

30 NOV 07

Hail Daniel! Many thanks indeed for your letter of 19 NOV 07 & the #11 issue of Separate Living. The White Power Manifesto was included in the introduction of "Here Comes the Revolution..." It is a list of 15 Points or Goals, as I recall.

Once again, I caution you that People must come before Place in establishing a Homeland or Nationstate. One achieves worse than nothing by filling a place with a disparate jumble of, say, anarchists, each of whom has his or her individual agenda. The People must be of one race & of one mind, in terms of what they want for The Folk. If not, then we have only the basis for turmoil & alien influence. Such a 'diverse' group of people will not be able to obtain nor defend their land. In the USA, a community can be destroyed by one traitor who denounces a folk to the ZOG, &/or who courts trouble from the ZOG, as occurred in the loss of Pastor Butler's land. I saw a TV feature on "The Travellers," a colony of Irish scam-artists who have their own exclusive community, called Murphysville, if I recall the name correctly. One recruit into the community had a falling out with her husband, & denounced the entire community as being up to no good. The jew mediocrats focussed on the community's system of arranged marriages, with the agreement of the parents. Oy veh! I wonder what the Goy viewers would think about jewish marriages, which are traditionally arranged by "match-makers."

Under ZOG, land-taxation is increasing, so land-holdings are under more scrutiny than ever. As I mentioned in my previous article on The Farm Crisis, the Goyim are being driven off their remaining lands by increased taxation & decreased incomes.

Current events are replete with nations who have lost & are losing their former homelands to alien invaders, mainly because these nations have no idea of themselves as a nation, that is, a people. If I don't own the place in which I live, & my government admits strangers & aliens into my living space, how could I object, for I am a denizen of an empire of diverse nationalities, races & cultures? In Covingtonia alias the NW, the Ostensible Whites who flee here bring the Mexicans with them, for "cheap labor." They drive up housing prices, beyond the reach of White working people, as they add aliens to those already hired by the rich agribusinessmen.

Once again, we should examine the origins of White settlement in North America: The 13 Colonies began as plantations, that is, as parcels of land on behalf of agribusiness, for export to the European markets. Hence, the land was settled by businesses, not nations! The Confederate States were not separate from these origins, which also meant that they were slaves of the Rothschild Bank of England. The Confederacy could never be a nation, since it was comprised of non-Whites ruled by agribusinessmen who were ruled by banksters. All the flags, uniforms & musketry of the Civil War could not change that status.

In all things, Form must follow Function. I can choose a piece of land on which to dwell, but land is like people: unequal. A township of rich bottomland could put me in the clover, in regard to productivity, but an equal area of desert could put me in the cactus. A nationstate needs arable land, strategic location &, with luck, some useful natural resources thereon or thereunder. Colombia is big & richly-endowed with all useful resources. Denmark is small & poorly-endowed with those items. Both lands have good locations for trade. So why are the Danes rich & the Colombians poor? It's the nations, i.e. the peoples which are different. The USA started out entirely wrong for it to be anyone's national homeland. Pick your plantation!

Of course, our economic, demographic & political situation is not static. Our bankster rulers want The North American Union or "Canamex." Since they founded this mess, chances are that what the banksters want, they will get. Thomas Chittum, who wrote "Civil War Two," predicts that the USA will break up, with partition along racial lines, but not as long as ZOG rules. ZOG & its minions want a thorough mixture of hispano-mestizos everywhere, which is occurring from jewsmedia reports in North, South, East & West, as well as places in between. Apparently, everyone hires Mexicans. What the proponents of the NW fail to consider is Chinese colonization of SW Canada, where Mandarin is the second spoken language. The birth-control pill did in the French. Our previous Washington governor was Chinese, so we have Asian colonies running down the coast from "Hongcouver" to San Francisco, & Mexican colonization from the Mexican border, up the central valleys, right up to the Canadian border.

The idea that a "spark" can set off a major movement is very old. The Communist Party newspaper, before the Reds took over the Russian Empire was called "Iskra," "The Spark." The assumption was that the masses of the 'oppressed' just needed "propaganda of the deed" to set off a mass-uprising against the tsarist system. The failure of the Reds' 1905 re-

2)

volution caused Vladimir Illych Ulyanov alias "Lenin" to wonder why it failed. Historians reported that the uprising in St. Petersburg was quashed by the timely arrival of a train-load of Guards soldiers who arrived back from the front. They were loyal to the Tsar, & the revolt was crushed. "Lenin" figured, however, that the masses were not sufficiently desperate to carry out a revolution, because "objective conditions" were lacking. An objective condition would be, for example, if everyone were starving at the same time, not here & there or now & then. World War I brought many more to the brink of starvation & beyond in Russia than did the Russo-Japanese War. In Latin America, Che Guevara assumed that the masses were sufficiently oppressed, so all that was needed was a "spark," in the form of "propaganda of the deed," in "armed struggle," as I described in my "Here Comes the Revolution..." speech. I suspect that it is going to take a far greater number of Whites to start a national movement than ten, if we can find a whole ten Whites who agreed on basic points, to begin with. Things don't just "fall into place." Usually, they just fall apart.

If we cannot begin to create a shadow government, we certainly shall not create a national homeland for ourselves. It was said that this concept of a shadow government was a hallmark of the NSDAP, which had its own shadow ministries, even when The Party was out of power. This policy is necessary, good practice & still legal, under ZOG. Most of all, we need our own Ministry or Department of Education, for that is what Whites obviously lack. A curriculum similar to the NSDAP's NAPOLA (National Political Academy or Leadership School) would be effective, provided we can find the 1 out of 20 with leadership potential. Once again, this will require collective participation, on behalf of an agreed upon agenda. I wonder, at this stage of the game, if we could find a whole 20 Whites who could agree on ANY agenda. Ha! Since Whites in North America have never been a nation, we must begin to learn some basics. Our task is similar to Whites who wanted Roman citizens to join their respective nations & to think in terms of nation rather than empire. Nation begins in the mind, not on the land: First must come thought, then belief, then behavior; National behavior! Belief requires identity, our identity as a nation. Imagine if we approached some strangers, with whom we wished to acquire a piece of land. This would be most unusual, for usually, it is family members with whom we wish to live, not investors. So it is with our nation, which is an extension of our family. The jew definition of "nation" as denizens on a piece of land is as incorrect as to define dwellers in an apartment building as "a family." We should begin at the beginning, as with Menachem Begin, the Israeli leader, who wrote "The Revolt." He said that a people in need of weapons will obtain them. All it takes is will! In the USA, most sheeple have weapons, but no will to use them on behalf of their national interests. As Pastor Miles wrote, the blightwing's weapons are 'much too precious' to be used. He said that the leftists get weapons & use them. They do not treat them as jewels or as fetishes. Criminals also use their weapons, as do nut-cases who shoot up schools. "Lenin" would conclude that most armed citizens have no gripes against ZOG sufficient to use them, ZOG love 'em. For our nation to exist, we must have the will to bring it into existence. DNA, like weapons, must be a reality, in thought, word & deed. We cannot be a nation unless we behave like one. As you say, where is the necessary discontent needed to fire up a national movement? All the blightwing 'leaders' have seemingly found their comfortable niches within the status quo. This lack of 'objective conditions' was what finally caused Che Guevara to fail: his revolutionary 'spark' fell upon soggy ground of a generally satisfied population. Besides, the Bolivians saw Che & his bunch as 'foreigners,' which they were, & not Bolivians. Che's studious ignorance of ethnic differences, even amongst mestizos, who mostly spoke Spanish, was another major factor in his undoing.

The provinces of Spain, which incorporated Portugal, for a brief period, all have their dialects, even languages, like the Basques. When I travelled throughout the Iberian Peninsula in the mid-1960s, by third class train, I heard "Spanish" only in Aragon, Castile & Andalucia. The dialects in other provinces I could not understand, although I knew some Portuguese. Most Spaniards used Spanish as their 2nd language! Naturally, there have been strong provincial separatist movements, particularly in Basque Navarre & Catalonia, which were quashed by Franco's Nationalist government in 1939. Now, Spain is being invaded & reconquered by the African Moslems, who have outbred the Spaniards. It appears that men's minds become empty as their bellies become full. We need to start thinking, for a change. All the best. ORION!
