

20 NOV 07. Dear Phil: Thanks for your mailing of 17 NOV 07 & the 41¢ stamp, always appreciated! Re lefthanded: European tradition has long considered the left as being the lesser of two hands. The term, "sinister," means "left," with added meanings of 'evil,' for example. In Moslem countries it is considered obscene & insulting for one to gesture with his left hand, write with it &/or eat with it, for the left hand is traditionally used to wipe one's ass after defecating. I recall that Zundel was right-handed, for he liked to write with a fountain pen. If he were left-handed, he'd have to assume a grotesque & uncomfortable position in order to avoid smudging the ink. He also used his airbrush in his right hand, as I recall, for it was placed on his right, at his work-table. I never met Rimland, nor do I wish to, for I've read quite enough of her pro-jew writings to satisfy my curiosity.

No, Zimbabwe is not finished; just its Black people who dwell on its land. The Chinese are waiting to occupy it when its jew-gangster masters have got their use out of their shabez Goy stooge, Mugabe. After that, Blacks will become the new minority, as I predicted in 1976: "When the Whites leave, the Blacks will starve." As usual, I hate to be right.

Ronald Reagan, our Armageddonist Presidente, is alleged to have declared: "If you've seen one redwood, you've seen 'em all." When the jew took over the lumber company which sought to limit exploitation of the redwoods in the Big Sur region of California, as I recall, he diligently cut all the redwoods, except for a thin screen of those on the roadsides. The jew despoileth & the jew departs. I doubt that the new asiatic residents of CA will have the same reverence for redwoods as do the non-Chinese cloners. After all, jews are Asiatics, as Benjamin Franklin warned. He should know, for he served them as a foul Freemason! All the best. DOWZ! ORION! *Eric*

## China plans to send jobless to live in Africa

*See NEWS 34/4*

From SAPA-AFP

Beijing - China is preparing to send more farmers to Africa as rural labourers find it increasingly difficult to find jobs in the nation's urban centres.

At a meeting in southwest China's Chongqing city on Tuesday the head of China's Export-Import Bank, Li Ruogu, pledged to help finance African emigration as part of the city's urbanisation scheme.

"With the establishment of the [rapid urbanisation] project, several million farmers will have to move," the People's Daily quoted Li saying.

China's Commerce Ministry refused to say how many contracted Chinese workers have been sent to Africa, but according to state press reports up to two-hundred thousand Chinese-born mainlanders live in South Africa alone.
