

22 DEC 07

Hail James! Thanks for yours of 4 DEC 07. Your zoggies keep you in suspense, for they are in no hurry. One fellow is appealing his status as a one man "Security Threat Group." He is in a category all by himself as a de facto trusty, & a de jure STG, which is indeed an oxymoron, like an honest conman. I recall reading "Death Ship" by B. Traven, a writer who some have mistaken for me, since we lived in the same places & did similar things, except that my life was a good deal easier than his, as I understand. Traven was older than I am, & now he is dead. He describes a U.S. merchant seaman who loses his passport when his freighter leaves without him. That makes him a stateless person in the 1930s, when there were quite a few of such roaming Europe. The French police put him in prison, where he is attending a sewing class therein. Their guard/teacher spends a full day, teaching & testing them to determine that they all can thread a needle. Talk about a leisurely pace! But our sailor-hero never gets to complete the course, since the French police sneak him over the border, into Spain. It's my kind of novel, since it resembles very closely my own experience. Yes, I've even sailed on real death-ships. They are usually insured so the owners can make money whenever the ship goes down. It's a good idea to check the value of the cargo before one boards such a vessel, as I did when I was commuting between South America & Panama. Even so, I had a few scary experiences, such as being dead in the water near the Equator with a main engine 'problem' & open cargo hatches, to let the cargo ventilate. If a typical storm had hit us, I might not be typing this letter. I've done more sea miles than air miles in the 20th century, which one might deem some sort of record. I consider myself fortunate in every respect.

I quite understand your dilemma, pending others' decisions. Of course, you can begin your writing project & take the writing with you, for later completion. I don't see you'd have anything to lose by passing your time writing, rather than fretting in a state of "animated suspension." I still have notes & excerpts of a sequel to my first novel, which I'm in no hurry to complete, in view of the response to the first: FEDZOGUSA burned 3000 copies at U.S. Customs. The main reason I am not bothering with it is lack of market & of readers' interest. I also do not wish to treat a serious subject, like Aryan suffering, in a cavalier manner by being too brief. What I have to say, I wish to say in few words, so I must consider carefully how I might present such a big topic.

Since we now live in a mestizo America, I do not think the Whites are learning Black Reality, & are therefore reacting in their own interests as Whites. What I see is a militant hispano-mestizo movement which objects to Black privilege. Mexicans do not feel the slightest guilt for Black slavery, for example, any more than they feel guilty for the Holocaust. Demographic change has created a whole new 'ballgame' in Judeo-America, with the addition of Asian influence & increasing presence. I suspect that the Black role in this Zionist-bankster empire has almost run its course. It appears that our rulers want their North American Union, which will greatly increase the proportion of hispano-mestizos throughout North America, as is already occurring. The browns see Whites as prey, & they see Blacks as competitors. How the Blacks see the brown invaders is not covered by the jewsmedia, but if Blacks have one iota of intelligence, I'd guess that they saw the browns as a grave threat to Black presence & privilege. The fight is likely to be over who will feast upon the soft White body politic, which is being devoured as I type this letter, in regard to taxation & falling living standards. We are literally paying our invaders to take over this country, by subsidizing their feeding & breeding. I do not see that the Blacks were ever beneficial to Whites, for the British masters & subsequent masters used the Blacks against the White workers & laborers. The Blacks came into the State of WA as strikebreakers against White miners, who struck for a living wage.

As you say, Whites are afflicted by a suicidal altruism which is taken by non-Whites as a sign of weakness & stupidity. Those who give something up without a fight are deemed cowards as well as stupid weaklings. The Mexican term for such Whites is "putos," which is politely translated as "fags" & "sissies."

As you say, the question for Whites is "To be or not to be," but most Whites do not know it, as yet. Stay tuned! Good Yule & Happy New Year! ORION!
