

25 NOV 07

Hail Jason! Thanks for your hopeful letter of 20 NOV 07. We should all be hopeful, for it is said that "where there's life, there's hope," but it's high time that we should cut the Gordian Knot which ZOG-jews & blightwingers have woven for Our Race. By now, you should be aware of our lack of unity, but what you fail to see is that none of our touted 'solutions' can work within the context of Zionist political, economic & demographic rule. We may found a thousand Nazi parties, all in competition; we may found a thousand religious groups, all competing with one another; we may move here, there & everywhere to start White communities; we may recite The 14 Words in prisons, &c., but as long as we have no Idea of White Nationhood, these activities will continue to be irrelevant pastimes, as now.

This is the nature of what I tried to tell Ben Klassen when he came to ask me for \$3 million in 1976, to start up his COTC franchise business. He could not see beyond his own ego, like a typical blightwinger, who would use his race to serve himself. As you say, that is crazy. I certainly agree.

Hitler would have failed to achieve what he did, had Germans lacked their identity as a Nation. The Whites of North America have always lacked their identity as a Nation. Ask any paleface in America, "What is your national background?" He or she will list tribal & geographic origins, including non-White Indian tribal origins, but none of these are nations. A Nation is One People, not a place. If Whites fail to see themselves as One People, hence, a Nation, we can achieve nothing within this empire of the jew-banksters.

But Nationhood would threaten all the little blightwing rackets under ZOG. I know that & the blightwing knows it. How could they ever think of putting Our Race first? No way, Jose! We want our zogbucks. Klassen told me that he hoped to obtain tax deductions by calling his BUSINESS a "church," under ZOG, but ZOG does not allow existing churches to enjoy tax deductible status if ZOG deems ^{them} to be making 'political' statements, especially statements ZOG deems pro-White, that is, "hate." It would indeed be "crazy" if the ZOG allowed its opponents to make a profit from their opposition to the ZOG. Jew banksters can add things up, even if we can't. Apparently, Klassen discovered that he'd reached a dead end, financially, organizationally & egotistically. It takes a big man to admit his mistakes & start over, but big egos & little men cannot do that, as in Klassen's case. The Yakamas have the proverb: "At the end of the trail, there's the final bottle." As I gather from the blithering blightwing sources, for Klassen it was the final sleeping pill or final knife cut. The Roman way of suicide was to fall upon one's sword, or to cut one's wrists in a warm bath. I'm not sure how Klassen did himself in. Maybe Ron McVan knows.

I'm glad to learn from your letter that he writes to you, for he is extremely busy. I would be unable to keep up with my correspondence if I played music, did great artwork & composed great essays, as Ron does, but he also writes letters! That is outstanding. Ron is a Klassen eyewitness & survivor, besides. I can only congratulate him on his output & his CREATIVITY, which you will be able to achieve when you finally leave the gulag, permanently, I hope, for you & for Our Nation.

Thanks for the Matt Koehlblatt, which revealed that Lauck is still in business & George Dietz is dead. Time & change occur in due course, but unlike time, change can accelerate, as it seems to be doing now, or maybe we are better at noticing the changes. It's time for you to focus your mind on the likely prospect of The North American Union, under continuing Zionist (jew supremacist) rule. Such a change will shake up all the little blightwing compartments & rackets, such as they are. One blighter refuses to organize Whites beyond U.S. borders, even as ZOG erases those borders. Why is this blighter so opposed to White Nationhood? Your guess is as good as mine.

Any good idea can be damaged &/or destroyed by poor human quality, as the history of the blightwing proves, assuming that they ever had any good ideas to begin with. But instead of trying to correct past mistakes, we, who are alive, should be CREATIVE in addressing the present. This does not mean that we shall avoid making mistakes, but it means that we should be able to take our mistakes in stride, so as to turn our stumbling blocks into steppingstones on our path to victory. We, who never give up, can never be defeated, for The Struggle itself is our victory. All the best & ORION!

Eric
