle gold & silver as commodities, like copper, but to issue money treads on ZOG's turf. ZOG is hitman for the 'Federal Reserve' bankster mafia, as Lincoln & JFK found out, so to issue one's own money is like brewing one's own whisky & growing one's own tobacco & marijuana. It can be done, but at a cost determined by ZOG. The use of barter is also deemed anti-bankster, which it is. We know what ZOG did about Hitler's barter trade, which 'cheated' the parasites out of their 'due': World War II; nor did the banksters like Hitler's 'greenbacks,' any more than they liked the interest-free money of Lincoln & JFK. I guess the kosher Conservatives can't learn where History's Third Rail is located, until they step on it. With all their patriotic prattle, they know nothing as to the money origins of the so-called American Revolution. Maybe they think it was about a choice of flags, like Covington. As jew Teddy Roosevelt declared, "Might makes right!" so we shall see what legal grounds Messrs. Nothause et al. have against the guns of ZOG. I understand that Jesus was crucified 3 days after he kicked the money-changers from the temple. As my late colleague, Robert Frens, said: "Revolutions are not tax-deductible."

Once again, why would ZOG wish to make the skies toxic? Who benefits from such a crime, which is distributed all over the world? Perhaps this is more blighting disinformation, for if blighters can be made to believe that "The sky is falling," they will be too distracted to focus on more immediate realities. When we put things into the air, we must understand that ^{they} will come around with the weather, just as Chinese air pollution comes to North America, & North American air pollution comes to Europe. Everybody gets a share, even Israel. Of course, if we assume that our ZOG is ruled by space aliens, as in "They Live," we could understand why they might wish to destroy all human life, & other mammals, on this planet. The next question is: What do the space aliens breathe? Toxic fumes, like Godzilla? We should watch for humanoids wearing tanks of smog! Meanwhile, Earth does its things & we do ours, apparently in a state of mutual indifference.

Jews believe that they can get away with poisoning the planet, because Nature's laws do not apply to them, as with Goyim or two-legged cattle. I suspect that DNA would reveal otherwise, but reason cannot, apparently, dispel the jews' madness, nor the Christians', nor the Moslems! since all aspects of Judaism are anti-Nature. Our ZOG did, after all, irradiate the USA east of Nevada, with radioactive fallout in the 1950s surface atomic tests, so jews do, in fact, behave like space aliens. Dr. Cantwell, who studied the advent of the AIDS virus, claims that it was man-made, & he even names the jew head of the New York medical authority who introduced the virus in contaminated Hepatitis C vaccines: Dr. Szmunness, of Communist Poland. Szmunness purposely chose homosexuals of maximum promiscuity to spread the disease. Allegedly, WHO also vaccinated Black Africans with an AIDS-contaminated smallpox vaccine. Now, we are informed that certain states require vaccinations for children who attend public schools. Otherwise their parents will be jailed for failure to comply. In view of these findings, ZOG's toxic sky policy may, indeed, be a fact.

The blighting clings to the illusion that individual actions can substitute for collective actions, here on Spaceship Earth. I think events will reveal this idea to be in error. Stay tuned!

All the best. DOWZ! ORION!
